WHISTLEBLOWER NAILS FAUCI, ROTHSCHILDS, HIGHLANDS GROUP, DARPA, DOD, PIRBRIGHT, GOLDMAN SACHS, US NAVY, US AIR FORCE, US ARMY, CIA IN WORLDWIDE BIOTERROR

WHISTLEBLOWER: TONY FAUCI INVOLVED IN WEAPONIZATION OF NOVEL DNA BIOTECHNOLOGY IN BIOWARFARE WITH DOD, DARPA, PIRBRIGHT, ROTHSCHILD, GOLDMAN SACHS, US NAVY, US AIR FORCE, US ARMY, CIA

WIKIPEDIA HIDES ALL OF ROTHSCHILD'S MASSIVE INVOLVEMENT IN EARLY U.S. BIOTECH

THE FOUR HORSEMEN OF THE APOCALYPSE?

Their moral basis? Biotechnology makes money and can rid the world of humans with bad genes (eugenics)—an Imperial British Empire goal since the mid to late 1800s. They

have no empathy. Yet, whenever cornered about their motivation, they spout the propaganda line (lie) that their work can be useful... for the children ... for the blind ... for the crippled ... for curing cancer ...blah, blah, blah. We believe their propaganda “narrative” is cynical window dressing for their avarice and satanism.

Victor Rothschild

Jacob Rothschild

Sydney Brenner

Tony Fauci

Victor Rothschild and his **N.M. Rothschild Asset Management** formed **Biotechnology Investments Limited (BIL)** on the heels of the UK Cabinet Commission he led to reorganize British R&D. This insider trading gave him an early lead in setting up biotechnology research firms to be the first to exploit “novel” DNA manipulations products.

Victor Rothschild’s Pilgrims Society “reforms” led to the creation of SERCO, QinetiQ, Pirbright Institute with IBM, Lockheed, RCA, NBC, CBS, Facebook, Google, traitors within the U.S. Joint Chiefs and C.I.A. to implement “The Internet of Things.” This plan was greatly facilitated by their theft of the social networking inventions of Columbus-OH innovator Leader Technologies. *SERCO and QinetiQ have been given control of huge swaths of America’s critical civil and military infrastructure.* SERCO, QinetiQ and Pirbright Institute are all controlled by the Monarch’s “Golden Share” (ironclad control). But we digress, we’ll focus on biotech in this post.

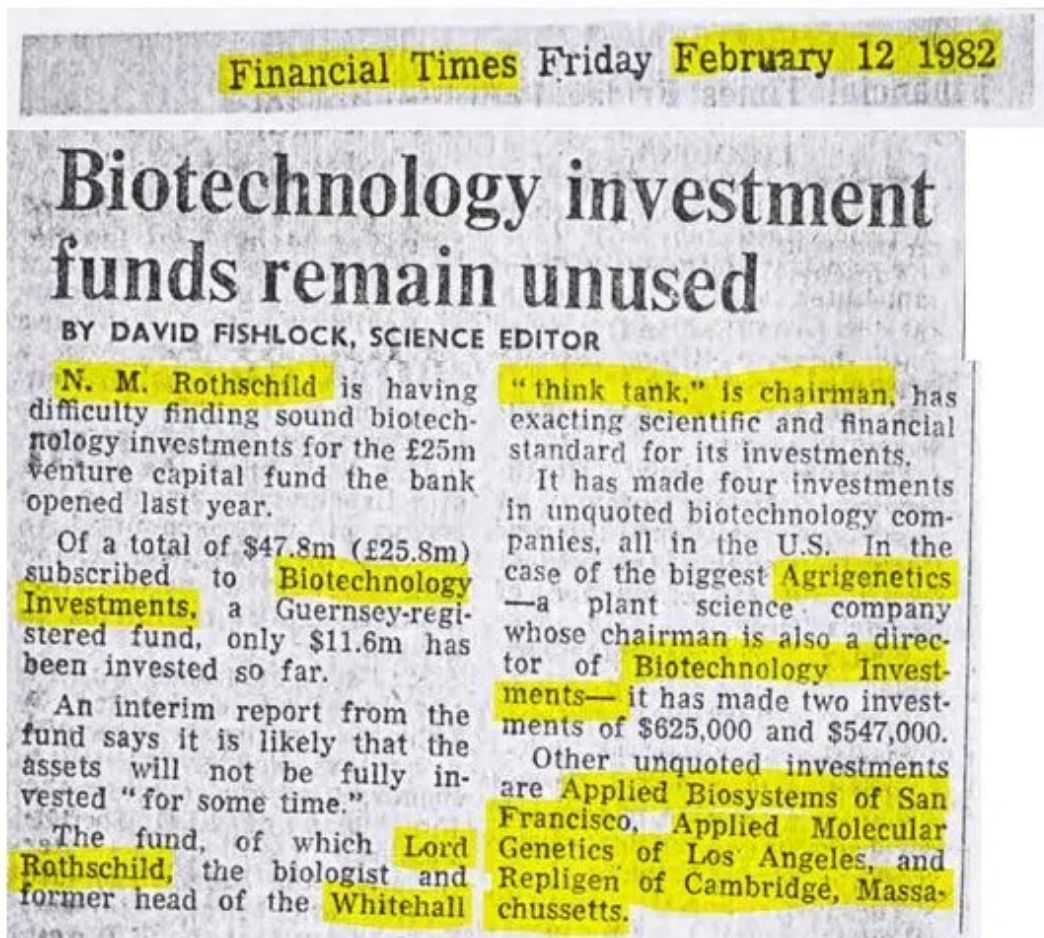

This finance-led biotechnology feeding frenzy has left humanity with a real mess. Profit hounds devoid of any ethics were driving science, and not the other way.

Coronavirus is just the tip of the iceberg of “novel” biowarfare products they have created.

Newly discovered whistleblower information reveals that the NIH's Anthony S. Fauci is at the epicenter of exploitation of nanotube, nanowire and nanopore delivery systems to weaponize all of this immoral biotechnology research. Nobel biologist Sydney Brenner was Victor Rothschild leading scientific step and fetch it boy in this Pilgrims Society project.

Cuts hit U.S. biotechnology jobs

BY DAVID FISHLOCK, SCIENCE EDITOR

Biotechnology Investments, the Rothschilds fund devoted to investment in such companies, has just invested in Integrated Genetics of New York. The company is only one year old and has obtained its first major financing from several venture capital funds, including \$1m (£550,000) from the Rothschilds fund.

BIOTECHNOLOGY INVESTMENTS' LATEST REPORT HIGHLIGHTS AN IMPRESSIVE PORTFOLIO

Blue chip genes promise high returns

BY DAVID FISHLOCK, SCIENCE EDITOR

"OUR INTENTION is to seek a much higher than average return on the unquoted part of your portfolio within a three to seven-year timescale," Lord Rothschild says in the second annual report of Biotechnology Investments. His report suggests that it is making good progress—indeed, it reads like a catalogue of the "blue chip" end of the spectrum of new biotechnology companies which have blossomed in the past few years.

Increase
With two-thirds of the \$61m fund now invested, almost equally in quoted and unquoted biotechnology companies, it is showing a 25 per cent increase in net asset value per share on the year, and

Biotechnology Investments, set up on the initiative of Lord Rothschild, as an offshoot of N. M. Rothschild Asset Management, now has a portfolio of 21 investments, both big and very small. All unquoted companies must still meet the strict criteria laid down by the directors. Lord Rothschild summarises the five rules as follows:

- It must employ not only scientists of high calibre but also first-rate business managers, so that the team is "ready and able to establish a successful venture."
- Its business plan should clearly define its research and product areas, and contain both a market analysis and a realistic assessment of the competition.
- Its potential rate of return must be in line with the risk being taken.
- It must have a sponsor to act as lead investor and to accept responsibility for the venture. (Although the fund itself has been known to act in this role.)
- The company must have plans for releasing the investment, normally through a public share issue.

In the year ending May 31, the fund received 82 investment proposals, of which 57 came from the U.S., compared with 16 from Britain, three from Israel and one apiece from Belgium, Canada, Finland,

France, West Germany and Ireland. Of these, it chose three U.S. companies in which to invest: Catalytica, where the \$1m invested will go mainly to support the use of enzymes in petrochemical processes; CW Ventures, a fund which invests in health care; and Immune, a company with close links to Hoffman-La Roche and high hopes of leading the field with a treatment for AIDS (auto-immune deficiency syndrome).

Change

By this summer the scene had changed dramatically. No fewer than four of the fund's investments have gone public, in each case advantageously: Amgen, Applied Biosystems, Integrated Genetics, and Immune (see table). Mr David Leathers, investment manager, says that the fund has no intention of selling companies which go public, but will still continue to apply the five rules by which they judged the original investment. Even so, he admits that the fund it did not expect so many of its unquoted investments to go public so soon.

Another dramatic change is the view the fund takes of

British biotechnology investments. In the past Lord Rothschild has been forthright in expressing disappointment with the calibre of companies coming forward with investment proposals. Other London finance houses have suggested that they see the need for a more creative approach in Britain, to produce packages appropriate to a situation, rather than passively judge a proposal as Biotechnology Investments has tended to do in the UK.

During the year the fund made its first-ever investment in an unquoted British company. It is also its biggest investment in this sector. The fund has £3.1m in Celltech, the company with an inside track to the

Criteria

Celltech, to quote brokers Serungeour, Kemp-Gee and Co. last month: "fulfils the main criteria necessary for mounting a successful operation in this fast-developing, highly-technical, field. The management team comprises both eminent scientists and sound commercial/financial managers and the

company is able not just to make scientific discoveries but to scale-up, extract, purify, and market its products, as evidenced by its first product, the anti-streptococcal monoclonal antibody."

The current position, according to David Leathers, is that the fund is evaluating half-a-dozen British potential investments but has no new ones "on the front burner" from the U.S. It is, however, considering the investment of another \$1m in Repligen, one of its first investments, which now needs more cash to help build a pilot fermentation plant.

Co

Of the British prospects, the fund is coy for the moment. One that interests them is the Agricultural Genetics Company, set up this summer as a "country cousin" of Celltech, to try to exploit the plant genetics research of the Agricultural Research Council.

As Biotechnology Investments see it, the new company has been very modestly funded by its three partners—British Technology Group, Advem and Ultramar—at the outset, until the investors see the first busi-

ness plan. Then the partners and other investors will be invited to plunge more heavily. Two of the funds older U.S. investments, Genetic Systems and Applied Biosystems, have just announced a joint venture in immunodiagnostics, to develop two new diagnostic systems, one simple and inexpensive for "doctors' surgeries" the other automated for clinics and hospitals.

These systems are aimed at the diagnosis of bacterial and viral infections, chronic illness, and cancer, cardio-vascular and genetic disease. Round at Rothschilds, they see the move as an important one for both companies.

One further recent investment which excites the fund managers is the \$1m they have ploughed on Genzyme, a U.S. company set up to acquire Whatman Biotechnicals in Britain. This company makes diagnostic enzymes. It has since bought Koch-Light Laboratories, another British company, making fine chemicals.

Genzyme plans to use these two UK companies as a base for developing biotechnology interests. Biotechnology Investments see the company as virtually British but driven by American entrepreneurial initiative.

Today, *not one* of the biotech companies that Rothschild helped fund even acknowledges Rothschild financing. This censorship of Pilgrims Society involvement is evident. It

Whistleblower specifically heard super-secret Highlands Group conversations with Fauci discussing a fusion of chemistry, biology, wireless networks, encryption and nanobots into bioweapons

The highly illegal Highlands Group (founded Feb. 1995) is funded by the Senior Executive Service (SES), DoD Office of Net Assessment and DARPA (funded 9 Lieber patents), National Science Foundation-25, USAF-15, US Navy-34, US Army-1, MITRE Corp-1, DoD-1, Harvard-3 and CIA-1

One Lieber patent (No. 7,858,965) with “ballistic transport” attributes can fire killer viruses out of nano-canon dust ingested or injected into your body (funded by DARPA, Army, Navy)

May 11, 2020—We have reported for some time now about the Highlands Group. It is a super-secret technology DARPA weaponization gathering of public and private entities who meet to select promising technologies for weaponization.

Never mind that such wholly non-competitive gatherings violate The Federal Advisory Committee Act (FACA) since Highlands participants profit wildly from their recommendations. Such “public-private” relationships are the very definitions of fascism.

Never mind that the U.S. government uses the Highlands Group for racketeering by plotting the theft of the intellectual property rights of American citizens without regard for the U.S. Constitution and Bill of Rights.

This whistleblower attended multiple ultra-secret Highlands Group meetings in Washington, D.C. as a senior engineer for the likes of the U.S. Air Force, Martin Marietta, Rockwell, General Dynamics, Eaton Corp, Leidos, SAIC, Raytheon and others.

These highly-secured no-notes affairs of typical of secret societies.

Brian Friel, Govexec.com said of the Highlands Forums (undated) "A thousand thinkers have participated over the past 12 years, attending the sessions to which they have the most to contribute." See **Oct. 09, 2017** capture of the Highlands Group site. Note the **list of participants** identified in this site.

Remarkably, Highlands published a website between 2000-2018. Organizer Dick O'Neill first wrote on Sep. 29, 2013: "A core element of the Highlands Group activity has been the Highlands Forum. Over the past 18 years almost fifty major meetings and twenty enrichment sessions have been held around the country. **[1]** The website appears to have been taken down after about Jan. 25, 2018.

Brian Friel, Govexec.com.

The Highlands Group participants appear to have been oblivious to their illegality of their meetings. Evidently, the opportunity to help decide which technologies would be weaponized by DoD/CIA/MI6/Pilgrims Society and commercialized by Silicon Valley was too alluring to worry about morals or ethics.

To this day I am unsure why O'Neill asked that question.

TONY FAUCI HAS SOME EXPLAINING TO DO

FAUCI OFFERED TO GIVE THE PARTICIPANTS FLU VACCINATIONS!

Keep in mind that: (1) Fauci had not been introduced in the meeting, (2) Fauci only had 40 minutes of side conversations with the organizers (Marshall, Chandler, O'Neill and Tether), (3) then Fauci offered flu vaccine injections to these total strangers after, (4) Fauci and his kibitzing hosts had whispered for 40 minutes about the **use of nanobots in biowarfare**.

IS TONY FAUCI THE DR. STRANGELOVE OF BIOWARFARE?

Fauci was evidently engaged in illegal, fascist planning with the Highlands Forum.

Fauci traded on his NIH position to weaponize technologies for DARPA, DoD, Navy, Army and Air Force, not to mention the military of the United Kingdom and Commonwealth?

Given Fauci's central role in the Coronavirus COVID-19 White House task force, and his NIH funding of numerous nanoscience patents along with DARPA, C.I.A., Navy, Army and Harvard, the public needs to know:

1. Why is Fauci not a traitor to the American Republic?
2. What is the full extent of Fauci's loyalties to the British-American Pilgrims Society?
3. How did Fauci get control of so much NIH funding to practice obviously fascist insider financing of selected companies and researchers?
4. Why is the NIH funding nano-biowarfare?
5. Why are Fauci's activities not racketeering of the most hideous kind?

6. Are nanobots from Harvard being used to spread Coronavirus? How? Where?

Hey Nomad. How about more suggestions and possible solutions and fewer cheap shots at people who are at least trying? That's the problem with so many Patriots, they chew on their own instead of the enemies of the Republic. At least AIM gives their reasons for backing Trump. What do you give? "Not a bad website." Great. Damning with faint praise. That's the best you got? Suggestion: Be more constructive and be a part of the solution and stop whining. We are where we are today because we have failed as a citizenry to hold the powerful accountable. Own that responsibility bro. Those bad boys and girls ran with the ball while we slept. Trump cultism? Hardly.

How many times have you heard Betsy ask where's the beef out the Attorney General's office? DoJ? DoD? Trump's selection of DeVos? Ross? They call balls AND strikes. Also, we don't have all the facts, so why just bash Trump when he has told us plainly that he will not telegraph his plans? He has been attacked mercilessly. How would you fare under such an onslaught? Thank God Trump is in the White House and not Obama 2.0 or Hillary.

I am reading about Operation Warp Speed. There are reports out there that President Trump has given a "blank check" to pharmaceutical companies to have 100 million (some reports say 300 million) doses of covid19 vaccine ready by years end. Wondering if this will be made mandatory. Does not set well with me at all.

There are many Covidiot's that are so brainwashed that only a vaccine will do it for them. Vaccines will never be mandatory. In fact, a few years from now it will seem like a barbaric practice like leeching. But it will be a personal choice and Covidiot's will give permission to have their bloodstream poisoned.
