The Hidden Hand: Unraveling the Rothschild and Israel

by Michael T.
McKibben (Author), Tyla W.
Gabriel (Editor), Dr. Douglas
J. Gabriel (Foreword)

4.8 ★★★★★

The Hidden Hand, a concise 72-page pamphlet, channels the revolutionary fervor of Thomas Paine's 48-page *Common Sense*, which articulated the urgent reasons for America's break from the British Empire. This work exposes five key frauds committed by the

[Click here to order

Rothschild family, the financial power behind the British Empire, as compelling reasons for America to dismantle their influence over its systems.

Unlike books that dwell on Rothschild mansions, art collections, social gossip, galas, wines, estates, or conspiracy diversions, this text focuses on historical evidence. Drawing on meticulous research, it uncovers long-suppressed proof that the Rothschild lineage is rooted not in a Semitic heritage but in Babylonian Rādhānite origins. With this context established, the author chose the format of a pamphlet, avoiding yet another retelling of the polished but false Rothschild histories.

Uncover the shocking truth behind the Rothschild dynasty in *The Hidden Hand: Unraveling the Rothschilds and Israel*. This explosive exposé reveals a millennia-old deception, tracing the family's origins not to Jewish roots but to the Babylonian Rādhānites—a merchant-banking elite with Turkic, Persian, and Khazarian ancestry. From their ancient dominance over the Silk Road to their modern control of global finance through

The City of London, the Rothschilds have orchestrated wars, revolutions, and the creation of modern Israel, all while hiding behind a fabricated Jewish identity.

Delve into their seven foundational frauds—false Jewish identity, false Palestinian Zionism, false British nobility, false financial stability, false philanthropy, false biotechnology leadership, and false religious piety. Learn how they weaponized antisemitism, manipulated evangelical theology, and founded institutions like the Y.M.C.A. and Salvation Army to perpetuate urban slavery. Backed by ancient records, DNA evidence, and modern financial insights, this book demands accountability, calling for reparations and the dismantling of their exploitative legacy. A gripping, meticulously researched narrative, *The Hidden Hand* is a must-read for those seeking to understand the shadowy forces shaping our world.

U.S. JUSTICE DEPARTMENT, PATENT OFFICE & FEDERAL JUDGES MASSIVELY FAILED TO PROTECT A **REAL AMERICAN INVENTOR—MICHAEL MCKIBBEN**

Leader Technologies' social networking invention was stolen by the British Pilgrims Society, based in The City of London. Their American operatives within the Executive Branch executed this theft.

Leader Technologies demands full compensation for its shareholders for this Fifth Amendment property confiscation. The company will allocate a significant portion of the recovered royalties to establish a Free Press Fund to support independent journalism.

President Trump can act immediately by signing Leader Technologies' First Amended Miller Act Notice to initiate the compensation process.

USURY

The merchant-banking model, rooted in fiat currency, usury, and debt slavery, began in 1755 BC with the Hammurabi Code, which codified usury as law (Law No. 100) and enforced it through state authority.

Archaeological evidence from the [Egibi and Murašû Archives](#) (ca. 7th–5th century BC) establishes that usury institutionalized debt slavery, property seizures, chronic poverty, prostitution, child sacrifice, and a polarized society of slave owners and slaves. This system gave rise to a lawyer-banker-merchant class that profited from, controlled, and enforced this economic order, a power structure that persists to the present day. Notably, these families claimed Jewish identity, despite condemnation by the Hebrew Prophets for their usury practices and their extensive intermarriage with numerous kingdoms along the Silk Road, which effectively erased any traceable Hebrew ancestry. In the modern era, the dominance of multinational ["white shoe" law firms](#) promoting privacy- and property-undermining software end-user license agreements.

The Babylonian merchant-bankers, who falsely claimed Hebrew identity, worshipped Mammon, Moloch, Ahriman, and Ba'al, among numerous demon-gods. Around 1000 BC, King Solomon constructed temples for these deities to appease his 700 wives and 300 concubines. These Babylonian bankers adopted a Hebrew identity because the kingdoms along the Silk Road distrusted rival kingdoms and placed confidence in "the people of the Book."

Fig. 5:The Hammurabi Code stele, The Louvre, created ca. 1792–1750 BC, Law No. 100: “. . .

interest for the money, as much as he has received, he shall give a note therefor, and on the day, when they settle, pay to the merchant."

ORIGIN OF MODERN MERCHANT-BANKING

The common belief that the Rothschild family founded modern merchant banking in the 1700s, around the time of the American Revolution, is incorrect.

In truth, the system of debt and usury, characterized by charging compound interest on loans, was established by pagan merchant-bankers in Babylon after 1755 B.C. This system was formalized when King Hammurabi codified it in stone, making it the law of the Babylonian Empire 3,779 years ago.

THE PROPHET EZEKIEL (CA. 7TH CENTURY B.C.): USURY IS AN ABOMINATION

Around 600 B.C., Hebrew prophets condemned usury. Ezekiel 18:13 declares, "If he has charged usury or taken interest—will he live? He will not! If he commits any of these abominations, he will surely die; his blood will be upon him." The Christian Church opposed usury for centuries until Roman Catholic popes dismantled the Knights Templar's interest-free banking system. Pre-Norman English Christian duchies and Islam also rejected usury, and the

Torah explicitly prohibits it, though the Babylonian Talmud adopts an ambiguous position.

Today, numerous church mortgages are entangled in debt to faceless banks. Usury fosters debt slavery, frequently resulting in outright slavery. Many Christian churches are stifled and compromised by this system. To banks, humans are chattel—property to be exploited as commodities, reduced to assets bought and sold for profit.

The Scriptures prescribe the Year of Jubilee as a remedy to prevent generational debt slavery, yet it is seldom practiced. Modern bankers, whose practices conflict with Christian, Jewish, and Muslim principles, serve interests that perpetuate this Babylonian pagan system of exploitation.

YOU ARE HUMAN CHATTEL—A COMMODITY TO BE EXPLOITED FOR ITS VALUE

We will bypass such horrific modern topics as child sex trafficking, organ harvesting, and fetal tissue harvesting—practices that extend this heinous value proposition to stealing body parts for profit.

Lord have mercy on the innocents.

Fig. 6: [Icon for the Feast of the Holy Innocents](#), a feast commemorating the young children who were cruelly murdered by the paranoid

and crazed killer known as Herod "the Great."

THE CITY OF LONDON

Merchant-bankers from the City of London, in conspiracy with British and American military-industrial figures, orchestrated the theft of Leader Technologies' social networking invention.

Shortly after Leader Technologies finalized its social networking design plans, their patent attorney, James P. Chandler III, a law professor at George Washington University, began sharing them with his co-conspirators. These included members of the British Pilgrims Society, such as IBM, Rothschild Asset Management, DARPA, the Highlands Group, and the DoD Office of Net Assessment, all of whom aimed to weaponize the technology.

THE ANNEXATION OF AMERICA BY THE IMPERIAL BRITISH EMPIRE

Dear Robert F. Kennedy Jr.: We believe the British Pilgrims Society, with its secret operations, is connected to the same forces responsible for the assassinations of your father and uncle, as they posed a threat to exposing this clandestine group. (JFK, April 27, 1961: warned against "secret societies," "secret oaths," and "secret proceedings.")

NEW JFK FILES

FURTHER CONFIRM CONTROL OF THE C.I.A. BY THE BRITISH PILGRIMS SOCIETY

On March 18, 2025, newly declassified JFK files from the U.S. National Archives revealed a complex network of intrigue, challenging the narrative of Lee Harvey Oswald as a lone gunman. These documents point to the involvement of the British Pilgrims Society, a secretive group founded in 1902 by Cecil Rhodes and his 'Society of the Elect.' Comprising self-styled elitist merchant-bankers from the City of London, this organization established the covert UKUSA Agreement on June 5, 1946—later known as 'Five Eyes' by 2010—with the goal of

Fig. 7—[Anonymous Patriots. \(Mar. 25, 2025\).](#) JFK Files Unmask-Chilling Truth About The Pilgrims Society.

Eyes by 2010—with the goal of controlling global propaganda, espionage, and finance. [More \(PDF\)](#)

THE SCENE OF THE CRIME

Following initial meetings in Washington, D.C., Attorney James P. Chandler III committed to protecting Leader Technologies' invention. Instead, he pursued protracted patenting schemes, betraying the company's trust by analyzing the invention under the false pretense of safeguarding it.

Fig. 8: On June 8, 2000, James P. Chandler III—IBM's outside intellectual property counsel, author of the Federal Trade Secrets Act, and newly appointed patent attorney for Leader Technologies (seated, right rear, Black man in a white shirt)—participated in exclusive invention design sessions in Columbus, Ohio, with his legal assistant Kelley Clements (seated, right rear). Co-inventors Jeffrey Lamb and Michael McKibben (standing, left rear) were also present. Unknown to Leader Technologies, their patent attorney was orchestrating the theft of their invention.

Sir Geoffrey Pattie (UK Institute of Intellectual Property; founder of SERCO) and Chandler stole Leader Technologies' source code and

transferred it to the IBM Eclipse Foundation. The IBM Eclipse Foundation then corrupted the code, embedding an encryption backdoor to transform it into a universal surveillance tool.

Repackaging Leader Technologies' social networking invention as 'open source,' they distributed it for 'free'—comparable to petty thieves stealing a sleek red sports car with a revolutionary engine, repainting it IBM blue, and fabricating stories about its origins. This act should have raised alarms in the tech industry. IBM, the world's leading patent holder and licensor, known for locking clients into costly intellectual property agreements, promoted the implausible claim that this code was royalty-free 'open source,' no questions asked—a deception that concealed their agenda to install a universal backdoor across the internet.

In 2006, the U.S. Patent Office outsourced the processing of all American patent applications to British [SERCO GROUP plc](#). This arrangement enabled British Pilgrims Society examiners to access every innovative idea submitted by American inventors during the application process, securing a lasting economic advantage through an act of betrayal.

THE MILLER ACT NOTICE

When Leader Technologies and its shareholders discovered that the Executive Branch had seized their social networking invention, they issued a demand to the President known as The First Amended Miller Act Notice.

The Miller Act addresses the government's seizure of private property without just compensation, akin to eminent domain for physical property.

Fig. 9:Michael McKibben. (Apr. 25, 2019). First Amended Miller Act Notice from Leader shareholders and officers served to the White House via Rep. Jim Jordan. Photo: Leader Technologies.

Some unscrupulous lawyers argue that the Miller Act does not apply to intellectual property, but this perspective is flawed.

The U.S. Constitution explicitly protects patents and copyrights, recognizing that intellectual property is far more vital to a thriving economy than physical assets.

Under the Miller Act, Leader Technologies was required to deliver the notice to the executive officer of the agency responsible for the seizure—in this case, then-President Donald Trump. The company assumed he was unaware of the theft at the time and did not hold him accountable.

The demand was personally delivered to President Trump by senior staffers of Rep. Jim Jordan, who represents several of Leader Technologies’ Ohio shareholders and with whom the company had met four times regarding this matter.

Recently, Mr. Trump proposed a Truth Social public offering without acknowledging Leader Technologies’ First Amended Miller Act Notice or his use of their inventions.

THE VALUE OF LEADER TECHNOLOGIES' FIRST AMENDED MILLER ACT NOTICE CLAIM IS ENORMOUS

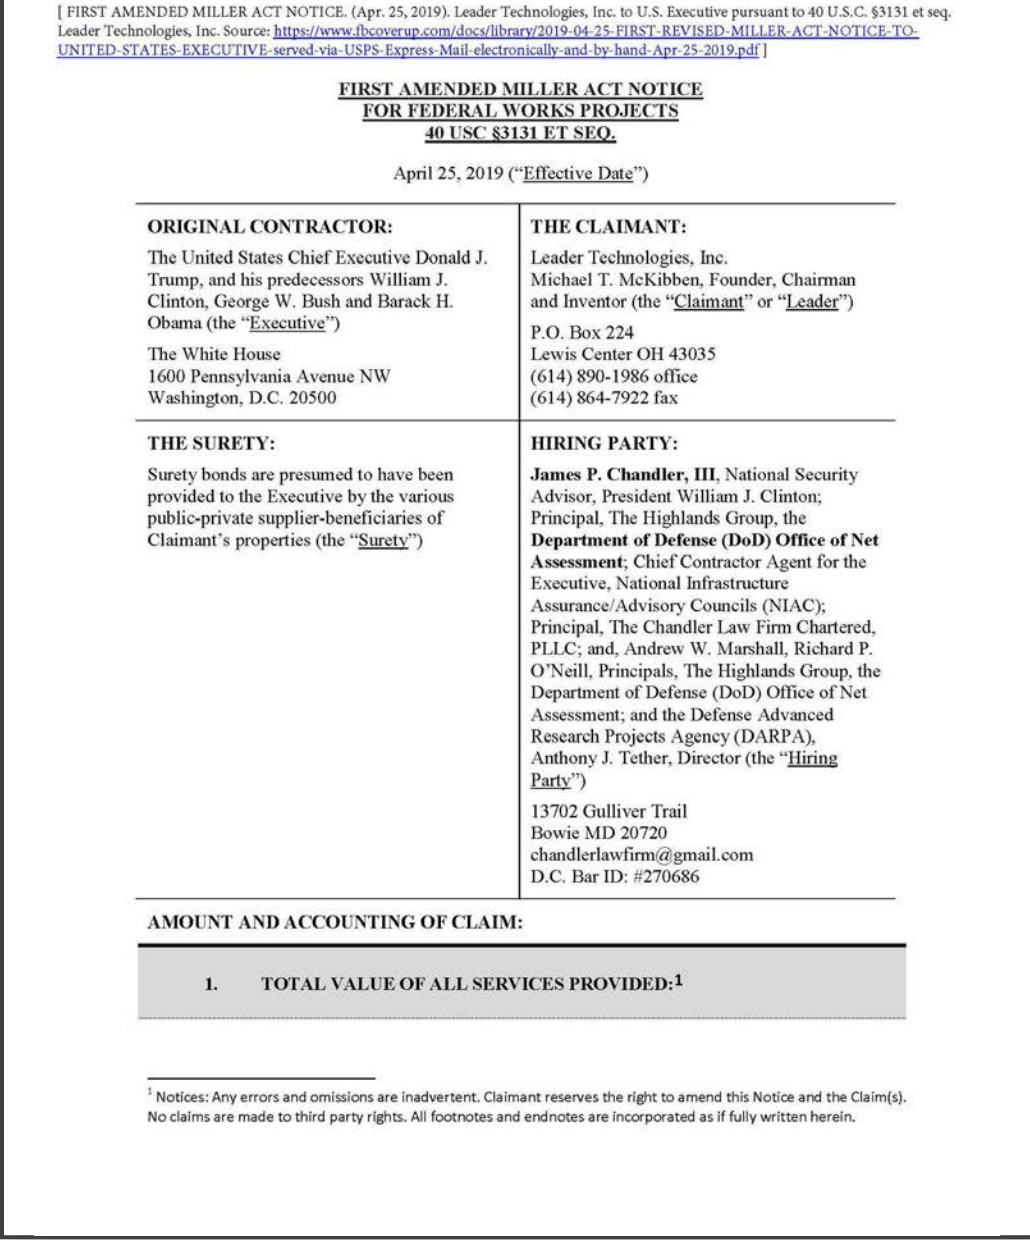

Fig. 10: [FIRST AMENDED MILLER ACT NOTICE. \(Apr. 25, 2019\).](#) Leader Technologies, Inc. to U.S. Executive pursuant to 40 U.S.C. §3131 et seq. Leader Technologies, Inc.

AMENDED MILLER ACT NOTICE CLAIM TO ENORMOUS (MANY TRILLIONS OF DOLLARS)

Leader Technologies seeks to restore free speech and address property theft in America by proposing a solution that compensates its shareholders and allocates a significant portion of the licenses owed to the company into a “free press pool” dedicated to supporting independent journalism.

The so-called free press is dominated by merchant-bankers in The City of London (Fleet Street) and their American counterparts, creating an irreconcilable conflict of interest that cannot be reformed—it must collapse due to a lack of funding. Leader Technologies’ research and Truth History disclosures provide concrete evidence of this.

The media, often referred to as the “mockingbird press,” has clear origins and evolution. Leader Technologies has traced its development, identifying the who, what, where, and when, pointing to the Empire Press Union, Fleet Street, and the controlling influence of the Pilgrims Society.

THE FREE PRESS FUND

McKibben and his shareholders have proposed that a substantial portion of the license fees owed them by the Executive Branch be channeled into “The Free Press Fund.”

This fund would distribute vouchers to every citizen, allowing each citizen to support the content and news creators of his or her choice.

Given that these funds could flow for decades—or even indefinitely—depending on the performance of the outlets and the management of the resources, a truly free press in America could emerge, unshackled from The City of London’s influence for the first time since the First Imperial Press Conference, 1909.

Leader Technologies would oversee this Free Press Fund and manage the voucher distribution process, with the sole eligibility

requirement being a person must be a verifiable U.S. citizen.

The self-proclaimed “elites” who currently dominate mainstream media would have no control over who receives these funds, effectively dismantling their grip on public discourse.

Media outlets spreading falsehoods would lose support as citizens, presumably unwilling to back liars, redirect their vouchers elsewhere. Additionally, Leader plans to allocate funds to a select group of established truth-tellers.

Can a rotten tree bear good fruit?

Can a reliable home stand on a shaky foundation?

The whole world has reaped the rewards of Leader's social networking invention without compensating them. This is a flawed basis from which to hope for positive outcomes.

Fig. 11: Put your use of social networking on a proper moral footing.

Instead, what society
gets is endless
squabbling, hearings,
and posturing over who
should regulate the
social networking giants,
all of whom have stolen
Leader's creation!

The exasperating behavior of social media companies is comparable to asking a car thief to keep a stolen vehicle polished and maintained rather than returning it to its rightful owner.

Until social networking users worldwide obtain a legal license, public discourse will remain tainted by its unethical foundations.

The core issue of intellectual property theft in social networking must be addressed; otherwise, efforts to improve public discourse are akin to rearranging deck chairs on the Titanic.

In their First Revised Miller Act Notice, Leader Technologies has proposed a global licensing solution, urging the U.S. Executive Branch to issue a worldwide blanket license for all social networking users globally.

This approach would legitimize and legalize the use of Leader's social networking invention for all users. (New users of Leader's MySQLIF™ Message Vault™ will receive the first legal licenses for social networking—see mysqlif.com for details.)

With President Trump back in office, he has the authority to unilaterally approve the Miller Act Notice, triggering a wave of ethical and moral reforms in society.

The City of London: A

roughly one-square-mile area at the heart of London, UK, established by royal charter in 1067 A.D. by William the Conqueror. Known as “The City,” it serves as the financial, news-media, legal, and commercial hub of the British Empire. It is independently governed by a Lord Mayor,

The Miller Act: The Fifth Amendment Takings Clause to the U.S. Constitution reads as follows: "Nor shall private property be taken for public use, without just compensation." It also includes membership has been limited situations in which the government permanently deprives a private to men and their male heirs. The City of London is distinct from Greater London, which has its own mayor and city government. The motto "Domine Dirige Nos" translates to "Lord Guide Us." The question Unscrupulous lawyers argue that the Miller Act principle of just remains: which lord? compensation does not apply to intellectual property, even when Apparently, the lord of the the government confiscated the property as a public work, which is "sinister" dragons (Satan), as exactly what happened with the theft of Leader Technologies' evidenced by St. George's social networking invention as a surveillance and population sword, which slays the control infrastructure. See Title USC 40, Chapter 642, Sedc. 1-3, 49 stat. 793, 794. aside.

The First Revised Miller Act Notice: The demand put to the Executive Branch to compensate inventor [Leader Technologies](#) for its confiscation of their social networking invention property pursuant to the Miller Act. This demand includes the terms for the

amount of funds to be paid out for damages and royalties. A portion of these funds will be dedicated to fund The Free Press Fund.

The Free Press Fund: The commitment made by the principal shareholder of Leader Technologies to apply a significant portion of the payout of the First Revised Miller Act Notice into a fund that will make working capital available to news outlets so that they will no longer be controlled by the Pilgrims Society in TheCityofLondon. The fund will likely distribute to a combination of citizen vouchers and a selection of several dozen outlets that have already proven themselves dedicated to truth and free speech.

The Free Press Fund

Fig. 12: On Day One, President Trump can write the check on the Leader Technologies First Revised Miller Act Notice to protect a true American inventor - Leader Technologies - and simultaneously fund the first free press fund in American history.

The Silk Road: An ancient and lucrative trade route and trading posts linking China and the Far East with the Middle East and Europe that carried silk, goods, slaves, china, textiles, perfumes, luxury goods, precious stones and metals, leather, spices, tools, artworks, medicines, gunpowder, fireworks, swords, firearms, and ideas between China and Europe.

Fig. 13: Map of Eurasia showing the trade network of the Radhanites (in blue), c. 870 AD, as reported in the account of [Ibn Khordadbeh](#) in the [Book of Roads and Kingdoms](#); other trade routes of the period are shown in purple. [Wikipedia](#).

Usury: The illegal action or practice of lending money with interest: "the ancient prohibition on usury as debt slavery."
