The United States.

To all to whom these Presents shall come, Greeting.

Whereas Samuel Hopkins of the City of Philadelphia and State of Pennsylvania hath discovered an Improvement, not known or used before, in the making of Charcoal, by means of Apparatus and Process, that is to say, in the making of Charcoal 1st by burning Charcoal in a Furnace, 2^d by dipping and boiling them when so burnt in Water, 3^d by drawing off and setting the Water, and 4th by boiling Water which then are the true Charcoal; and also in the making of Charcoal by placing the Charcoal so made as aforesaid, which gives the true Charcoal in a Furnace, separately to their Dipolator and boiling in Water, is now, leaves little Residue, and produces a great quantity of Oil: These are therefore in pursuance of the Act, entitled "An Act to promote the Progress of useful Arts", to grant to said Hopkins, his heirs, Administrators and Assigns, for the Term of fourteen Years, the sole and exclusive Right and Liberty of using and having the said Discovery of burning the new Charcoal previous to their being dipolated and boiled in Water, according to the true Invention and the said Act aforesaid. In Testimony whereof, I have caused these Letters to be made public, and the Seal of the United States to be hereunto in my hand at the City of New York this thirty first Day of July in the Year of our Lord one thousand seven hundred & Ninety.

G. Washington

of New York, July 31st 1790.

I do hereby certify that the foregoing Letters Patent were delivered to me in pursuance of the Act, entitled "An Act to promote the Progress of useful Arts", that I examined the same, and find them conformable to the said Act.

Edm. Randolph Attorney General for the United States.

Call for Nominations

National Medal of Technology and Innovation

National Medal of Technology and Innovation is the highest honor for technological achievement and innovation. It is presented annually by the President of the United States.

The medal is awarded to individuals, companies or divisions of companies for their outstanding contributions to the nation's economic, environmental, social well-being through the development and commercialization of technological products, processes, concepts, technological innovation, and strengthening the nation's technological workforce.

You can nominate for the National Medal of Technology and Innovation by submitting the nomination form and six letters of support at www.uspto.gov/nmti. Nominations are due by March 1, 2013.

Memorandum dated Dec. 3, 1993, from D. C. Moultrie to "Code 3008.2 (Mr. Miles), re NRL Formal Report #9538."

Primary Examiner—Edward P. Westin
 Assistant Examiner—Steven L. Nichols
 Attorney, Agent, or Firm—Thomas E. McDonnell; Edward P. Miles

[57] ABSTRACT

A satellite-borne system for the detection of near earth objects. The system periodically captures two images of the celestial sphere about the earth using a pair of linear arrays of optical detectors oriented so that the detectors image lines on the celestial sphere that are separated at each pixel in azimuth by the same angle. The position of the linear detectors is varied for each orbit of the earth by the satellite such that the entire celestial sphere can be imaged. The images produced by the two detector arrays are temporarily stored in memory until they can be processed using frame difference signal processing techniques. The results from the frame difference signal processing are transmitted to a ground station for further processing. The processing on the ground can include object classification, orbit tracking (using a time sequence of differenced frames), and earth collision determination and warning.
