FIG. 1—HACKERS REMOVED AFI WATCHDOG RESEARCH. The topics of the documents deleted show other watchdogs what and who to focus on: proofs of the theft of Leader Technologies' social networking invention as the platform for government racketeering, in collusion with private companies, to take over global digital communications infrastructure.

We Be People

(May 20, 2016)--Americans for Innovation (AFI--this site) investigators just discovered that over 200 research documents that prove massive corruption in Washington, D.C. suddenly went missing from its timeline and previous posts.

The subject matter priorities of the hacker(s) are glaring.

HACKERS MOST CONCERNED ABOUT GOVERNMENT CORRUPTION EVIDENCE

Of special interest to the hackers were documents surrounding key actors in the now evident

plot to take over America's digital infrastructure.

We decided that the best approach was to simply summarize the deleted material and let our readers draw their own conclusions.

As we prepared the summary, a line from Hamlet (Act III, Scene II) kept rolling in our heads:

"The lady doth protest too much, methinks."

WHY DID THE HACKERS DELETE THESE SUBJECTS?

These selective deletions likely telegraph their vulnerabilities. We hope it will aid other watchdogs around the world.

The following document topics were removed (and have now been restored), listed in no particular order:

Note: If you discover a broken link, please write us at amer4innov@gmail.com with a copy and paste of the link. We will fix it and email you the actual document.

POOLS"

STOP FACEBOOK PROPERTY THEFT

WILL HUMANKIND EVER LEARN: Facebook's Orwellian doublespeak about property and privacy (theft) merely repeats the eventual dehumanization of the individual under MAO's Red Star, Stalin's SOVIET Hammer & Cycle and Hitler's NAZI Swastika. Respect for the inalienable rights of each individual is a bedrock value of democracy. The members of the Facebook Cabal abuse this principle at every opportunity. They evidently believe that they deserve special privileges and are willing to lie, cheat and steal in order to treat themselves to these privileges.

ASK CONGRESS: PASS THE INVENTOR PROTECTION ACT!

LEADER TECHNOLOGIES
Inventor Protection Act
 (Proposed)

America needs to practice what it preaches.

We have no business lecturing the world about free enterprise and the rule of law, when we permit the investors in Ohio-based innovator Leader Technologies to go uncompensated for the risks they took to help invent social networking . . .

—a technology upon which the President and U.S. government now rely;
 —a technology *stolen* by the "Facebook Cabal" who recruited the federal courts and Patent Office into their club of corruption.

Rescind. Investigate. Sanction. Certify.

Contact your representatives. Ask them to pass it.
Real American inventors need your support.

Hacked? Some little nerd hacked AFI? Really? Instead of deleting pictures and words from this blog, why don't you pipsqueaks do something productive like reading the Constitution or Aristotle's Nicomachean Ethics.? Maybe you could get out of your mom's basement and get a little fresh air. Or even better, why don't you turn your attention to exposing these Harvard thugs for the thieves and liars that they are.....

Have a great day, TEX =

Thought this was particularly relevant to the hack of AFI. Seems pretty clear to me who was behind it given the people they were trying to protect and the subjects they don't want us commoners to read about in a concise and well-laid-out manner.

Two US senators this week introduced a bipartisan bill meant to protect Americans from government hacking.

The Stopping Mass Hacking (SMH) Act from Sens. Ron Wyden (D-Ore.) and Rand Paul (R-Ky.) would prevent the implementation of a federal court procedure known as Rule 41. Approved in May, Rule 41 makes it easier for the Justice Department to obtain warrants for remote electronic searches. It also allows judges to issue a single warrant authorizing

GIBSON DUNN LLP exposed as one of the most corrupt law firms in America

government hacking of numerous devices around the world.

"This is a dramatic expansion of the government's hacking and surveillance authority," Wyden said in a statement. "Such a substantive change with an enormous impact on Americans' constitutional rights should be debated by Congress, not maneuvered through an obscure bureaucratic process."

I think they were trying to discredit the AFI research with the broken links. It makes the site appear sloppy to new readers. NOTICE TO READERS: The AFI researchers are meticulous and systematic. They rarely post a broken link. So, if you encounter one, let them know because it may very well have been caused by these hackers who don't want us to know the truth about their slave masters.

Investigative Reporter Julia Davis investigates Facebook's Leader v. Facebook attorney Gibson Dunn LLP. She credits this

firm with the reason why not a single Wall Street banker has gone to jail since 2008. [Click here](#) to read her article "Everybody hates whistleblowers." *Examiner.com*, Apr. 10, 2012. Here's an excerpt:

"Skillful manipulation of the firm's extensive media connections allows Gibson Dunn to promote their causes, while simultaneously smearing their opponents and silencing embarrassing news coverage."

This statement followed right after Davis cited Facebook's chief inside counsel in the Leader v. Facebook case, Theodore Ulyot, who appears to have helped lead the Leader v. Facebook judicial corruption. Interesting word choices associated with Gibson Dunn LLP: manipulation, smear. Attorneys swear a solemn oath to act morally, ethically, and in support of democratic principles. They promise to conduct themselves in a manner than instills confidence among the citizenry in the rule of law and the judicial system. These promises appear to be meaningless.
