L. B. WOOLFOLK.

CINCINNATI:  
GEORGE E. STEVENS,  
39 W. Fourth St.  
1890.

THIS work is divided into three parts:-

PART I gives a History of the Rise of the London Money Power.

PART II proves that this Imperialism of Capital,- the London Money Power,-is foretold in prophecy, under the symbol of the Great Red Dragon.

PART III gives the Remedy for the industrial evils that afflict our country.

There are many persons, perhaps, who will be deeply interested in Part I, and Part III, who will feel but little interest in the prophetic portion of the work. The work is so arranged that all such persons can skip Part II, and pass from Part I to Part III, without any break in the connection of thought: though they will miss the most striking delineations of the character and the activities of the Money Power.

On the other hand, those who are interested in the prophetic aspect of the work, will find its structure in proper logical arrangement as a prophetic exposition; since it is necessary to present the history of the Money Power, before the symbols of prophecy can be applied to it.

This work is the outgrowth of a life of thought, largely directed to the study of Prophecy, History, and Political Economy. Indeed, the work is the product of original thought. Its historical portion is the history of an Imperialism whose existence has been hitherto unrecognized. Its remedy is based upon principles of Political Economy that have never before been presented to the world. Its Prophetic Exposition is part of a System of Prophetic Interpretation that is entirely new. The Author may therefore claim the indulgence due to a pioneer, whose movement is over a pathway unsmoothed by the progress of earlier thought.

As no history of the London Money Power has ever been written, the Author has been under the necessity of gathering his facts from newspaper items, and from the statements of individuals whose reliability is above question. His store of facts has been constantly increasing down to the present time. Some important facts he has learned since the publication of this work began; other facts he learned too late for them to appear in the present edition. No doubt, in every community facts are known which illustrate the course of the Money Power in this country. These facts will doubtless soon be published; and it is hoped that ere long a full and connected history of the Rise of the Money Power may be given to the world.

Imperialism of Capital has grown until it is now the mightiest power that has ever existed on the earth. In comparison, all other empires sink into comparative insignificance. This titanic power is the Imperialism of Capital, which I call, by way of distinction, the Money Power.

## PART I

# HISTORY OF THE RISE OF THE LONDON MONEY POWER.

---

## CHAPTER I.

### RISE OF THE MONEY POWER—FIRST ERA.

#### I. INTRODUCTION.

AN Imperialism of Capital has grown up within the last two centuries from small beginnings, until it is now the mightiest power that has ever existed on the earth. It is an Imperialism mightier than the empire of the Cæsars, grander than the empire of Napoleon in the hour of his highest glory. In comparison with it all other empires sink into comparative insignificance. This titanic power is the Imperialism of Capital, which I call, by way of distinction, the Money Power.

#### 1ST. THE MONEY POWER DEFINED.

I do not mean by the Money Power to include any persons possessed of property, who are engaged in independent business enterprise. I do not mean any American business men, or business Companies engaged in independent business enterprise, whether they be farmers, merchants, manufacturers, bankers, miners, builders, or persons engaged in any department of business enterprise.

capitalists—Jews almost to a man—who have their headquarters in the Money Quarter of London, in Threadneedle street, Lombard, and other streets in that vicinity, where bankers have their habitat. These Jew capitalists have succeeded in centralizing in their own hands the industry and commerce of the earth.—They own almost all the debts of the world,—the debts of nations, states, counties, municipalities, corporations and individuals,—amounting in the aggregate, it is estimated, to seventy-five billion dollars, on which they are annually receiving about four billion dollars of interest.—They own the manufactories, the shipping, and the commerce of Great Britain, and most of the manufactures, shipping and commerce of the whole world.—They have attained control of the industry and trade of the whole earth; and are rapidly centralizing all business in their own hands. They hold possession of all the great lines of trade and business of all kinds, and they regulate all prices by their own arbitrary methods.—These Jew Money Kings have established a grand Imperialism of industry, commerce and wealth, which is thoroughly organized, and rules in the sphere of industry and trade with autocratic sway.

In our age, CAPITAL IS KING. This Money Power of the Money Quarter of London is the only grand preëminent Imperialism existing on the earth. Monarchs severally rule their own dominions, and no one of them has preëminent power. The Imperialism of Capital, in our time, stretches the arms of its power over the whole earth: it alone sways the nations with preëminent rule. It buys all the products of the earth: it fixes all prices of all commodities without regard to the law of supply and de-

dustry and trade, and none can resist it. It is rapidly progressing toward its ultimate aim, of possessing itself of all the world's wealth and all the world's property. If

## DISCOVERY OF ITS EXISTENCE.

9

things remain as they are, these Jew Money Kings will, at no distant day, have achieved their aim, and will own the earth in fee simple.

"The Author was as ignorant of the Money Power the rest of the world outside of the ring, until visiting England many years ago, he became acquainted with the existence of this grand centralization of Capital in England, and was given a pamphlet intended for private circulation."

## 2ND. DISCOVERY OF EXISTENCE OF MONEY POWER.

The world will be surprised at the statement that such a grand Imperialism of Capital exists. For it has grown up so silently, and has veiled its operations in such secrecy, that its very existence is unsuspected. The Author was as ignorant of the Money Power as all the rest of the world outside of the ring, until, when visiting England many years ago, he, through a combination of circumstances unnecessary to mention here, became acquainted with the existence of this grand centralization of Capital in England, and was given a pamphlet that was intended for private circulation. This pamphlet, and the boastful statements of the Englishman who gave it, imparted to the Author information which is carefully kept from the general public. Quotations will be made from this pamphlet later on in this work. No confidence is thereby violated and its statements ought to be known to the world.

Author has watched its progress for over twenty years. As events occurred, his mind, strongly magnetized, as it were, by this subject, seized upon and gathered to itself all facts bearing upon the question. A newspaper item, meaningless to others, was to him an important historical fact in the rise and growth of the Money Power. He has thus, point by point, gathered the materials for the sketch which here follows.

Before quoting from the pamphlet just mentioned, it will be better, in order to give consecutiveness to the subject, to first trace the rise of the Money Power; and then to make quotations, to show that it was already a grand Imperialism in the decade extending from 1860 to 1870.

"In 1764, the British East India Company was the grandest and richest corporation in the world. It was the only corporation which ruled a territorial empire."

## 12

## RISE OF THE MONEY POWER.

Britain was slow to engage in it, and during the Seventeenth Century made only feeble efforts, productive of little result. In the early part of the Eighteenth Century, the British East India Company was reorganized and put in successful operation. In return for a loan of fifteen million dollars to the British government, a large sum for those days, it received a charter, giving to it the exclusive right to trade with all countries of the Indian and Pacific Oceans, between Cape Horn and Cape Good Hope.

From this time the East India Company made rapid growth in prosperity and power.

Great Britain and her commercial rivals on the continent, the bull-dog pluck of the British sailors, and their superior nautical skill gave to British vessels so great an advantage in naval combats as secured to Britain a maritime supremacy. The British East India Company prospered, not only by the usual gains of traffic, but also by taking possession of the trading stations of its commercial rivals from which they were dispossessed by conquest.

In the great Seven Years' War, continuing from 1757 to 1764, Great Britain dispossessed France of all her colonial possessions. In India, at the same time, through the genius and energy of Clive, the British East India Company laid the foundation of its imperial greatness. Historical authorities date the rise of the East India Company to imperial power at the victory of Plassy, 1757 A. D. In 1764, it was an empire exercising imperial sway in Bengal over a territory containing a population of forty millions, and yielding larger revenues than those of the Austrian empire, at that time the greatest European power.

In 1764, the British East India Company was the grandest and richest corporation in the world. It was the only corporation which ruled a territorial empire. It was enriched by traffic, by the extension of its trade through the

"Thus it came to pass that the greater part of the stock of the East India Company, and of the other companies afterwards organized out of the dividends of that great company, fell into the hands of the Jus. The Jews became the great Money Kings of the world."

## RISE OF THE EAST INDIA COMPANY.

13

conquest of the trading stations of its Continental rivals, and by the wholesale plunder of India.

It had been from the first the best investment of capital to be found in the British Islands. Its stock was eagerly taken by all who had the means. The mercantile class

merchants usually have little more capital than they need for their regular business. The British Landed Aristocracy had large incomes from their estates; and being under a necessity of seeking the best investments, in order to portion their younger children, they made large investments in the East India Company. But the great Capitalists of that age were the Jews. They were the money holders. They subscribed largely to the stock; and as, in each generation, the stock of the Aristocracy was sold to portion younger children, the Jews, always economical, always full of money, and always in search of the best investments, bought the stock thrown upon the market. Thus it came to pass that the greater part of the stock of the East India Company, and of the other companies afterwards organized out of the dividends of that great company, fell into the hands of the Jews. The Jews became the great Money Kings of the world.

Under the impulse of Jew exactions, the career of the East India Company in India was a continued series of trickery, wrong, exaction, theft, robbery and murder. In the Eighteenth Century, the Mogul empire was in the last stages of decay; and the East India Company, in its dealings with the native states and Princes of India, constantly shifted its ground as expediency required, sometimes treating them as independent states, and sometimes, as dependencies of the Mogul empire. It hired its soldiers to one native prince, to enable him to conquer another: it sold its favors on every side; and when the opportunity came, it devoured the treasures and the territory of friends and foes

"It was the first example in the history of the world of a trading corporation becoming an imperial power; and its imperial rule was marked by the rapacity, chicane and fraud that characterizes a great corporation in the soulless and conscienceless pursuit of gain."

## 14

## RISE OF THE MONEY POWER.

alike. History presents no career of conquest, in which fraud, deceit and rapine were so blended as in the conquest of India by the East India Company. It was the first example in the history of the world of a trading corporation becoming an imperial power; and its imperial rule was marked by the rapacity, chicane and fraud that characterizes a great corporation in the soulless and conscienceless pursuit of gain.

From 1764, the East India Company had control of the grand trade between the Temperate zone and the Tropics. It continued its conquests in India until, in 1857, the date of the Sepoy mutiny, it ruled almost the whole peninsula. The Money Kings who controlled it, possessed an empire compared with which the possessions of the Phoenicians and Carthaginians, and all their predecessors were as nothing, and they attained a domination over industry and trade without a parallel in the annals of the world.

---

In 1774, Watt perfected the steam engine; The conditions of the time threw steam manufactures entirely into the hands of the London Money Power. The Money Kings they organized new companies, which built vessels, new warehouses, & established trading stations all over the earth.

## CHAPTER II.

RISE OF THE MONEY POWER, CONTINUED:  
SECOND ERA.

The Money Power of the World entered upon a new and grander era of development when steam was applied to manufactures. In 1774, Watt perfected the steam engine; and this new servant of man, mightier than the Genii of oriental fable, was at once set at work propelling manufactures. The power loom, the spinning Jenny and the cotton gin were soon afterward invented, and gave a great impulse to steam manufacturing industry.

The conditions of the time threw steam manufactures entirely into the hands of the London Money Power. Great

## STEAM MANUFACTURES.

15

Britain was the only country in Europe which had coal and iron for steam purposes. The capitalists of the East India Company were the only people in the world with capital to engage in the new industry; for the great trading companies of other countries had been broken down by British conquests. Enriched by the trade of the Orient and the Tropics, these London capitalists at once seized the opportunity events offered them, and embarked energetically in steam manufactures.

The East India Company, as such, did not engage in these manufactures. All the stockholders would not wish to invest in them: so large a corporation would be unwieldy; and the immensity of the monopoly might excite

to operate through smaller corporations. A few capitalists might hold the stock of a great number of them without exciting jealousy; and their management would be quiet and easy. The different corporations were like the regiments of an army: it was easy to form them into brigades, and divisions, and army corps, so as to give them the compact solidity of a grand military organization. It had the flexibility of individual enterprise, and the solidity of a despotism. The Money Kings adopted the policy of single corporate companies for each special enterprise.

They built manufactories of all kinds: they started iron mills, woolen mills, cotton mills. Manufactures of all kinds sprung up on every side. The Money Kings organized new joint stock corporations which built mills and manufactories: new companies which operated mines of coal and iron: and, as commerce wonderfully expanded through manufactures wrought by steam power, they organized new companies, which built vessels to plow the waters of every ocean, and built new warehouses, and established new trading stations all over the earth.

"The grand Money Kings had such advantages in their immense capital and in their perfect organization, that in commercial crises, often originated, and always manipulated by them, they managed systematically to break down rival companies..."

Temperate zone had not sufficient cheap products suited to tropical demand, to offer in exchange for tropical productions. Steam manufactures opened up a new commercial era. They greatly stimulated tropical production, by offering manufactures in those markets. They also greatly stimulated industry in the Temperate zone. In all the countries of the Temperate zone, the demand for the manufactures of Britain was far beyond the ability

to pay for them with exports.

The first effect of this state of things was a wave of excitement that swept over Great Britain. An industrial boom was started. Everybody who had money invested in the stock of manufacturing companies, shipping companies, trading companies. In companies for steam manufactures, the Money Kings took care to have the majority of stock: outside companies they knew they could devour at their leisure. The grand Money Kings had such advantages in their immense capital and in their perfect organization, that in commercial crises, often originated, and always manipulated by them, they managed systematically to break down rival companies, and buy them out, and to rob and plunder the minority stockholders; until, in the end, these organized capitalists got into their own hands and very cheap, all, or the greater part of the stock of the various companies, manufacturing, mercantile and shipping, that originated in steam manufactures. They thus reduced to a system and a science the art of crushing rival companies, and freezing out minority stockholders. Their whole career was a systematic course of treachery, fraud and plunder, without a parallel in history. They advanced step by step, always causing a boom in every new enterprise that enlisted much outside capital, and always managing to operate seasons of business disaster, in which they lost a few hundred thousands by falling prices, a loss which they were abundantly able to stand,

"Dealing in futures, started on a grand scale, a system for the purpose of enabling large capitalists to force stocks up or down as they choose, without regard to the value-the most satanic engine of trickery, fraud & oppression ever devised to enable the strong to plunder weak."

holders.

**Dealing in futures** in Boards of Trade, was then started on a grand scale, a system originated for the purpose of enabling large capitalists to force stocks up or down as they choose, by dint of capital, without any regard to the actual value—the most satanic engine of trickery, fraud and oppression ever devised to enable the strong to plunder the weak. It is the drag net with which the Money Kings destroy multitudes of men of small means, as the fisherman takes fish in his seine. They are fishermen: the rest of mankind are their prey. They are always seeking after spoil. They are always dragging their net for the destruction of the unwary.

But aside from this plunder of the weak and the trusting, the regular profits of the new age of industry were very large. In every country of the Temperate zone, the demand for British manufactures was much greater than could be paid for by exports. And the difference in the balance of trade was always systematically arranged by lending money on mortgage for that amount, or by spending the amount of the deficit in starting some business enterprise in that country. In this way, the adverse balance of trade was not felt by the country falling behind. It bought all it wanted, and the adverse balance of trade actually made times better; for it caused the profits of the Money Kings to be invested in the country, stimulating business into activity. It only had the disadvantage that the business investment did not belong to the nation, but to the Money Kings: and the prosperity it caused was not national prosperity, but was the bloated gains of the Money Kings.

**This has been the regular method of the Money Kings for the last hundred years.** Starting new manufactures,

"The rise of the house of Rothschild is memorable as the first grand combination of the Jews in a syndicate, for the transaction of a vast business in which all their capital might be combined... That house is probably at the head of the Jew Money Power of the world."

## 18

## RISE OF THE MONEY POWER.

new shipping companies, new trading companies: getting in all the outside capital possible, and then freezing out minority stockholders, and throttling outside corporations: getting all the nations in debt to them, and making parasite investments to the amount of the deficit of the balance of trade: putting in the profits derived from the East India Company, first: and then, not only putting in its profits, but continually reinvesting all the profits of all their enterprises in the country; until their investments, accumulating like a rolling ball of snow, at last become an avalanche to bury beneath its weight the prosperity of the world.

## THE ROTHSCHILD SYNDICATE.

Even in the beginning of this second era of the growth of the Money Power, it realized immense profits—profits so great as enabled the Money Kings to loan the money necessary on both sides to sustain the immense armaments of the wars of the French revolution. They let the British government and the powers warring against France have all the money they required; and they supplied to Napoleon and his allies the loans necessary for his campaigns.

At that time, for the convenience of the Money Kings, the great house of Rothschild was established. The rise of the house of Rothschild has always been shrouded in the mystery that veils all the operations of the Money Power. The house took immense contracts on both sides; and made to both sides immense loans. Where the money

planation given of it is wholly inadequate to account for the sudden rise of the house of Rothschild into such enormous wealth. The only way to account for it is to suppose that the Rothschild family was chosen by the Jew Money Kings as the head and fiscal agency of a grand

#### THE ROTHSCHILD SYNDICATE.

19

Jewish syndicate formed at that time, to concentrate under one management the money of the Jew capitalists.

It was a great convenience, and a great source of power. The Rothschilds were chosen, perhaps, in part, on account of their superior business qualifications; and perhaps, in part, because there were three brothers, who could be heads of separate banking houses in London, and Paris and Vienna. By such a syndicate the Jews could lend money and take army contracts on both sides. And if, in the end, one side should achieve a decided triumph, the Rothschild on the winning side could save the Rothschild on the losing side, and thus the money of the Jews would be safe in any event. It was a grand stroke of Jewish skill and policy, the organization of this grand syndicate; but it was the first instance of the organization of a syndicate in the world; and it was never known as such; but, with the usual readiness of mankind to believe in the sudden growth of vast fortunes from nothing, the world accepted the rise of the house of Rothschild as an individual fortune, and not a syndicate. In our time, when combination of capital into syndicates is common, the house would be recognized at once as the head of a syndicate. The rise of the house of Rothschild is memorable as the first grand combination of the Jews in a syndicate, for the transaction of a vast business in which all

came the head of the Jew Money Kings, and have ever since been the head of the Jews, acting as a syndicate. That house is probably at the head of the Jew Money Power of the world.

When Napoleon fell, there remained but one grand imperialism in the world,—the Imperialism of Capital,—the Jew Money Power, centered in the Money Quarter of London. Since the fall of Napoleon, the nations of Europe have been maintaining war military establishments

"Besides these national debts, are the loans they have made to states, and counties, and municipalities, and corporations and individuals, amounting in the aggregate, as it is estimated, to over fifty billion dollars more."

in time of peace, at an expense far beyond their revenues. The London Money Kings have loaned them the money to make up the annual deficit. They have invested in national debts alone about twenty-six billion dollars. Besides these national debts, are the loans they have made to states, and counties, and municipalities, and corporations and individuals, amounting in the aggregate, as it is estimated, to over fifty billion dollars more.

And then, there are the immense amounts of their own investments in all the countries of the globe. The wealth of the Money Power is simply beyond calculation. It can not amount to less than \$160,000,000,000. It is probably nearer two hundred billions.

---

There was an earlier syndicate...

"They finally found the East India Company a burden, and an embarrassment. They derived the same advantage from the protection of the British government as from the Company, and without the cost and trouble."

## CHAPTER III.

### RISE OF THE MONEY POWER, CONTINUED: THIRD ERA.

The Money Power entered upon the third era of its growth with the application of steam to transportation in railroads and steamships.

The Railroad Era began about 1830; but for twenty years after steam was applied to railroads, industry languished throughout all countries of the Temperate zone, for want of sufficient money to transact the business of the world. But little progress was made in applying steam to transportation, until the mines of California first, and then the mines of Australia, and the Rocky Mountains, and old and new mines opened in Mexico and South America gave hundreds of millions of dollars to the circulating medium of the world. In 1850, the age of railroad and steamship building began on a large scale. Then

EAST INDIA COMPANY SUPERSEDED.

21

the Money Power was fully embarked in this third era of its development.

**The Supremacy of the Money Power over Industry**, beginning with the application of steam to manufactures, was continued on a still higher plane of power, from 1850 and onward.

The new companies organized out of the dividends of the East India Company soon threw the old parent company into the shade by their gigantic enterprises. The

vinced the Money Kings that the territorial sovereignty of the East India Company was a mistake. They found by experience that it was better for them to monopolize industry, commerce and wealth under the protection of a government controlled by them, than to exercise territorial sovereignty themselves. These new corporations began to trade with India, as with the rest of the world.

The East India Company, having no manufactures, was eclipsed as a trading corporation by these new rivals; and it soon came to restrict itself more and more to its territorial sovereignty. The Money Kings soon found that the new corporations were much better instruments for traffic, and they eventually made the East India Company merely their shield in India, behind whose protection they carried on their traffic. That company governed India entirely in their interest; for the same stockholders operated the East India Company and the new corporations born of the new age of steam industry.

They finally found the East India Company a burden, and an embarrassment. They derived the same advantage from the protection of the British government as from the Company, and without the cost and trouble. And moreover, bonuses and other advantages given them by the British government were safe and sure, while advantages and franchises given them by the East India

Company might be subsequently annulled as unauthorized and fraudulent. To get rid of the expense and danger of maintaining the sovereignty of India, they, at the time of the Sepoy mutiny, influenced the British government to assume the government of India :—and the East India Company, having served its end in giving birth to those new corporations born of its profits, passed away. The spider's brood, true to their nature, devoured their dam.

"They started new enterprises owned by themselves in all the countries of the globe :—"

**Operations** in the new age of steam transportation. They constantly invested their gains in more manufactures, more ships, and more ware-houses, all over the earth. And when they made more profits than were needed for such investments—for their profits grew faster than the wants of commerce—they invested their surplus profits in various countries, in lands, in city houses, in building new railroads; and in buying vast bodies of lands in the Tropics, on which they opened up immense plantations, for the growth of coffee, tea, indigo, rice, opium, spices, and all tropical productions.

They started new enterprises owned by themselves in all the countries of the globe:—tea plantations in China; coffee plantations in Java and Ceylon; sheep ranches in Australia and South Africa and South America; sugar plantations in the West Indies and the Sandwich Islands; gold and silver mines in California, the Rocky Mountains, Australia, Mexico, and South America; diamond mines in India, and South Africa and Brazil; ruby mines in Burmah; lumber mills in Canada, the United States, Norway, Sweden and Poland; city buildings in all countries; and railroads all over the world. These, and many other enterprises employed the boundless capital of the London Money Kings.

**City Buildings** have been a favorite investment with them in countries of the Temperate zone. They derive

yield a high profit on the investment; and the Money Kings could thus put up rents in other countries, and increase the cost of living. This last point is an essential part of their industrial system.

In order to maintain the manufacturing supremacy of Great Britain, it is necessary that the cost of living should be as cheap there as in other countries. The price of food is necessarily higher in England than in other countries; and this has to be counterbalanced by cheaper rents. Rents are very low in England. By owning many buildings in foreign countries, the Money Kings are able to start a prevailing high standard of rents; which increases their profit on their investment, and raises the cost of living, till it is as high or higher, in other countries, than in England. Furthermore, these high rents increase the value of property, and start foreign capital into real estate speculation, leaving to the Money Kings the safe field of productive industry. — They are wonderfully shrewd, and understand perfectly all the points that benefit their interest, and injure the interest of the rest of the world.

"In the age of railroads, these Jew capitalists grew exceeding rich. At the beginning of the Era of Railroad Building, in 1850, they have taken special care, during the whole era, to make the world continually poorer by constantly increasing its debt to them."

countries of the Temperate zone. The ownership of them not only yields a large return upon the investment, but it gives to the Money Kings entire control of the internal traffic of the countries whose railroads they own. It also enables them to build up cities at points on the railroads known beforehand to themselves; so that, by getting possession of the land around the site, they make hundreds of millions of dollars in speculations in town lots.

With incomes derived from all these various sources, and constantly reinvested—with the whole world tributary to them—it is not wonderful that they have grown so rich. Having taken possession of all the lines of business in

## 24

### RISE OF THE MONEY POWER.

which money is to be made, it is no wonder that, for forty years, they have been the only people in the world who had a monied capital. No wonder that, continually impoverished by them, the nations of the earth have never had money to build railroads, or water works, or gas works, or any public buildings, but had always to issue bonds and sell them in London, to get money for all public improvements.

In the age of railroads, these Jew capitalists grew exceeding rich. At the beginning of the Era of Railroad Building, in 1850, no country had any capital, these London Money Kings excepted. The Money Kings alone of all the world had money; and they have taken special care, during the whole era, to make the world continually poorer by constantly increasing its debt to them.

"The Fourth Era of the rise of this terrible Imperialism began in 1864. This era will end, if things go on as they are, in the Money Power taking possession of all business, and owning all the property of the earth."

## CHAPTER IV.

### FOURTH ERA.—DEVOURINGS OF MONEY POWER, SINCE 1864:

#### I. AGGRANDIZEMENT OF MONEY POWER: GENERAL VIEW.

The Money Power has been continually widening its operations in each successive era of its rise. The first era was the era of the East India Company; and of commerce based upon tropical products, and the exchange of those products for the productions and the specie of the countries of the Temperate zone. In the second era, the Money Power added steam manufactures to the trade with the Tropics, which it previously held. In the third era of its rise, the Money Power added to its previous sources of

COILING ABOUT ALL INDUSTRY.

25

wealth the vast power derived from the possession of steam transportation, in railroads and steamships.

The Fourth Era of the rise of this terrible Imperialism began in 1864. In this era, armed with the immense capital derived from all its sources of wealth, the Money Power of the World entered upon its vast investments in mortgages in real estate; and began its career of monopoliz-

of trade. This era will end, if things go on as they are, in the Money Power taking possession of all business, and owning all the property of the earth.

Since 1864, the London Jew Money Kings have been continuing their operations on the basis of boundless capital. They have, in this era, vastly extended their operations, and widened the range of their monopolies. Their command of capital is so vast, that they dominate the whole sphere of industry and trade with absolute sway. As against individual enterprises, their power is irresistible.

Like a Great Serpent, the London Money Power is, in our time, enveloping the industry of the earth in the coils of its capital, and crushing all competitors in its folds and devouring them. And it has grown so great, and its monopoly of business is so enormous, that its annual income,—from interest on loans—from rents of houses and farms—from profits of business,—is so vast, that it is able to take possession of a whole line of business at once, destroying all competitors. Woe to the men who are operating in a line of business which these Money Kings desire to monopolize: they at once envelop the feeble rivals in the folds of their capital, and crush and devour them. They now have sufficient capital to seize upon and monopolize all the business of the earth. And they are rapidly doing it.

"They can no longer find adequate investment for their constantly increasing income,-in extending their grand industrial enterprises-in loans... They can only find investment,-in building cities-in buying up city property--in purchasing and improving immense bodies of wild lands"

## DEVOURINGS IN INDIA.

27

them into growth. When full grown, they, fortunately for the animal, strive to leave the body on which they have preyed. But it is not so with the investments of the Money Kings. They keep planting more and more of their eggs in the body of all the nations; and, when the eggs hatch into parasite enterprises, the parasite enterprises continue to prey upon the country, until at last they will sap its strength, and devour its life.

**These parasite enterprises** of the London Money Kings are like the fly eggs deposited in the body of a caterpillar. If no egg is deposited, the caterpillar spins its cocoon, and at the proper time emerges as a butterfly. But when the fatal egg is deposited, the caterpillar lives on and spins its cocoon, as if in perfect health; but the parasite develops, and continues its work of destruction, and the caterpillar, instead of emerging from its chrysalis state, dies in its cocoon with its vitals utterly devoured.—This is what the Money Kings are now doing for all the nations. They are laying parasite eggs of capital in the body of every nation. Either the parasite must be gotten rid of, or the nations will perish.

26

## RISE OF THE MONEY POWER.

## PARASITE INVESTMENTS.

Indeed, their capital is now so vast that business operations will not afford it adequate employment. They can no longer find adequate investment for their constantly

enterprises—in loans to nations, states, and municipalities,—in building ships and warehouses and railroads. They can only find investment,—in building cities—in buying up city property—in purchasing and improving immense bodies of wild lands—in laying and foreclosing mortgages upon improved farms—and in buying up breweries, and flour mills, and lumber mills, and various business interests, all over the earth. They own almost all those business interests now: they will soon own the rest.

These parasite investments of the Money Kings are like the fly eggs laid in the nose of the sheep: it is an addition to the amount of bioplasm in the sheep, but, instead of being sheep bioplasm, it is foreign. The eggs will hatch; and instead of the new life adding to the health and vigor of the sheep, it consumes its life. The worms that breed from the eggs burrow into the head, and if they can not be gotten rid of, the sure result is the death of the sheep.—In the same way, the ox fly lays eggs in the back of the ox, that breed worms; which, in their development, make the ox as lively as the investments of the Money Power make the nation where its investments are made. But instead of helping the ox, they feed upon his life: they fever him: and if there are so many of these “wolves,” as farmers call them, that the ox cannot bear the frenzy caused by their development, the ox will die.

But all these parasites, when full grown, do not continue to prey upon the animal whose life tissues have nursed

"The Money Power of the World was nursed into imperial grandeur by the trade and wealth of India. India was its primal seat of dominion. In India, its power has always been uncontrolled and absolute... and in India we can best perceive the ultimate outcome of its policy."

## II. DEVOURINGS OF THE MONEY POWER IN INDIA.

The Money Power of the World was nursed into imperial grandeur by the trade and wealth of India. India was its primal seat of dominion. In India, its power has always been uncontrolled and absolute. There, it has been allowed to work its will more thoroughly than anywhere else; and in India we can best perceive the ultimate outcome of its policy.

### 1ST. PLUNDER OF HINDOO POTENTATES.

Until the middle of the Eighteenth Century, the East India Company was only a mercantile corporation, hav-

28

#### RISE OF THE MONEY POWER.

ing a few trading stations in India, and deriving its revenues from traffic. Rising into political power through the courage and genius of Clive, it began its career as devourer, in India, by extorting the hoarded wealth of one Hindoo potentate after another, as the price of its aid or its tolerance; and as the native rulers were successively reduced to bankruptcy and impotence in the crushing coil of the East India Company, that corporation gradually substituted its own administration for that of the native governments. In every advance, it showed the subtlety, the crawling insidious guile of the serpent. It enveloped state after state in its coil, and crushed the native governments so relentlessly, and yet so quietly, that when it finally devoured the territory of a fallen potentate, the act attracted but little attention. The East India Company continued its course of quiet gradual appropriation of ter-

## 2ND. MONOPOLY OF INDUSTRY.

In the earlier period of its power, the East India Company took possession of all the trade and industry of the territories under its sway. But after the Age of Steam began, and the great British capitalists formed new joint stock corporations through which to carry on the grand industries arising out of steam manufactures, the East India Company lost its importance as a trading corporation. As we have seen, it finally restricted itself to its territorial sovereignty, and gave up to the new corporations the trade of India, giving them every advantage under its administration.

Under this policy, the new corporations of the London Money Kings, advancing step by step, took possession of the business industries of India.

They first took possession of the internal traffic and the foreign commerce of the country. They bought the native

## STARVATION OF HINDOO POPULATION.

29

products at prices which yielded the wretched Hindoo producers a mere subsistence; and they sold in the India markets native products and foreign merchandise at the highest prices it was possible to extort. They made all the profits; and the entire population of India, except the officers and the agents of the Money Kings, was reduced to utter penury.

They continued their encroachments, and gradually got the industry of the country completely under their control. They superseded the old hand manufactures of the country by manufactures wrought by steam, of which these

And they broke down the old system of transportation, and substituted it by railroads owned by themselves.

For a long time, the Money Kings raised opium, and indigo, and cotton, and rice and other India products, for their commerce, upon lands owned by Hindoos. They made their profit by putting down prices to the lowest point that would yield subsistence to the Hindoo laborer. They thus kept the Hindoo population on the verge of starvation; so that, during the last forty years, frequent famines have carried off millions of the population.

We know from the Irish famines, that a modern famine is not a dearth of food, so much as the lack of means to buy bread. During one of the famines in Ireland, an American vessel entering the harbor of Cork with provisions sent by American charity to the starving Irish, met two vessels sailing out of the harbor laden with food sent from Ireland to a foreign market. The millions of Hindoos who have perished of hunger, during the last forty years, were the victims of the Money Power putting down prices of labor, and putting up the price of commodities.

"Some Five Million Hindoos Died of Famine before they submitted. But the Money Kings triumphed; transplanted the Hindoos; and opened up grand plantations in the jungle... those capitalists are now producing opium..."

## MARKETS CRUSHED BY HINDOO PRODUCTS.

31

free Hindoo labor. And in that wide empire of alluvial lands owned by them in fee simple, extending from the sea to the Himalayas, and from the heart of India into Burmah, those capitalists are now producing opium, and rice, and indigo, and cotton and india rubber, and quinine, and spices, and tea, and cotton and wheat.

30

## RISE OF THE MONEY POWER.

### 3RD. JUNGLE PLANTATIONS.

But in the latter era of the growth of the Money Power, since the application of steam to transportation, the Money Kings have realized such vast profits from their world-wide manufactures and commerce, that they have made immense land investments in India. Vast areas of alluvial lands along the plains of the Ganges and the Bramapootra rivers have for ages been covered with the primitive jungle. Much of it is delta lands along the streams; much of it, broad alluvial plains and uplands, stretching from the sea to the foot of the Himalaya Mountains.

The Money Kings induced the government to offer these jungle lands at a very low price, and those imperial capitalists bought them. They next wished to populate these jungle lands with a race of Hindoo serfs who would till the soil for wages barely sufficient for subsistence. They offered the Hindoos the alternative of emigration to the jungles in their employment, or of starvation in their village homes.

before they submitted. But the Money Kings triumphed; transplanted the Hindoos; and opened up grand plantations in the jungle. They built railroads; founded cities; and now they own cities, railroads and plantations. They own in fee simple a vast empire in India,—an empire of alluvial lands, more extensive than the ancient empires of Nineveh and Babylon in the valleys of the Euphrates and the Tigris—far more extensive than the Egyptian empire in the valley of the Nile—larger than Greece and Macedon combined—wider in extent than Italy—a broader domain than the whole of Great Britain. They find it cheaper to own the land and hire peasants to cultivate it, than to buy the products of

"And they throw all these products of a teeming soil and pauper labor upon the markets of the world, making immense profits, and forcing down the price of productions all over the earth to the pauper standard of Hindoo labor."

## THE FREE MARKETS CRUSHED BY INDIA'S PRODUCTS.

And they throw all these products of a teeming soil and pauper labor upon the markets of the world, making immense profits, and forcing down the price of productions all over the earth to the pauper standard of Hindoo labor. They are now publishing in our papers that they can grow wheat so cheaply upon their jungle lands, that, in competition with them, our Western farmers can only be allowed, in future, fifty cents a bushel for their wheat! Will not Omnipotent Justice blast such wrong doing?!

**By the Competition of their Hindoo Plantations**, tilled with Hindoo *Ryot* labor at five cents a day, they force down the price of Carolina rice and Southern cotton to the same level. Raising products upon their own lands with Hindoo pauper labor—shipping their products upon their own railroads into their own seaport cities—and transporting them in their own ships to their own warehouses in every country—these Money Kings are able to crush down the prices of productions in every country, and force the people of all countries to sell their products at any price they choose to offer!!

**An Important Fact** is learned from the course of the Money Power in India. The Money Kings find it more profitable to own lands and till them with pauper labor, than to buy the products reared by the free natives of the soil. They regard the purchase of cheap lands a good investment. They will doubtless continue the purchase of India lands, until they own all the lands of India,

and all property of every kind, and the Hindoos become serfs, cultivating their lands, and filling positions in various departments of their service.

How can it be otherwise? Every department of industry in that country, except agriculture in part, is in their hands. They have in possession every source of profit. They and their agents realize all the profits that are made: nobody else makes more than a subsistence. The Money Power has India enveloped in its coils. It is only a question of time when the Serpent will complete the devouring of all its lands and all its property.

---

And we shall perceive as we proceed, that the Boa Constrictor has our country in almost the same condition as India. If things go on, in a few years more the Money Kings will own a wider empire of farming lands in the United States than in India; and the American farmer will be reduced to the condition of the Hindoo peasant laborer working for a few cents a day, or he may look on and see the lands he has lost cultivated by Chinese and Hindoos. We shall be reduced to the condition of slaves. There is a bottomless pit before us. The Money Power is preparing to plunge us into it.

"But space will only admit of a statement, in part, of its devouring the industries of the United States. This Knot of London Jew Capitalists is having its way in the United States more completely than anywhere else in the world, except India."

## CHAPTER V.

### FOURTH ERA, CONTINUED:—DEVOURINGS OF THE MONEY POWER IN THE U. S.

Space will not admit of a full narration of the manner in which the Money Power is devouring industry and trade and wealth, throughout the world. While the head and the den of the Serpent are in England, its coils extend all over the earth. It is everywhere ruining business men, and taking possession of their business and property. In Europe, in Asia, in Africa, in South America, in Mexico, in Canada, in Australia, and in the Islands of the sea, it is constantly pursuing its deadly business of monopolizing the industry, trade and wealth of the world, by ruining people engaged in independent enterprise. But space will only admit of a statement, in part, of its devouring the industries of the United States.

**This Knot of London Jew Capitalists** is having its way in the United States more completely than anywhere else in the world, except India. In England, the Landed Aristocracy holds its own against the Money Power, in part, by the law of primogeniture, which enables it to maintain possession of the land, and much city property; and by the marriages of the sons of the landed aristocracy with the daughters of rich Englishmen associated with the Jew Money Kings and sharing their profits.

But, in America, the Money Power has had free course to ravage and devour.

Essential to understand "short-side principle"

"English are reticent on the subject of the growth of the Money Power. Not a word is ever said of it in Parliament. The papers never publish a line that would enable the foreign world to know of the centralization of all wealth & property in Britain. It is their national secret."

## THE YEAR 1864 AN ERA.

105

### CHAPTER VIII.

#### DEMONSTRATION OF THE WORK OF THE MONEY POWER IN THIS COUNTRY.

That it is the London Money Power which is thus crushing our industry is proved by evidence that is a scientific demonstration. I make no assertion without proof. The demonstration has been necessarily delayed till the facts were all presented. But the proof is absolute, and overwhelming. It is, indeed, a scientific demonstration, based upon the application of the fixed laws of industry.

The evidence is cumulative. Each point of evidence strengthens the others, until the conclusion is demonstrated beyond the possibility of doubt.

#### I. FIRST PROOF:—BRITISH TESTIMONY TO THE EXISTENCE OF THE MONEY POWER, IN 1864 A. D.

The year 1864 was an era in the growth of the Money Power. The English public then first realized its growing greatness, and the idea produced a powerful impression upon the English mind. The English are reticent on the subject of the growth of the Money Power. Not a word is ever said of it in Parliament. The papers never publish a line that would enable the foreign world to know of the centralization of all wealth and property in Britain. It is their national secret.

flush of joy and pride they forgot reserve for a moment, and gave utterance to their self-gratulation. Some of these outbursts fell under the eye of the author of this work. The English writers speak in glowing terms of the rising Imperialism of commerce and wealth, then building up by the Money Kings; but they couch their thoughts in enigmatical phrase, which would be understood by the

106

## RISE OF THE MONEY POWER.

initiated, but would not expose their national secret to the outside world.

I quote two of these press statements published in 1864, in the beginning of this grandest era of the growth of the Money Power. They fully bear out all I have stated in describing the Imperialism of capital, industry and wealth established by these Jew Money Kings.

"1ST. FIRST BRITISH STATEMENT,

I will first quote some statements from a brilliant writer in one of the English reviews, who gives a graphic outline sketch of the Imperialism attained, at that time, by the Money Kings. He says:"

I will first quote some statements from a brilliant writer in one of the English reviews, who gives a graphic outline sketch of the Imperialism attained, at that time, by the Money Kings. He says:

“London, as every one knows, contains a city within a city; and within this inner city there is yet another [the Money Quarter], the very heart of the metropolis. It is a small place. In a couple of minutes, you may walk across it, from side to side, from end to end. Yet it [the Money Quarter] is the center and citadel of our greatness—the heart whose pulsations are felt to the farthest extremities of the empire. The occupants of the precinct [the Money Kings] have dealings with all the world. The railways which accompany the ceaseless advance of the white race into the prairies of the Far West, in America [our North-western States]—the [mining] companies which explore and develop the [mineral] resources of California and Australia—the iron roads and irrigating canals which are maturing the prosperity of India—the enterprise which covers with tea plantations the valleys and slopes of the Himalayas, and which carries our countrymen [the agents of the Money Kings] into new regions everywhere,—are created or sustained by the outgoings [of capital] of this little spot in London.

“The wastes of Hudson Bay—trading companies for the Nile—the cotton planting which is invading Africa—ocean lines of steamships—submarine telegraphs connecting dis severed continents—water works for Berlin—gas for Bombay—these and a hundred other matters and projects engage the thoughts and EMPLOY THE CAPITAL which is at

the command of this busy hive of operators [the Money Kings]. *Almost every country is included in their operations.*

“And ALMOST EVERY STATE IS INDEBTED TO THEM. From gigantic Russia to petty Ecuador and Venezuela *they hold the bonds of every government*, those of Persia and Japan excepted. Prosaic as their operations are in detail, taken in the mass, they constitute a grand work. DAILY AND HOURLY, *it is their business to scan in detail the condition of the world.* They weigh the influence of the seasons—they know the condition of every mine—the prospects of every railway—the dividends of every Company.

“It [the Money Quarter of London] is a city of Money Dealers—a Sanctuary of Plutus.—Blot out that inner heart of London, and the whole world would feel the shock.” (!!!) (Capitals and italics mine).

His calm style and intimate acquaintance with facts and commercial principles place this writer above the charge of exaggeration. Indeed, there is reticence throughout the article; allusion instead of statement, suggestion rather than fact. And yet, what a picture does he draw of the imperialism over industry, trade and wealth attained by the Money Kings of London.

#### "2ND. SECOND BRITISH STATEMENT.

I next quote from an article in Blackwood, for 1864, in which the writer speaks of the Money Quarter of London as Temple of Mammon, in which the Money Kings are storing up the wealth of the world. He says :-"

I next quote from an article in Blackwood, for 1864, in which the writer speaks of the Money Quarter of London as a Temple of Mammon, in which the Money Kings are storing up the wealth of the world. He says:—

“There [in the Money Quarter of London] they are ceaselessly storing up the the wealth that flows to them from the rest of the world. Men in strange climes, and in strange dresses, and speaking all manner of tongues, are seen preparing produce and luxuries of all kinds for the Temple, which flow thither in long streams across land and sea. And still the work of storing goes on: gold, silver, and all precious things, [bonds, stocks, etc.]. —the delights of life—the cream of the earth’s good

108

## RISE OF THE MONEY POWER.

things—accumulate higher and higher in the chambers of the Temple [the Money Quarter].”

"3RD. THIRD BRITISH STATEMENT: THE PAMPHLET.

If a shadow of doubt remain in any mind, it will be dispelled by the utterances of a pamphlet given me, in London, in 1864."

### 3RD. THIRD BRITISH STATEMENT: THE PAMPHLET.

I do not think that any one can still doubt the fact that the Money Kings of London have established a grand imperialism of industry, trade and wealth, extending all over the world. If a shadow of doubt remain in any mind, it will be dispelled by the utterances of a pamphlet given me, in London, in 1864. The pamphlet was intended for private circulation only, and therefore speaks out

Capital. In a discussion with the author of this work, the writer of the pamphlet lost his temper and coolness of judgment, and gave him a copy of this remarkable publication.

The author of the pamphlet speaks of the wealth of the Money Kings as national wealth, and of their capital as English capital. Where he speaks of England, therefore, he means the Money Power of London; and when he speaks of the English, he means the Money Kings. The writer shows but little literary skill, either in his style, or in the grouping of his facts; but his statements are true, and his facts authentic. The following extracts from the pamphlet present a picture of the monopoly of industry, commerce and wealth, attained by the Money Power, in 1864, that will startle mankind. The writer says:—

“It is a remarkable position England occupies in the world. A little point amid the Northern seas, almost invisible to the school boy as he seeks for it on his globe, and which he may hide with his finger point as he turns the colored sphere, the British Isles are nevertheless the heart of the world—the center to which the thoughts and acts of men most generally tend—and to and from which the streams of material life are ever flowing.

WONDERFUL STATEMENTS OF PAMPHLET.

WONDERFUL STATEMENTS OF PAMPHLET. 109

“If we draw on a map the great lines of commerce, we will see what a large proportion of them converge to

to Rome;" and England, commercially, holds in *the world* [italics his] the same predominant position which the Eternal City held in the restricted era of the Roman empire. Our country is the chief goal of the highways of commerce. Caravans, with their long strings of laden camels and horses, are ceaselessly crossing the plains and deserts of Asia—railway trains drawn by the rapid fire car rush across Europe and America with their freights of goods—and ships in thousands bring to us, from all parts of the world, the staple supplies of our food and industry."

\* \* \* \* "China sends raw silk, and tea; India sends cotton, indigo and rice. We get our spices from the Phillipine Islands; almost all our coffee from Ceylon; a portion of our cotton from Egypt; hides, chiefly from the pampas of Buenos Ayres; wool, chiefly from Australia and the Cape; wood, from the Northern countries of America and Europe; flax and tallow, from Russia; corn, chiefly from the United States and Russia; and the precious metals from Australia, California, Mexico and the Andes of Peru. \* \* \* \* England [i. e. the Money Power of London] furnishes employment to tens of millions of people in the uttermost parts of the earth,—the Chinaman in his tea plantations and mulberry gardens—the Hindoo in his rice and cotton fields—the poor Indian miner in the Andes—the Guacho, as he follows his herds in the Pampas—even the Negro of Africa, and the natives of the far and fair Islands of the Pacific."

"Of our exports, we send beer to India and Australia; coal, to many places, to supply coaling stations for steam vessels, but chiefly to France. We send cotton yarn for manufacture to India, Holland and Germany; cotton piece goods to the United States and Brazil. Our hardwares and cutlery go chiefly to Australia, India and the United States; and our woolen and worsted goods to the United States, India, and China, Germany, British North America and Australia."

\* \* \* \* "The trade of England is ubiquitous. It penetrates to every part of the earth. Fully three-fourths of the exportable produce of every country is sent direct to England, and of the remaining one-fourth, the greater part is carried by English enterprise, and at English risk to the port of consumption. In like manner, almost every spot on the earth receives its foreign supplies from this country, or by the hands of English traders [agents of the Money Kings]; and by means of English capital. \* \* \*  
\* \* We are the great general merchants of the world."  
\* \* \* \*

"We [the Money Kings] are the manufacturers for the world. Every nation in the world except England may be called an agricultural country; each no doubt, has some few manufactures more or less rough; but the manufactures of every one are trifling in the extreme in proportion to the raw products which it grows. Consequently, few countries export much except raw produce; and the direct trade between the various countries of the world is very small. All trade through England; for what little goes direct from one country to another is generally on English [Money King] account, carried by English [Money King] enterprise, and with English [Money King] capital."

"We [the Money Kings] are the great carriers for the world. Thirty thousand ships sailing under the flag, or bearing the cargoes of [the Money Kings of] England, are ever on the seas going and coming from all parts of the globe. \* \* \* \* From the Thames, the Mersey, the Tyne, and the Clyde argosies and commercial armadas are ever leaving, and jostle in our estuaries with similar squadrons making to port."

"We [the Money Kings] are the ship-builders for the world; *and own or have mortgages on every vessel afloat. The shipping in every foreign port either belong to England [the Money Power,] or are employed by England [the Money Power,] with the exception of a few coasters.*"

"The shores of our estuaries, lined with miles of docks and building yards, ring with the clang of hammers; and vast ribs of wood and iron, curving upward from still vas-

for their adventurous career.    †   †   †   †   †   DOLL

## BRITISH CENTRALIZATION OF TRADE.

III

classes of our ships, both steam and sailing, are regularly increasing in numbers. In both kind of vessels, too, there is a steady increase of size. Comparing the present amount of our shipping [in 1864,] with what it was in 1850, we find that we have 11 per cent. more ships, 40 per cent. more tonnage, and 15 per cent. more men."

Filled with enthusiasm at the picture presented to his mind, the writer exclaims:—

"Our little islands no longer suffice for us. Our energies have far overpassed their limits. There is room for us to live and work here—that is all. *These islands are our house and garden, but our farm is detached. \* \* \* We live upon the world.*"

The writer goes on:—

"We [Money Kings] are the railway makers of the world: *and the actual owners of the greater proportion of foreign railways.*

"We [Money Kings] carry the mails for the whole world. Strange as it may appear, even the letters from South America to North America have always passed through the London post-office.

"No one can go from one part of the world to another without passing through England; so completely do we [Money Kings] monopolize the whole passenger traffic."

"We [Money Kings] *are the bankers of the whole world.* If the North sends money to the South, or the East to the West, the money must be sent through London—there is no other way.

"We [Money Kings] are the bullion dealers of the world: all gold and silver is brought direct to England [to the Money Kings,] in payment of debts due to us [Money Kings,] *and then is redistributed by us in the shape of public and private loans.*"

"We [Money Kings] have the lion's share in every

we [Money Kings] are the great capitalists of the world. \* \* \* \* \* It may be truly said that there is not at any time any corner of the world in which Englishmen [the Money Kings] have not more or less pecuniary interest. Without English [Money King] capital, and English [Money King] enterprise, the tallow of Russia

could not be brought from the interior to St. Petersburg; nor the timber of Norway and Sweden and Poland be brought to the ports of embarkation; nor the cotton of Egypt to Alexandria. *English [Money King] capital performs the internal traffic of every country, and largely supplies the means of interior production.*"

"We [Money Kings] are the annuitants of the world. *We have loaned money to every government, and almost to every municipality.* Every country has to pay large sums to the English [Money Kings] as interest upon loans, amounting to many hundreds of millions [pounds]."

"Nothing is too large and nothing is too small for English [Money King] capital, and English [Money King] enterprise. We [Money Kings] even pave, light, watch, and drain numerous foreign cities. The very water-works of Berlin were constructed by the English [Money Kings], and are owned in England [by them]. So endless are the ramifications of British [Money King] trade and enterprise, that the slightest misfortune to any country or people seriously affects [the Money Power of] England. A severe drought in the most remote spot on earth leaves England [the Money Power] a serious loser. A deluge in any country fills our [Money King] ledgers with bad debts. An earthquake in any quarter of the globe largely reduces English [Money King] profits. Every flood washes away English [Money King] dividends, English [Money King] exports, English [Money King] imports, and sweeps away English [Money King] capital, and ruins English [Money King] future expectations."

"IN FACT MORE THAN HALF THE WORLD IS MORTGAGED TO ENGLAND [the Money King]!"

The foregoing statements make it evident that, in 1864, the Money Kings of London had already established a grand empire over industry, manufactures, commerce and wealth, which was then dominating all the countries of the globe. The Money Kings were the only great capitalists of the earth. No country had sufficient capital to

\*The author will have occasion to quote further from this remarkable publication, later on.

"The Laws Of The Political Economy"

## VIOLATED LAWS OF POLITICAL ECONOMY. 115

### 1ST. THE LAWS OF POLITICAL ECONOMY WHICH ARE VIOLATED.

The laws of Political Economy are as fixed as the stars in their course. They are the Laws of the Business World, which are as immoveable and unalterable as the Laws of Nature. Let us note some of these Laws of the Business World:—

**Principle I.** *In a normal state of things, all prices are regulated by two things,—1) The amount of currency; and 2) The law of supply and demand.*

**Principle II.** *A large capital in business operations is a great advantage, and gives to its possessors a marked superiority over competitors having small capital.*

**Principle III.** *Persons established in business have an advantage over those just starting in the same business, other things equal.*

**Principle IV.** *From the above principles, it follows that a New Man who starts in business poor, is at a great disadvantage in competition with Rich Men who are already*

**Principle V.** *A New Man who is Poor, if he starts in business in antagonism with Rich Men who are already established, will be at such a disadvantage that he will be almost certain to fail.*

**Principle VI.** *In Business Crises, men of large capital who are already established in business, have a great advantage over New Men just starting in the business with small capital.*

**Principle VII.** *In Business Crises, men of small capital, who are overtrading, and have to borrow money, are at such disadvantage that they are usually the first to break.*

**Principle VIII.** *It follows from the above principles, that New Men of small capital can not, as a rule, enter into competition with Rich Men already established, and drive them*

*out of business; but in such cases of antagonistic competition, the New Men of small capital will be the first to fail.*

**Principle IX.** *And especially in Business Crises, New Men of small capital can not, as a rule, successfully enter into competition with Rich Men already established, and take their business from them; but, in such antagonistic competition, the Rich Men already established will be able to sustain themselves, and the New Men of small capital will fail.*

**Principle X.** *The superiority of a large capital is equally apparent in all operations in stocks and produce, in Boards of Trade.—For*

**Principle XI.** *The Laws of Chance have their variations only within certain limits, and in the long run conform to regular law: so that, in gambling operations, the longest purse will win, in the long run.*

*Men with smaller capital can not, as a rule, break down richer men, and reduce them to bankruptcy;—but the New Men will, in the long run, fail in such operations.*

**Principle XIII.** *From the above principles it follows that, in the Business World, a man can only make a reasonable amount of money in a given time.*

**Principle XIV.** *The wealth of a country, under the operation of the natural laws of Political Economy, will increase most rapidly in times of prosperity, and will increase more slowly in eras of industrial depression.*

The above Principles are Industrial Axioms. Their truth is recognized as soon as they are stated. They are Laws of the Business World, which are as fixed as the course of the Planets in their orbits. The Planets have their perturbations: and there may be occasional exceptions to the Laws of Industry laid down in these Principles. But the exception proves the rule. There can not be any general departure from these Principles.

PRICES ABNORMAL.

117

## 2ND. THESE FIXED PRINCIPLES OF POLITICAL ECONOMY ARE NOW VIOLATED IN EVERY PARTICULAR

by the facts of the business world, in our time. We call attention especially to four points:—

### THE PRINCIPLES OF POLITICAL ECONOMY ARE VIOLATED:—

1. In the abnormal condition of prices; which are no longer regulated by the amount of currency, and by the law of supply and demand;
  2. In the abnormal condition of business; in which New Men who started poor have taken possession of everything;
  3. In the unheard of aggregation of wealth in the hands of New Men, who have sprung up from poverty into unprecedented wealth; and
  4. In the anomalous fact that the wealth of our country has increased most rapidly when the general prosperity was at the lowest ebb.
- 

"The fact is capable of Scientific Demonstration that those Americans who have thus suddenly grown up into wealth and power, are THE AGENTS OF ((THE LONDON MONEY POWER))."

## 2. THE PRINCIPLES OF POLITICAL ECONOMY VIOLATED, IN THE FACT THAT NEW POOR MEN HAVE TAKEN POSSESSION OF EVERYTHING, IN ALL DEPARTMENTS OF BUSINESS.

**A multitude of New Men** have grown up from poverty into sudden wealth, dispossessing richer men of business in which they were well established, thus throwing all the business of the country into new channels.

New Men are at the head of the import and export trade of the country—of the trade in all lines of produce—in the oil business—in manufactures—in the great wholesale trade—in the packing business—in all the great lines of business in the country.

**In New York City**, New Men bankrupted the old merchants, and took away the business from them.

**These New York merchants**—English branch houses—afterwards put down the price of goods, and broke down the New England Mills. They were evidently in collusion with their London principals; and their ability to break down the New England Mills is another proof of the mighty capital behind them.

**New Men went into Wall Street**, and broke the old operators, and acquired immense fortunes; a positive proof that the New Operators were backed by the unlimited capital of London, which made their operations a certainty.

**New Men went into the oil regions**, broke down the old operators, monopolized all the wells, and secured

iness before them, and drive them out of the business and take possession of it themselves, *we may know that the New Men have, from some source, not known to the public, supplies of capital greater than is at the command of the men whom they break down.*

All the facts are explained, if we suppose that the New Men, who started poor a few years ago, are the agents of the Money Power, and are using its capital. *But to suppose that they have, unaided, by their own narrow means, supplanted and driven from business richer men, is the rankest absurdity.*

**The absurdity of the idea is manifest.** It is impossible for poor young men to go into business, and bankrupt the rich men already established, and take their business from them, unless the Poor Young Men were secretly the agents of the London Money Power, and were supplied with funds by the Money Kings, so as to enable them to break down all opposition.

Napoleon said, Providence always favors the strongest battalions, in war. In business, as in war, God does not choose to work miracles by setting aside the regular laws of nature, but leaves natural laws to work out their natural results; and men of smaller capital who launch out boldly into business in antagonistic competition with rich men already established, will, as a rule, come to ruin. In business, the longest purse wins, as the strongest battalions, in war.

*Whenever we see a multitude of poor men growing rich, and bankrupting rich men already established in business, we may be sure that, from some source,*

**THE VICTORS HAVE THE HEAVIEST CAPITAL.**

**This is Law—Law fixed as the course of the planets.**

and there may be occasional exceptions to these business

#### NEW MEN BREAK DOWN COMPETITORS.

121

a grand monopoly of oil; manifest proof that they had behind them the power of an immense capital.

**In pork packing**, the old Louisville and Cincinnati packers were all broke, while a New Man sprung up in Chicago from poverty into sudden and immense wealth; a demonstration that the New Man who rode the storm before which the others went down, and who put \$120,000,000 into his business in a few years, is not a principal in his business, but is an agent of the Money Kings, who gave him unlimited capital for his operations.

**This is an age of New Men.** In all the great branches of business, the old business men have gone down, and New Men have taken their place. New Men who started poor, have, all over the country, broken down and displaced the former operators who were rich, and well established in business.

**The fact is capable of Scientific Demonstration** that those Americans who have thus suddenly grown up into wealth and power, are

#### THE AGENTS OF THE LONDON MONEY POWER.

It is impossible, under the regular laws of business, that these New Men could be independent operators, conducting business on their own account. To suppose them independent operators makes the business life of the age an anomaly,—full of facts utterly contradictory of all the laws of the business world.—Our age is moving onward, with the facts it presents in utter antagonism to all Law. Its facts are a jumble of irreconcilable contradictions to

immutable laws of Political Economy. Enlightened Reason revolts against the idea that these men are engaged in independent business, and rejects it as utterly absurd.

When, in all lines of business, we see New Men who were poor break down the rich men who were in the bus-

"But when a multitude of cases occur—when, indeed, it is the rule for Poor Young Men to get rich, and rapidly supplant their predecessors—so all business changes hands—in such cases, it is certain the poor men who thus get rich have behind them the backing of mighty capital."

## NEW MEN AGENTS OF MONEY KINGS.

123

laws, where a poor man may grow rich in such a manner. But when a multitude of such cases occur—when, indeed, it is the rule for Poor Young Men to get rich, and rapidly supplant their predecessors in trade—so that all business changes hands—in such cases, it is certain that *the poor men who thus get rich have behind them the backing of a mighty capital.* This is Law. By the operation of the Law of Cause and Effect, *the heaviest Capital carries with it power to crush smaller operators; as surely as a thunder cloud carries rain, or the North Wind cold.*

"It is needless to mention the names of the multitude of the newly and immensely rich. All know them. That they have the wealth is evident: they have the property to show for it."

This evidence is enough. But it is not all:

### 3. THE PRINCIPLES OF POLITICAL ECONOMY VIOLATED, IN THE SUDDEN ACQUISITION OF INORDINATE WEALTH BY A MULTITUDE OF POOR MEN, IN A VERY SHORT TIME.

It is needless to mention the names of the multitude

they have the wealth is evident: they have the property to show for it.

**The Important Question is, Whose wealth is it? Is it theirs? and did they make it out of their own resources? Or is it the wealth of the London Money Kings, which they are holding in trust, and managing on commission?**

**All is Plain** if they are the agents of the Money Kings;—but to suppose them to have made all the money themselves, in so short a time, and under such conditions, is a contradiction of all the fixed laws of Political Economy.

**Let Us Note Some of the Facts.** We have a vast number of facts in the industry of our times which, if we leave out of view the London Money Power, are the strangest anomaly in the history of the world. There are a multitude of facts in the history of our age, which, as they are commonly regarded, transcend the vivid imagination of the Romancer, or the wild dreams of Oriental fable.

When Eugene Sue needed a Collosal Fortune as the basis of that strange work of fiction, *The Wandering Jew*, he constructed a fortune of \$42,000,000, as the result of the accumulation of several generations. But, in our times, we have the Vanderbilts credited with \$200,000,000, acquired in a little over twenty years. And Armour

was operating his business, in a year or two after starting it with a capital of \$500,000.

novel, it would have been scouted as perfectly ridiculous. If the author of the Arabian Nights, in narrating the adventures of Sinbad the Sailor, had made him acquire such a fortune, the credulity of his readers would have been too severely taxed. Such a Colossal Fortune would have overtaxed the powers of the Genii of Aladdin's Ring and Lamp;—and yet, we believe all that is told us about the mushroom fortunes that are said to be made in our time. Without consulting probabilities at all, we take it for granted that the natural laws of industry are wholly suspended, and that MIRACLES of accumulation are being wrought around us.

We believe that Com. Vanderbilt made \$100,000,000, in twelve years!—that Jay Gould made \$200,000,000, in ten years!—that Rockafeller has made \$150,000,000, in fifteen years!—and that Armour made \$120,000,000, in three years!!! Is there anything the American people will not believe, if the newspapers tell them it is so?!! Had those men possessed Aladdin's lamp, and diligently rubbed it all the while from Monday morning to Saturday night, they could not have made so much money, in the time!

#### THE GAMBLING ARGUMENT REFUTED.

It may be said that these men made their money dealing in stocks,—that they were gamblers; and luck was in their favor! But the mutations of chance correct their variations in the long run, and return to some regular order, by a series of changes which may be calculated. The gambler at the roulette table may win for a time on the turn of the wheel; but as surely as he continues to tempt Fortune, he will have a turn of luck, and will lose all, at last.—So these gamblers in stocks.

They would long since have lost all they had gained, if it were mere luck; as so many others have done, who trusted to fortune entirely, without any great unlimited capital at their back. But these men uniformly win.

Their success is the result of Capital, which enabled them to insure success. Commodore Vanderbilt went into Wall street with only a million dollars. He was constantly opposed by Daniel Drew, who was worth \$15,000,000; and he frequently had the whole street against him. And yet he was able to carry out all his plans successfully. It is known that he had command of unlimited capital—more than could be brought against him in all North America. The operations of Vanderbilt, and Gould and others in Wall street can only be accounted for by the fact that they were the agents of the London Money Kings, and were supplied with sufficient capital to make their operations an assured success.

#### THE FACTS OF THE OUTSIDE WORLD,

make it apparent how impossible it is that so many Americans should have made such colossal fortunes in a few years.

An article has recently appeared which shows the concentration of wealth in a few hands in the United States, from which it appears that there is greater concentration of wealth here than in any other country. There are about seventy persons who average over \$37,000,000 each, most of them having made it within the last thirty years. This makes these persons,—these Newly Rich,—wealthier than the richest capitalists of Europe, whose fortunes have been growing up for generations. It is said that "The

of a dozen American citizens; while the greatest bankers,

"\* This proves that the Rothschilds are the head of a syndicate. For that House loaned over \$500,000,000 to national governments in the ten years from 1854 to 1864, besides all its other immense operations in the same time; and all its previous loans."

### THE FACTS OF THE OUTSIDE WORLD,

make it apparent how impossible it is that so many Americans should have made such colossal fortunes in a few years.

An article has recently appeared which shows the concentration of wealth in a few hands in the United States, from which it appears that there is greater concentration of wealth here than in any other country. There are about seventy persons who average over \$37,000,000 each, most of them having made it within the last thirty years. This makes these persons,—these Newly Rich,—wealthier than the richest capitalists of Europe, whose fortunes have been growing up for generations. It is said that "The richest dukes of England fall below the average wealth of a dozen American citizens; while the greatest bankers,

SUCH WEALTH OF NEW MEN IMPOSSIBLE. 127

merchants and railway magnates of England can not compare in wealth with many Americans."

The average annual income of the wealthiest one hundred Englishmen is about \$400,000; while the average annual income of the richest one hundred Americans largely exceeds \$1,000,000!

\$17,000,000, the result of the accumulation of several generations.\*—Earl Dudley, the owner of the richest iron mines, was worth at his death but \$20,000,000.—The Duke of Buccleuch left about \$30,000,000.—The Marquis of Bute is now estimated to be worth \$40,000,000; the Duke of Norfolk, about the same; and the Duke of Westminster about \$50,000,000.

It is perfectly evident by comparison with these grand fortunes abroad, which have been actually made, and under the most favorable circumstances, how impossible it is that these Americans should have amassed these fabulous fortunes, in a day. It is impossible.

The idea is contradicted by all the history of the past: it is contradicted by the actual facts known to exist in other countries, in our time: it is contradicted by the laws of Political Economy which govern the business world: it is contradicted by the certainties which limit the possibilities of business accumulation.

The Absurdity of the Idea is too gross for belief. The men have not made these fortunes. It is impossible

---

\* This proves that the Rothschilds are the head of a syndicate. For that House loaned over \$500,000,000 to national governments in the ten years from 1854 to 1864; besides all its other immense operations in the same time; and all its previous loans. The House of Rothschild has loaned several billions of dollars. And yet the richest of the Rothschilds was worth only \$17,000,000. The House is evidently a syndicate loaning much money not owned by the Rothschild family.

"...we have low prices, hard times, everybody in debt, and great masses of our people on the verge of ruin. The state of things is unaccountable by all ordinary business principles."

## SYNOPSIS OF THE ARGUMENT.

on the same scientific basis as the Scientific Demonstration that proves the truth of the Copernican Theory. As that Scientific Theory is demonstrated to be true by its harmonizing all the phenomena of the Solar System, so the Theory that it is the Money Power which is devouring all our industries is proved to be true by its harmonizing and explaining all the facts of the Business World that have been so perplexing to all observers.

Everybody knows that the times are out of joint. The most startling business developments are constantly occurring;—but no one has been able to account for them. Our business system is like Astronomy under the old Ptolemaic System: it is a jumble of incongruous facts, wholly unaccountable by all the ordinary laws of industry, and indeed in antagonism with them.

**The Hypothesis**, that all the facts are caused by the work of the Money Kings through a system of agencies in this country, makes all plain.

1. We have the existence of the Money Power set forth by English writers, who declare that it is constantly piling up the wealth of the whole world higher and higher in its Temple, the Money Quarter of London: that its capital is carrying on the business of all countries, and generally supplying to them the means of interior home production: that, twenty-four years ago, it owned almost all the railroads of the world; and that it is carrying on its operations, all over the earth. The existence of the grand world-wide Imperialism of Capital is a demonstrated fact.

Furthermore, this Money Power always operates through

## SYNOPSIS OF ARGUMENT.

131

joint stock corporations: it always systematically conceals its operations: thoroughly organized, it proceeds in the accomplishment of its aims of conquest in accordance with a regular method.

2. Hence, when we see in this country grand corporations monopolizing all business, thoroughly organized, proceeding in their breaking down of independent business men with regular uniform method—carefully concealing their wrecking operations from the public—working always by secret underhanded methods:—these facts create a strong presumption that these corporations are the agents of the London Money Power.

And when we see a multitude of other facts, all pointing in the same direction, it becomes a certainty.

3. We find a multitude of New Men, who started poor, going into business without capital of their own, and breaking down Rich Men already established in business, and taking the business from them.

4. We find New Men, starting poor, in a few years ostensibly having possession of vast fortunes, greater than the wealth of the Rothschilds, or the richest Plutocrats of Europe.

5. We find our country vastly increasing in wealth in the decade when business was dullest, times hardest; and when the whole country was swept by an overwhelming tide of ruin.

6. We find business drifting into new channels—being monopolized by a few great capitalists—the multitude of small business operators being ruined, while grand companies with overwhelming capital are taking possession of all kinds of business.

business can in the ordinary business channels, while the railroads are pressed beyond their capacity by the constantly expanding industry of the country.

132

## RISE OF THE MONEY POWER.

8. We have more business than ever before; but it is gone out of the hands of the many small operators, and has gone into the hands of a few great business companies.

9. We see money abundant, and demand for produce steady and active; and yet prices of produce as low as in old days of the 40's, when money was so scarce that we had only \$64,000,000, of currency in the country. \* \* \*

The people have seen these and other anomalies already mentioned, and have been asking the reason. The reason for this state of things is sought in vain in ordinary business causes. The action of ordinary business causes would, in a normal state of things, give us general prosperity. There is great business activity—plenty of money lying idle—an abundant market and an active demand:—there are all the elements of prosperous times, high prices and general prosperity;—and yet, notwithstanding, we have low prices, hard times, everybody in debt, and great masses of our people on the verge of ruin. The state of things is unaccountable by all ordinary business principles.

---

these grand corporations in our country are the agencies of the London Money Power.

2. If any agent wants to deny that the Money Kings are his principals, it is very easy to prove the denial to be true.

Let him show the stock books of his corporation, and show who the stockholders are; and let him show that his corporation is not mortgaged to the London Money Kings. *No man who is afraid to show his stock books, can deny that he is the agent of the London Money Kings.*

3. The necessity for concealment shows why employees of those corporations, when testifying in court, and before committees of Congress, can not be induced to state who are the stockholders of the corporations they serve. That is their secret—a secret that is never divulged.

One of them, after answering frankly the questions that were asked him about the management of his company, begged to be permitted not to tell who were the stockholders. He said he had come prepared to answer truly all the questions that might be asked him concerning the management of the business, but he had no right to tell who were the stockholders of the corporation. He was excused by the Committee; and the American people do

Company.

**They do not wish Americans to know that all these grand corporations are owned by the London Money Kings! They guard this precious secret with the greatest care.—The books of a corporation were once taken out of a New York court by force, and carried off to Canada, to prevent it from being discovered who were the stockholders.**

**They never will permit the public to see their books,—unless indeed, hereafter, they should devise a new system, in which the agents might be allowed to hold the stock under trust bonds, and carry it upon the books in their own name, in order to deceive the American people. They will do it, if necessary. Anything to keep their secret!**

---

"Though the fact that the Jew Capitalists are the London Money Power, a grand Imperialism of Capital, has never been thought of before, yet thoughtful observers have noticed the rapid rise of the Jews into astonishing wealth..."

136

## RISE OF THE MONEY POWER.

on its railroads and ocean vessels—from the profits of its farms and plantations—from the profits of its merchandizing—from its trade in all the productions of our country, and of the whole world. From all these sources, the Money Power have an annual revenue vast beyond computation.

**In the United States, the Money Power is Making Almost All the Money that is made. Our people used to get the Liverpool price for our produce; the profits being divided between the producer, the**

it. But after the Money Power bought our ships, we only made the profits received at the sea board. And now, the Money Power has devoured our import and export sea board trade—our railroads—our mines—our manufactures, and the traffic in all our products; and all that our people now get is, what the Money Power pays our farmers for produce, at the railroad depots. All the profits, from that point, are realized by the Money Power and its agents. And it is the same in all other countries. From these facts, we can form an idea of the immense profits the Money Power is realizing from its imperialism over industry, commerce and wealth, all over the earth.

Though the fact that the Jew Capitalists are the London Money Power, a grand Imperialism of Capital, has never been thought of before, yet thoughtful observers have noticed the rapid rise of the Jews into astonishing wealth.

Since this work was written, a thoughtful book, entitled *The Jews*, by Samuel H. Kellogg, D. D., has fallen under my eye, from which I take some very startling facts that are new to the public. The statements are more striking in their bearing upon the Imperialism of Capital attained by the London Jews, from the fact that the author of the work has no idea of the Jewish London Money Power. It shows that the Jews have done, and are doing,

#### IV. FOURTH PROOF: THE JEWS TAKING POSSESSION OF PROPERTY, IN EUROPE, AS IN THIS COUNTRY.

What the Money Power has been doing in this country, it has been doing all over the world. All over the earth it is extending its empire over industry, commerce and wealth. The national debts of the world now amount to about \$26,000,000,000. It is estimated that the entire indebtedness of the world, national, state, county, municipal, corporate, and individual, amounts to over \$75,000,000,000. If three-fourths of this indebtedness is owed to the Money Power—and this is a moderate estimate—then at four per cent., the income from interest alone, amounts to \$2,150,000,000 a year. Beside this, it has the profits derived from its manufactures—from its ocean commerce—from its city rents—from its mines of coal and lead and silver and gold and copper and tin—from its petroleum—from its freights and passenger traffic

##### 1ST. JEWISH POWER AND INFLUENCE.

The petition of the Anti-Semites, circulated in Germany, in 1880, complains:—"The fruits of Christian labor are harvested by the Jews. Capital is concentrated in Jewish hands."

138

#### RISE OF THE MONEY POWER.

The petition of the Anti-Semites, circulated in Germany, in 1880, complains:—"The fruits of Christian labor are harvested by the Jews. Capital is concentrated in Jewish hands."

## United States.

### 1ST. JEWISH POWER AND INFLUENCE.

Dr. Kellogg says:—"Everywhere in Europe is noted the extraordinary tendency of capital to concentrate in Jewish hands."

A writer in the *Nineteenth Century* makes the following statements:—

"The Influence of the Jews at the present time is more noticable than ever. That they are at the head of European Capitalists, we are all well aware. \* \* \* \* The Jews are, beyond dispute, the leaders of the Plutocracy of Europe. \* \* \* \* In all the vast financial schemes of recent years, the hand of the Jews has been felt, both for good and evil. The Rothschilds are but the leading name among the whole series of capitalists, which include the great monetary chiefs of Berlin, Amsterdam, Paris and Frankfort. During the ten years, 1854 to 1864, the Rothschilds furnished in loans, \$200,000,000 to England, \$50,000,000 to Austria, \$40,000,000 to Prussia, \$130,000,000 to France, \$50,000,000 to Russia, \$12,000,000 to Brazil, in all \$482,000,000.—This, besides many millions loaned to small states."

And this was twenty-four years ago, when these capitalists were comparatively feeble! How many millions have they loaned in the last twenty-four years?!!

In Prussia, where the Jews are only two per cent. of the population, in 1871, out of six hundred and forty two bankers, five hundred and fifty were Jews; *i. e.* about six-sevenths of the whole number.—And this was seventeen years ago. How great has been the growth of Jewish capital in the interval!!

In Austria, a similar state of things exists. One of the religious papers of Berlin makes the statement that "The Bourse of Vienna actually lies wholly in Jewish hands."

"2ND. THESE JEW CAPITALISTS ARE TAKING POSSESSION OF THE BUSINESS OF EUROPE."

## 2ND. THESE JEW CAPITALISTS ARE TAKING POSSESSION OF THE BUSINESS OF EUROPE.

So long ago as 1861, according to the Prussian official returns, out of seventy-one thousand Jews in Prussia, capable of work, thirty eight thousand, or more than half, were engaged in commerce; while, at the same time, only one Jew in five hundred and eighty six was a day laborer.

In Berlin,—where the Jews were five per cent. of the population,—in 1871, while, out of every hundred Protestants, thirty nine were returned as “employers,” out of every hundred Jews, seventy-one were engaged in commercial life. It is evident that the Jew merchants make at least five times as much profit as the Protestant “employers” engaged in various lines of business.

In Lower Austria, out of 59,122 merchants, 30,012 are returned in the last census as Jews.—Over half the merchants Jews, while the Jews are less than five per cent. of the population! And we know that the Jew stores are always extensive establishments; while the native merchants have the small stores.—When the Jews are half in number of the merchants of *our* towns, what will have become of our merchants? Where will they be?

In Algiers, even a worse state of things exists. According to *Le Telegraphe*, “Constantina, Algiers and Oran belong almost completely to the Jews. The whole trade of Algiers is in their hands: and. in consequence of high

natives are fallen into the power of the Jews.” The writer adds, “Here is a dark point, full of danger for the future.”

3RD. THESE JEW CAPITALISTS ARE DEVOURING THE LANDS OF EUROPE.

### 3RD. THESE JEW CAPITALISTS ARE DEVOURING THE LANDS OF EUROPE.

The Jews have become to a vast extent the owners of the soil of Europe, and are rapidly becoming the owners of Europe in fee simple, as they are of the United States.

In a debate in the German Reichstag, on the famine of 1880, in Upper Silesia and Posen, it was said that one of the causes of the starvation of the people was the fact, that the lands of those countries had passed, by mortgage foreclosure, to a vast extent, out of the hands of the German Proprietors into the hands of the Jews. So far had this foreclosure of mortgages gone that, as it was stated, the German population were so stripped and impoverished that they were "almost incapable of raising themselves again."—So will it be in this country, in a few years more. Thank God that it is not so yet.

A Berlin paper asserts, "It is a fact which can no longer be denied, that the population of the remote districts of Russia, Austria, Hungary and Roumania, are only the nominal possessors of the soil, and for the most part cultivate the land for the Jews, to whom they have mortgaged all the estates."—One would almost suppose this writer to be speaking of farmers of Iowa and Kansas!

In Galicia, mortgages have, for several years past, increased at the rate of about eight million florins per annum; and it is stated that one-third of the total amount has already passed, by foreclosure, into the hands of the Jews. The sheriff's sales of peasant land were one hundred and sixty-four in 1867; but, in 1879, these sales had risen to 3,164; "and it was almost exclusively the Jews who brought about these foreclosures, and acquired thereby the property."

gages registered in 1877, eighty-two per cent.,—according

140

## RISE OF THE MONEY POWER.

to the official returns,—were owned by the Jews.—In 1881, it was stated that already one-half of the real estate of that province, in town and country, had been taken possession of by the Jews, under foreclosure of mortgages. And Dr. Thaddeus Pilat, the Director of the Bureau of Statistics, expressed the opinion that “the remainder would, very shortly, go the same way.”

From Hungary, similar facts are reported. In that country, in 1878, there were sixteen thousand sheriff's sales of property, far the greater part of which passed over to the Jews. The *London Spectator* stated, a few years ago, that the Jews had obtained possession of so many of the old estates of Hungary, “as to make a change in the constitution a necessity.”

In Roumania, the same authority says the gravest apprehensions were entertained that the Jews “would gradually oust the peasantry, till they possessed the whole land.”

In Russia it is said that, as early as 1869, seventy-three per cent. of the real estate of certain provinces in the West, where the Jews are the most numerous, had passed from the Russians into the hands of the Jews.

“...the Ottomans are probably in greater danger at this moment, than they have ever been from the armies of the Czar.”

Capital has fixed its eye on the magnificent region known as Asia Minor, and found it full to overflowing of material for handsome returns, which nothing prevents it from getting at, but insecurity and oppressive taxation.

\* \* \* \* \* The Money markets of London and Paris, now that they will not lend the Sultan any more money, are beginning to insist, with a subtle, silent, but always in the end irresistible persistence, which unemployed capital knows so well how to exert, that he must at least give them a chance at his mines, and his minerals, and his wheat fields, olive yards and vineyards, must let

#### JEWISH DOMINATION OF EUROPE.

141

them carry their own police with them, and fix their own taxation. \* \* \* \* \* From this," the editor significantly remarks, "the Ottomans are probably in greater danger at this moment, than they have ever been from the armies of the Czar."

In this dreadful state of things, can we wonder that the Jews are about, in every way, to dominate Europe?

"4TH, THE JEW MONEY KINGS ARE MENACING EUROPE AS WELL AS AMERICA, WITH DOMINATION."

shakes the governments; there is deep unrest everywhere, a sense as of over-fatigue; a popular looking forward, not for a millennium, but for some colossal catastrophe in which all prosperity shall be submerged; a tension which half makes statesmen wish that the cataclysm would come and be over. And we see ahead no prospect of amelioration, no gleam of hope in the sky."

#### 4TH. THE JEW MONEY KINGS ARE MENACING EUROPE, AS WELL AS AMERICA, WITH DOMINATION.

M. De Lavileye, the eminent publicist of Belgium, has expressed the general uneasiness that prevails on this subject, in these words:—"The rapid rise of the Jewish element is a fact which may be observed all over Europe. If this upward movement continues, the Israelites, a century hence, will be the masters of Europe."

The *London Spectator* says:—"The Jews display a talent for accumulation with which Christians can not compete, and which tends to make of them an ascendant caste."

The *New York Tribune* quotes one of the German papers as saying, "The rapid rise of the Jewish nation to leadership is a great problem of the future for East Germany." And the writer states in justification of this opinion that "All the lower forms of labor, in the work shops, the fields, and ditches and swamps, fall to the lot of the German element, while the constantly increasing Jewish element obtains enormous possessions in capital and land, and raises itself to power and influence in every depart

ment of public life.

In view of all these things, the London *Spectator* gives utterance to the prevailing feeling of anxiety in the following editorial, which appeared some years ago:—

“The nations feel insecure, as if they had no defense; the working population are distressed till their irritability

"5TH. THE JEW MONEY KINGS HAVE LATELY SECURED A MOST EXTENSIVE CONTROL OF THE PRESS."

## 5TH. THE JEW MONEY KINGS HAVE LATELY SECURED A MOST EXTENSIVE CONTROL OF THE PRESS.

Dr. Kellogg says: "The increase of Jewish influence is further illustrated in the extensive *control of the press* [italics his] which the Jews have lately acquired. This is much insisted on, and with good reason greatly lamented, by many of the most eminent Christian men in Europe. *The fact is to be observed in every country where the Jews exist in any number.*" [Italics his.]

In Dresden, in a gathering of the representatives of the press, twenty-nine out of forty-three were Jews.

Out of twenty-three Liberal and Progressive papers of the Berlin daily press, *there are only two which are not, in one way or another, under Jewish control.*

In Italy, the Jews have control of the *Liberal Press*.

The most influential paper in Spain is under Jewish control.

It is well known that the Jews have control of a great portion of the Metropolitan Press of the United States. They are always open to give the gloss to events, inspired by the Money Power.

It is a part of the astute policy of the Money Power, *to have Jews in control of the Liberal Press in Europe.* There are two advantages they derive from this:—

1.) They keep up the agitation—keep it boiling all the while—but *keep it within limits fixed by themselves.*

will keep on the side of the Money Power...most of the agitators for Socialism are Jews, who are most probably the agents of the Money Power..."

## JEWISH CONTROL OF PRESS.

143

2.) The great advantage the Money Kings derive from the agitation of so-called Liberals and Progressives, is this: they are afraid the nations will rise against their own outrageous monopolies. They are destroying the business men of all countries; and they are afraid the business class may rise up against them, and check their atrocious outrages in the business world. To prevent this, it is their policy to keep up an agitation of the working class, aiming at projects to which the business men are utterly opposed.

It is their policy to keep up a hot agitation for Communism and Socialism in the great cities; so that the business men, in their antagonism to those ideas, will keep on the side of the Money Power. It is a significant fact that most of the agitators for Socialism are Jews, who are most probably the agents of the Money Power, to keep up this agitation for their own purposes.

Thus, most of the Nihilists in Russia are Jews. Prof. Wassiljew of the Imperial University of St. Petersburg, in his testimony, given in the *London Times*, says, "It is an open secret that the Jews are among the leaders of the Nihilistic agitation."

The *London Spectator*, in a review of Victor Tissot's *Russians and Germans*, says: "M. Tissot calls attention to the notable fact that the Nihilist ranks are largely recruited by Jews. \* \* \* \* There are ten times as many Jews as there are Russians, Poles, or Germans."

This shows that the Nihilist movement is largely an agitation against the Russian Government, started up by the Money Power through its Jewish agents. The Russian

property class, in their horror of the Communists, keep in sympathy with the Money Power.

So, in this country, it is the interest of the Money Power to keep up the agitation of Socialism; *so that the business class, in their abhorrence of Communism, may keep*

"V. FIFTH PROOF: ANTICIPATION OF THE EVILS THE MONEY POWER HAS CAUSED IN THIS COUNTRY"

## MONEY POWER HAS CAUSED IN THIS COUNTRY.

There is no stronger evidence of the existence of a cause, than the fact that it has been traced to its effects before the effects were wrought out.

The Author of this work, twenty-three years ago, traced out in a published work the evils British capital has since wrought out in this country, and predicted its monopoly of our industry, and its devouring of our property. In that work, he gave two chapters to the subject: one headed "*British Centralization of Commerce*," the other "*British Centralization of Wealth*."

Want of space forbids any extended quotations from the work. One passage must suffice, quoted from memory, as the work is not beside me:—

"The English cuckoo has no nest of its own, but lays its eggs in the nest of the hedge-sparrow and the robin. When the young birds hatch, the intruder, by its larger growth, soon needs the whole nest; and it throws out the young sparrows, one by one, upon the ground to die, while the stranger consumes all the food brought by the parent birds.—England is laying a cuckoo's egg in every nation's nest. It will not be long before the foreign egg

all governments, devouring all property, and threatening to destroy all national life.\*

---

\* Some may object that the Jews can not be the great Money Kings of London, because the great banking houses of Lombard

are not on Lombard street, but on Threadneedle street, and others in the vicinity.

But this fact is merely a specimen of the habitual craft of the Jews. They habitually hide their operations behind other parties. Nothing is more in keeping with their policy than to hide their operations behind English banking houses.

Wherever the Money Kings break down a bank, or a business, it is their habit to reorganize the establishment, take into their own hands a majority of the stock, give the original bankers, or business managers, the minority of the stock, and continue the business under the name of the old firm. They have done this repeatedly in this country.

In some of the many business crises of the past, the Jews may have driven these English banking houses to the wall, and subordinated them to themselves. Or, they may have entered into some business arrangement with them, and made them their agents. The fact is known that *the Jews are at the head of the capitalists of England, and of the world.* There is nothing that militates against their imperial position in the fact that a large part of the foreign business of London capital is done through English banking houses.

#### THE AUTHOR'S PREDICTION.

145

will hatch, and, in its gigantic development, will need for its growth all the nation's wealth. Then, one by one, it will cast out of their nest the nation's young, to perish, while the intruder will devour all the nation's wealth." \* \* \* \* \* "It is the prosperity of England against the world: one or the other must go down."

The Author, in that work, represents the American people as a prodigal heir, mortgaging his possessions to

while Moneybags was accommodating; but ruin would come when he insisted on having his own. Then the bankrupt prodigal would bewail his folly, too late.

All this has come upon us; and worse than the Author anticipated. The Cuckoo's egg has hatched; and the foreign intruder has already thrown most of the nation's young out of the nest, to perish. Manufacturers, wholesale merchants, oil men, dealers in wheat, cotton, hogs, beef, and all the products of the country have been remorselessly pitched out of the nest, to perish, while the intruder takes their place.

But the Author did not dream of the impudence of the Money Power, in daring to commit the ravages it has perpetrated in devouring the business of our country, step by step. He did not dream of its entering the country, and making Americans its agents to aid it in devouring their countrymen. He expected oppression, but he did not anticipate such mastery as it has achieved. He was expecting the money lender's harassments; he did not realize the grasp of the mighty Imperialism, now throttling our country, and the world. He supposed they were merely English capitalists. He did not know that this Knot of Capitalists are the Great Red Dragon, the Seventh Head of the Beast, the mightiest Imperialism that has ever risen upon the earth; which is now controlling

That's highlights from part one of the three sections of the book. Also read this which also intersects on many topics.

"Money Kings are bent on getting all the business, all the wealth, and all the property of the earth into their own hands' they can only do it by bankrupting all the business men in the world, and reducing the great mass of mankind to the condition of serfs...

*is a cold blooded malignant beast.*

In this it strikingly resembles the Money Power, which is without either heart or conscience ; and which, in pursuit of its selfish aims, displays a cold blooded remorselessness, without a parallel in the history of the world.

The Money Power operates entirely through vast imperial joint stock corporations ; and, in such corporations, there is no place for human sympathy, or a sense of individual responsibility. Such a corporation has no conscience—no soul.—An individual is withheld from too flagrant wrong, by sympathy, by conscience, by a sense of moral responsibility ; but no one connected with the management of these grand Money Power Corporations feels any sense of personal responsibility. The stockholders feel none ; for they are away off in London, and do nothing but elect the directors. The directors feel no sense of personal responsibility ; for they are not principals, but only agents ; and they simply appoint the

officers and leave the management to them. The officers feel that they have no individual responsibility, because they are under orders, like the officers of an army, and are not acting for themselves, but for the directors and the stockholders. They come to feel that their only duty is to take care of the interests of the corporation.—The management of these imperial corporations is utterly selfish, without a tinge of sympathy or generosity.

This does not apply to ordinary business corporations, where individuals incorporate themselves into a company

in such an incorporation, and it is free from objection. In such corporations, conducted as individual enterprises, on a moderate scale, the sense of justice influences the minds of the stockholders, and pervades the management, as much as in the individual management of business.

But an imperial system of corporations, bent upon attaining a universal control of industry, and a universal monopoly of wealth and property, like an ambitious conqueror, is utterly selfish and remorseless. The cold blooded heartlessness of these Money Kings is glaringly displayed in the entire course of the Money Power. Its whole course is a black night of oppression, injury and wrong. It is as useless to attempt to particularize, as it is to seek the darkest cell in a dungeon, or the foulest corner in a lazar house. The Money Kings are bent on getting all the business, all the wealth, and all the property of the earth into their own hands: they can only do it by bankrupting all the business men in the world, and reducing the great mass of mankind to the condition of serfs, subject to their will, and dependent upon them for bread; and they are pursuing their aim of the subjugation of mankind with ruthless energy.—The Money Power is as cold blooded, pitiless and malignant as a snake.

---

...subject to their will, and dependent upon them for bread; and they are pursuing their aim of the subjugation of mankind with ruthless energy. The Money Power is as cold blooded, pitiless and malignant as a snake."

"The whole course of the Money Power is of fraud, falsehood, trickery & treachery, comparable to nothing but a serpent crawling on its belly. Its career is a living lie, as it systematically hides behind its agents, pretending they are the owners of the business they control."

*crawls on his belly.* The curse of baseness was fixed upon it at the beginning.

The whole course of the Money Power is a tissue of fraud, falsehood, trickery and treachery, comparable to nothing but a serpent crawling on its belly. Its career is a living lie, as it systematically hides itself behind its agents, pretending that they are the owners of the business they control. Like the garroter, it throttles and plunders its victims in the dark. Like the gambler, it entices its victims to bet in its gambling hells, the Boards of Trade, upon the rise and fall of stocks, and the rise and fall of produce; while it holds the game in its hands, and stocks the cards for the robbery of its victims. It is a slugger, whose purse, filled with gold, is its sandbag, with which it strikes down in the dark its victims, in all the busy avenues of trade. There is honor among thieves: the robber is true to his "pal;"—but the Money Power systematically plunders its partners, freezing out minority

#### CHARACTERISTICS, CONT'D: DESPICABLE, MALIGNANT. 185

stockholders, and all men who take part in its enterprises.

It knows that if the world knew of its system of plunder, mankind would rise up against it: it therefore robs through agencies, and makes agencies the "cribs" where it hides its plundered goods. Its whole career, from the first, has been a tissue of lying, robbery, fraud and concealment. It has acted falsehood in the past, to hide its trail: And

world, it will no doubt attempt to escape, like the scuttle fish, by making the waters around it inky black with falsehood, causing its minions to swear in the columns of the press, that its existence is a myth, that the discovery of it is a “mare’s nest,” and that this exposure of it is all imagination.—The Money Power is always a snake crawling on its belly. Its whole life is a living lie.

"This Great Dragon, the Money Power, is so vast, that it can never be gorged to repletion. It is devouring industry, trade and property, all over the earth, and it never has enough."

*devourer.* The Boa Constrictor, when it has devoured a sheep or a deer, remains torpid until its meal is digested: then it lives for nothing else but to lie in wait, watching for another victim. Its whole sluggish life is absorbed in devouring.

So the Money Power is a devourer of industry, commerce, wealth and property. It lives for nothing else but to accumulate. It differs from a Boa Constrictor only in its inordinate size. A Boa Constrictor, if it swallows a sheep, is torpid for a time, till its meal is digested;—but give it a mouse, and it is still hungry and wants more. This Great Dragon, the Money Power, is so vast, that it can never be gorged to repletion. It is devouring industry, trade and property, all over the earth, and it never has enough. The inspired prophet, speaking of this Money power, says, “He enlargeth his desire as hell, and he is as death, and can not be satisfied, but gathereth unto him all nations, and heapeth unto him all people.”

We have seen how the Money Power is devouring all

## 176 DRAGON, SYMBOL OF MONEY POWER.

over the earth. It is devouring in Europe—in India, and all over Asia—in Egypt, South Africa, on the Congo, and wherever Africa is penetrated—in South America—in Mexico and Central America—in Canada—in the United States—in Australia, and the Isles of the ocean. Everywhere it is devouring the industry and wealth of the earth. It aims to devour all industry,—all manufactures—

...and, import and export, internal and foreign, wholesale and retail—all transportation—all mines, of coal and iron and silver and gold—all oil wells—all city property—all farms—and all the wild lands of the world.

"the Money Power is sly and secretive in its methods, and steals upon its victims secretly, and destroys them without noise or struggle. The secret sly methods of the Money Power are exemplified in every assault it has made upon our industries."

**Second Parallelism of Character :—***Unlike the lion or the tiger, which spring upon their prey with a roar, so that all the neighborhood knows when the victim is destroyed, the Serpent steals secretly upon its victim, and seizes it noiselessly.*

So the Money Power is sly and secretive in its methods, and steals upon its victims secretly, and destroys them without noise or struggle. The secret sly methods of the Money Power are exemplified in every assault it has made upon our industries. Thus it stole upon the merchants of New York City—the oil well owners of Pennsylvania—the operators in beef, pork, cotton and all the various business enterprises it has devoured. So silently, so stilly is it now stealing on the cattle ranches—the coal mines—the retail merchants—the breweries—the flour mills—the farmers—and all the business interests it is now devouring.

"the Money Power has charmed and is charming the world, with the lure of its money. It lures people from all over the world to its London den, to get money..."

MONEY POWER LURES, CRUSHES AND DEVOURS. 177

**Third Parallelism of Character :—***The serpent charms*

So the Money Power has charmed and is charming the world, with the lure of its money. It lures people from all over the world to its London den, to get money to build railroads, and water works, and gas works—and, in the end, all that was built with the money it devours.—It lures miners after money to develop mines: and it crushes the miner and devours the mine.—By starting a boom in cattle, it lures farmers, merchants, mechanics, to borrow money on mortgaged property and put it into cattle ranches: and then it devours the mortgaged property, and the ranches in which the borrowed money was invested.—By starting booms in cities and towns, it lures all classes who have property, to borrow money on mortgage and invest it in town lots: and then it devours both the mortgaged property, and the boom investment.

**Fourth Parallelism of Character:**—*Unlike the lion and the tiger, and all other beasts of prey, which rend and tear their victims in furious assault, the Boa destroys its prey by enveloping it in its coils, and crushing it.*

So the Money Power always envelops the industry it assails in the coils of its capital, and crushes it by constriction.—Thus it enveloped the oil industry—the New England Mills—the New York merchants—and all the industries it has devoured. In every instance, it used its immense capital in such a manner as to crush the operators instantly, as the boa constrictor crushes its victim in its coil.—The method of the Money Power is identical with that of the Boa.

The prosperity of The Money Power is the ruin of the human race. The Money Power is hostile to the well being of man beyond all despotisms that have ever existed. It is more oppressive than any national despotism."

## MONEY POWER, ENEMY OF HUMAN RACE. 191

Besides these Parallelisms, there are three others which show, especially, that

THE MONEY POWER IS THE ENEMY OF THE HUMAN RACE.

**Eighteenth Parallelism of Character:—***The serpent is the immemorial enemy of the human race.*

So also, a necessary antagonism exists between the Money Power and the human race.

**The People Can Only Prosper by Doing the Business** which the Money Power is doing, and covets to monopolize entirely. If the individuals keep the business, they prosper, and their countries flourish;—but the Money Power, under such conditions, will languish. On the other hand, if the Money Power takes the business, those who had it before are reduced to poverty, just in the degree in which the Money Power flourishes. *The prosperity of the Money Power is the ruin of the human race.*

**The Money Power is hostile to the well being of man** beyond all despotisms that have ever existed. It is more oppressive than any national despotism. A despot rules by law, and makes specific exactions by taxation. No despot desires to break down people in business—to plunder them of their property—to reduce them to bankruptcy—and to appropriate their property to himself. No despot enters the home, to take it from the owner.—The Money Power does all this. **It crushes individuals: it oppresses people en masse. It cheats: it swindles: it extorts: it plunders: it destroys: it devours.**

The Minotaur, a monster which, every year, devoured a shipload of victims which Athens was compelled to fur-

But the Money Power is worse than the monster. That monster was kept in its den, and could only devour the victims brought to it. The Money Power is an immense Serpent, going at large, and devouring all the victims it

192

DRAGON, SYMBOL OF MONEY POWER.

can find. More, it is a Crowned Imperialism, which controls governments, and is above all law. It bankrupts the merchant, the manufacturer, the miner, the farmer; and drives them and their families out from their homes into the world, beggared, and perchance to die heart-broken and despairing.

**The Money Power is worse than any despot** that ever reigned. The despot is restrained from excessive wrong and oppression, lest the prosperity of his people be destroyed.—But it is the aim of the Money Power to destroy the prosperity of all persons engaged in independent business; in order that, amid the ruin it works, it may ravage, and devour industry and wealth.

**The Money Power is worse than any monster** that ever roamed the earth, or was conceived by human fancy. For the monster needs only to devour a few, to appease its hunger;—but this Serpent is so huge, that it encircles the earth with its folds, and the ruin of nations can not appease its insatiable appetite to devour.

**Were a wild beast abroad, destroying as the Money Power destroys,** masses of men would gather to hunt it to death.

**Were a despot to oppress and ruin his people,** as the Money Power is oppressing and ruining our country, he would be blown up with dynamite, or his head would be brought to the block, in less than a year.—The Money Power, like the Serpent, is the Arch-enemy of the

**Nineteenth Parallelism of Character :—***The color of the dragon is RED.*—This is a *lusus naturae*. Nobody ever saw a red snake. There must have been a special appropriateness in the color here, for it to be applied to the serpent.

This color always, in the book of Revelation, indicates that the power symbolized by a red color is a cruel, bloody

"For the Money Power is a great destroyer - perhaps the greatest destroyer of human life, of all the despotisms that have arisen on the earth."

#### MONEY POWER A DESTROYER.

193

despotism. And indeed the red color was indispensable, in order to indicate the bloody character of the Money Power. For the Money Power is a great destroyer—perhaps the greatest destroyer of human life, of all the despotisms that have arisen on the earth.

But it does not destroy its victims on the battle-field. It is described in the third vision of Daniel, where it is said of it: "*In peace, shall he destroy many.*" *Daniel vii: 25.* It does not strike its venomous fangs into the body, but the soul. It reduces its victims to want and beggary; and multitudes of them, in utter despair, turn their faces to the wall and die. Its victims have died—are dying—all over the earth.

Great Britain is the seat of its power; and there, by penury, and want and vain longing and despair, it is, every year, crushing thousands of the poor into untimely graves. I saw in London such poverty, and misery, such utter wretchedness, that the constant spectacle of suffering I could not relieve broke down my health, and I was compelled to leave the country before I had intended, in order to save my life. Among the London poor, you

hardly ever see a heavy heart. Poverty and want and hopelessness and despair drive them to untimely graves, long before time can furrow the brow or blanch the hair. The whole generation dies in the prime of middle life, destroyed by the conditions with which the Money Power surrounds them. They are as actually murdered as though the dagger were driven to their hearts. It is true, no blood is shed;—but the Serpent never sheds the blood of its victims—they die a bloodless death, crushed in its coils. So the poor people of Britain die, every generation, crushed to death by the constricting coils of the Money Power—crushed into direst poverty and want, till death comes to their relief.

India is completely in the coils of the Money Power.

"Money Power is an embodiment of Satanic selfishness, craft, cunning, skill, fraud, deceit, malignity and destructiveness. It constantly breaks down industry in its selfish greed : it destroys the prosperity of the whole earth, in the pursuit of gain : it crushes millions..."

of victims. They fall in the midst of peace. They die, and make no sign.—Well is this bloody destructive Money Power represented by the Great RED Dragon.

**Twentieth Parallelism of Character:**—*Inspiration drops the symbol at last, and calls the Dragon the Devil.*—The Devil was incarnate in the serpent, in Eden, to induce the fall of the human race. In the book of Revelation, Satan is represented as incarnate in the Dragon.

The Money Power is an embodiment of Satanic selfishness, craft, cunning, skill, fraud, deceit, malignity and destructiveness. It constantly breaks down industry in its selfish greed: it destroys the prosperity of the whole earth, in the pursuit of gain: it crushes multiplied millions of the human race: it overshadows the whole age with darkness.

It would destroy the dawning era of liberty and advancement now rising upon the world, as the serpent destroyed Eden. It would break down our grand Republic, and establish upon its ruins a mighty Despotism, to overshadow the hopes of man: it would, with Jewish hatred of Christianity, break down our churches: it would destroy our rising civilization, and reduce mankind to the condition of serfs, without the possibility of education or enlightenment: it would arrest the progress of the world toward the Millennium, and grind mankind beneath the heel of a despotism worse than that of the Feudal Ages.

The Money Power seeks to destroy our Republican liberties, and to bring the world under a subjection to its own grand Imperialism of wealth and monopoly; in which it, and its agents, will be the privileged Aristocracy, hav-

196

## DRAGON, SYMBOL OF MONEY POWER.

mass of mankind are its serfs, tilling its lands, and doing its work in the various departments of business life, and sunk into abject poverty, with all its concomitants of ignorance, vice and debasement.

Instead of allowing the human race to share in the benefits derived from the power of steam, it seeks to monopolize all those benefits to itself, and use them as a weapon to crush all individual industry, and to subdue the world beneath the imperial sway of its capital. It converts the blessings conferred by Divine Providence upon mankind into a curse. It seeks to introduce a new Feudal Era, in which it, and its agents, will parcel out the world anew, and bring back the wrong and oppression of the Dark Ages.

The iniquity of the Money Power surpasses human depravity. It is Demonic,—in its selfishness and greed—in its cold-blooded heartlessness—in its knavish trickery—in its bold robbery—in its cunning and craft and chicane—in its falsehood—in its lying concealments—in its malignity—in its murders of victims driven by ruin to despair and death,—*in all this—and in all its other unspeakable turpitude, and wrong and baseness, the Money Power is utterly satanic and devilish.*

"The Money Power always acts through joint stock corporations. The stockholders and bondholders of the various corporations all over the world, are in London. There is the Serpent's den."

porations. The stockholders and bondholders of the various corporations all over the world, are in London. There is the Serpent's den. The stockholders are hidden from the world in their den. The world only sees the directors and the officers of the corporations, and their hired operatives.—But as the stockholders make more money, they organize more corporations, and elect more directors, and more officers, and employ more operatives. So that the Serpent is constantly growing greater in its den; and as it grows in the den, more of its body crawls up out of the den, and becomes visible to the public eye.

"In Britain, Money Power is the power behind the Throne, greater than the Throne. It wields the power of the British government by controlling Parliament, and has been for more than a century. No matter what party is in power, all parties alike do the will of the Money Power."

the power of the British empire. In Great Britain, the Money Power is the power behind the Throne, greater than the Throne. It wields the power of the British government by controlling the Parliament, and has been doing so for more than a century. It is avowed that the British government is administered in the interests of the manufacturing and commercial classes. No matter what party is in power, all parties alike do the will of the Money Power.

We had, a few years ago, a remarkable instance of the subserviency of the British government to the Money Kings. When Disraeli was Prime Minister, the Tory Administration entered upon a new career of bold imperialism, in its treatment of other countries. This imperial policy of the Tories was stigmatized by the Liberal party as "Jingoism." Gladstone appealed to the moral sentiment of the Liberals, who are the most religious portion of the British population, against the "Jingoism" of the Tories, and unseated them from power on that issue alone. — But immediately after the Gladstone administration came into power, it outjingoed Jingo.

It happened that the Khedive of Egypt was unable to pay the interest on his debt to the Money Kings. Those capitalists appealed to the British government; and the Gladstone Administration at once proceeded to enforce their claims against Egypt. It did what had never been

"So long as a country which the Money Power has ruined can pay the interest on its debts—well.—But when it is reduced to bankruptcy, and can no longer pay the interest, it thereby forfeits its national existence..."

done before by the British government. It invaded Egypt, conquered the country, discrowned the Khedive, and administered the government in the interest of the Money Power. The British government debased itself to become "RECEIVER" for the Money Kings.

And this high handed outrage upon a weak state was justified before the world by the plea that it was necessary, in order that those imperial capitalists might receive the interests on their loans. And so thoroughly established is this grand Imperialism of Capital, that all the nations of Europe accepted this plea as perfect justification.

**A Principle is Established in this Transaction that is full of Menace to the Nations of the Earth.** It is now recognized as an established principle that the monetary claims of the Money Power are higher than the right to national existence!! So long as a country which the Money Power has ruined can pay the interest on its debts—well.—But when it is reduced to bankruptcy, and can no longer pay the interest, it thereby forfeits its national existence; and the Money Power has a right to have it conquered, in order to secure its debt!!!

This is the logic of the conquest of Egypt! It is well for the nations to ponder it!!!

**The British Government also Conquered Burmah**, three years ago, in the interest of the Money Power. The cause of the conquest was kept quiet until, last year, a Mr. Robert Sutherland, in making a trip from India to England, passed through the United States, and in an interview with the reporter of a New York paper stated the facts.

Mr. Sutherland stated to the reporter that he is "Resident Manager of the Burmah and Bombay Trading Corporation. one of the largest Trading Companies [of

said: "Burmah possesses the only Ruby mines in the

"If the Money Power is not checked in its career, it will carry out its policy to the full extent. It will bankrupt all the nations of the earth, and have them conquered, and their resources administered by a political imperialism in partnership with the Money Power..."

If the Money Power is not checked in its career, it will carry out its policy to the full extent. It will bankrupt all the nations of the earth, and have them conquered, and their resources administered by a political imperialism in partnership with the Money Power, which will act as "receiver" for bankrupt nations, as England has done with Egypt.—The people of that empire would, in the

"But there is a consequence of all this that the Money Power keeps out of view. By Means of these things, the Money Power is Rapidly Bankrupting Mankind, and getting all wealth into its own hands."

## 216 DRAGON, SYMBOL OF MONEY POWER.

The Money Power owns the telegraph lines, the electric light companies, the electric street car companies, and all the applications of electric force. All over the earth, it constantly "causeth fire to come down from heaven on the earth in the sight of men"!!

Who can doubt that the Two Horned Serpent is the Symbol of the Money Power?!

**Ninth Coincidence of Fact:—***The Two Horned Serpent "had power to do great miracles" or wonders.*

We live in an age of wonders. It is a common expression to speak of the "wonders of steam," the "wonders of electricity," the "wonders of mechanical invention."

And all these "wonders" the Money Power has set

the railroads—the telegraph lines—the telephones—the electric railway lines—the water works—the gas works:—and it has set in operation, by its capital, the thousand mechanical wonders in use in every kind of manufactures.

**Tenth Coincidence of Fact: —** *The Two Horned Serpent* “*deceived them that dwell on the earth as to those miracles [or wonders] which it had power to do.*”

This is perfectly fulfilled in the Money Power, which is now deceiving mankind as to the wonders it is working with its capital. It lauds itself as a great benefactor of mankind. The blessings of Capital are constantly held up before the public. We are constantly told that Capital is necessary to our civilization—that it is beneficent in its operations—that Capital is indeed men's chief benefactor—that the world cannot do without Capital. It is triumphantly asked, where would the world now be without the railroads, the telegraphs and the thousand inventions Capital has set in operation? We are continually reminded that the human race ought to realize the benefits it derives from Capital, and ought to be profoundly grate-

## DECEPTIONS OF MONEY POWER.

217

ful for them. And the inference is suggested that, in recognition of these benefits, mankind ought, in all things, to do the bidding and consult the interests of Capital!!

By these self laudations put forth through the press controlled by it, the Money Power is deceiving mankind.

It is admitted that the wonders Capital has wrought have been of the greatest benefit to mankind. No one would be willing to go back to the old days of stage coaches and tallow candles. We can not do without our

railways, and steamships, our telegraph lines, our water works, our gas works, our electric lights, our street railways, and all the appliances of our modern civilization.—But there is a consequence of all this that the Money Power keeps out of view.

By Means of these things, the Money Power is Rapidly Bankrupting Mankind, and getting all wealth into its own hands. There is more work now being done by steam than could be done, with old methods, by five such races as now people the earth. The Money Power has taken possession of steam, and mechanical inventions; and it is making all the profit derived from those sources.—Let a small knot of capitalists make all the profit on the labor of five such races as now people the earth—let them make it, not for one year or one generation, but for ages; and let them constantly reinvest, and enlarge their operations; and let them invest their profits, age by age, in property of all kinds:—and it is only a question of time, when they will do all business, and own all property.

"It is the aim of the Money Power to get all industry and all business into its hands, and reduce all mankind to the condition of its paid servants, branded in the hand, or on the forehead, with the badge of servitude."

new and better order of things, in which the operations of steam and invention, instead of inuring to the exclusive benefit of the Money Power, shall be used by the people of every country for their own national and individual prosperity.

---

Mankind is slow to accept a new thought, and some persons may be unwilling to believe that the Money Power is thus taking possession of all the property of the world. But divine Inspiration declares that such is its purpose:—

**Eleventh Coincidence of Fact.**—*This Two Horned Serpent “causeth all, both small and great, rich and poor, free and bond, to receive a mark in their right hand or in their forehead; and that no man might buy or sell, save he that had the mark, or the name of the beast, or the number of his name.”*

This “mark” is the brand in the hand or on the body, by which slaves were marked, in ancient times. It is the aim of the Money Power to get all industry and all business into its hands, and reduce all mankind to the condition of its paid servants, branded in the hand, or on the forehead, with the badge of servitude.

A very intelligent man, after hearing my lecture, suggested to me that the “mark in the hand” designates the multitude of operatives who render manual service to the Money Power; while the “mark in the forehead” designates those who render to the Money Power brain service.

"This is the greatest crisis the world has ever known. Upon its issue depends the destiny of mankind forever... mankind reduced to the condition of serfdom beneath the yoke of an Aristocracy of Jew Money Kings, who will grind man down beneath the heel

and our country is ruined. The grand yeomanry of our country is our pride and safety. It is the backbone of the Republic—the strong column that upholds the temple of our liberties and our Christian civilization. Let our farmers lose their farms, and our yeomanry become peasants, and all is lost.

This is the greatest crisis the world has ever known. Upon its issue depends the destiny of mankind forever. It will determine whether the world shall go on to a millennium of liberty, peace and blessedness, or be crushed by the triumph of the forces that are striving to arrest the progress of our age, and bring upon the world

#### IMPORTANCE OF PRESENT CRISIS.

245

a new Feudal Era, in which the mass of mankind will be reduced to the condition of serfdom beneath the yoke of an Aristocracy of Jew Money Kings, who will grind man down beneath the heel of oppression forever.

For, that yoke, once fixed upon the world, can never be shaken off. The Money Kings, with a mighty government under their control, would keep the masses of mankind reduced to the condition of peasants in hopeless bondage. In this age of warfare with cannon and gunpowder, an unarmed peasantry could never cast off the yoke of the Money Power, in control of the government, and having possession of all wealth.—There are two Millenniums before the world: one, a millennium of peace and blessedness, under the reign of Liberty and Religion;

rule of the Money Power. The present crisis will determine which shall dominate the earth, from now to the end of time. The destinies of the Future are now hanging in the balance. Either the Money Power must go down, or the hopes of humanity must set in darkness.

Well is the Money Power called Satan, for it is the very incarnation of Satanic malignity and evil.

Skip Parts 2 \& 3, just Part 1 is enough.
