## History

The company was founded, as Escher Wyss & Cie., in 1805 by Hans Caspar Escher and Salomon von Wyss. Originally a textile spinning company, the two expanded the business to include a machine shop that manufactured textile machinery, water wheels, water turbines, power transmission equipment, and starting in 1835, ships, including boilers and steam engines.<sup>[1]</sup>

After 1860, under the direction of Hans Zoelly, the company concentrated on hydraulic systems, steam engines and cooling systems. Between 1904 and 1929 steam turbines were produced for thermal power plants, ships and locomotives. The company also manufactured the hydraulic systems of hydroelectric plants. The company remained in existence until it was taken over in 1969 by Sulzer AG,<sup>[1]</sup> now inside of the group Andritz AG.

## Notable products

- A design of naphtha launches (1890)<sup>[2]</sup>
- The twin Lake Zürich paddle steamers Stadt Zürich (1909) and Stadt Rapperswil (1914) built for the Dampfbootgesellschaft,<sup>[3]</sup> both listed in the Swiss inventory of cultural property of national and regional significance as *Class A* objects.<sup>[4]</sup>
- Two Lake Lucerne paddle steamers Unterwalden and Gallia (1902/1913)
- Propellers for the Hispano Aviación HA-1112
