## CROWDSTRIKE RETURNS AND THE COLLAPSE BEGINS

July 26, 2024

Full transcript of this video interview starts on p. 7

This may be the most engaging and mind-blowing 90 minutes of vital information that I've ever seen on video and I've transcribed it, in its entirety, below.

Douglas Gabriel and Michael McKibben discuss the "CrowdStrike Outage" within the context of the little-known history of the internet's encryption technology and the role of Dmitri Alperovitch, to explain what's happening, which they believe is the harbinger of extremely repressive times ahead, with

the impending economic collapse and the imposition of the Social Credit Score and CBDC slave system on humanity.

A little background, here, for those not familiar with [AIM4Truth.org](http://AIM4Truth.org) and the story of McKibben, Founder of Leader Technologies. Michael claims that he was the original developer of the source code that enabled the scalability required to create social media and that this was stolen from him by Mark Zuckerberg, who was attending Harvard University at the same time as his son – a long story, which you can read about [HERE](#).

For years, McKibben was engaged in [forensic research](#) to produce indictable evidence for his [case against Facebook](#). Several times along the way, he and his team were absolutely floored by their discoveries about how the world actually works in the spheres of high finance, governments and communications.

A finding around 2018 left him particularly flabbergasted: Hillary Clinton and her cronies have access to all of the Digital Keys for all transactions on the planet. In other words, unless you can build a new internet, you – and say, your cryptocurrencies, for example – are accessible by them. This is literally how they can (and do) “turn off your chip”, in the famous words last of the late [Aaron Russo](#).

**Here are some highlights from their revelations, below:**

- The father of CrowdStrike Founder, [Dmitri Alperovitch](#), Michael was a top nuclear scientist and cryptologist in Russia, who defected to the US with his family in 1994 with a job at the Tennessee Valley Authority (TVA), the home of the United States' Atomic Secrets.
- The TVA turned over to Michael the preliminary experiment with what is now called the [Federal Public Key Infrastructure Architecture \(FPKIA\)](#), which is basically the cryptological codes to get into anything online; military, corporate, domestic, international, etc.
- These Public Key Encryption (PKE) codes are currently under the complete control of Hillary Clinton, Robert Mueller, Michael Chertoff and Dmitri Alperovitch.
- Thus, there is no such thing as a secure system on the internet.
- Young Dmitri gained fame as the world's greatest hacker but he was actually using his father's codes. He did corporate hacking and phishing and ransomware and he eventually got arrested (although you won't see this is not on his Wikipedia page).
- Being that Dmitri had access to the Public Key infrastructure and could open anything, this led to his being hired by James Comey to work with John McAfee to expand [Total Information Awareness \(TIA\)](#),

which was essentially about channeling every digital communication into one stream; stringing together all the computers in the world into one source.

- Although officially defunded in 2003, due to public outcry, TIA’s core architecture continued development, under multiple projects, such as [PRISM](#), which is datamining all communications to create a “Dark Profile” on every individual; everything you say, everything you buy, for the implementation of a Social Credit System, which anybody who’s been kicked off of all social media, such as myself, knows already exists, it just hasn’t been fully implemented, yet.
- Dmitri had access to everything and helped start the war in Ukraine in 2014, where he gave out the codes to websites spoofed to look like the Ukrainian Military Artillery Unit and he gave other access to the Russians – which they thought they had spied and “discovered” – giving conflicting information on Global Positioning Satellite data, causing the Ukrainians to bomb their own people, killing tens of thousands in Donbass. Douglas says, “This was a War Crime – unbelievable, unbelievable, in history – even the Russians got fooled.”
- [The 2015 Office of Personnel Management Data Breach](#), that was attributed to “China” was actually done by Dmitri Alperovitch, using his father’s codes.
- Obama, knowing all of this, would only hire CrowdStrike to do all cyber security, both corporate and Military when he was in office for eight years.

- It was Obama who invited Dmitri to be the only person to look at the DNC server when they said they were hacked. Only CrowdStrike – Obama’s favorite and only cyber security company – was allowed to go in and look at the DNC. They did an analysis over the phone with their proprietary system called “Falcon” and found that the “Russians” had breached their system but they had not exfiltrated anything – but they could, if they wanted.
- Douglas says, “They weren’t hacked. They had their #1 Guy, who had seen both sides of Hillary Clinton’s template for winning the election, which was on the DNC server and on her server – and by the way, they didn’t tell Hillary to stop using her server after they saw that everyone had access to her server, because Huma Abedin, who now is the [fiancée] of George Soros’s son, Alexander Soros – she was using the password “PASSWORD”, so everyone in the world was getting everything that Secretary of State Hillary Clinton was doing.
- “Why? Because, she was trading guns through the Secretary of State, using not only OPEC money but Secretary of State money and Department of Defense money [and USAID money]. So every country she went to – over a hundred, while she was Secretary of State – she gave weapons to, without anybody’s permission and she got donations to the Clinton Foundation.”
- The official story about the CrowStrike outage, that it was “a simple mistake” by some software engineer, is a lie. Moreover, Michael says it should be called the “CrowdStrike-Microsoft outage”, because it could not have happened without Microsoft’s cooperation.

- CrowdStrike is an evil player against America and Dmitri Alperovitch is a Major League psychopath.
- Douglas predicts it will probably come out in a year or two that Dmitri/his cohorts (Hillary, etc) are the ones who gave the orders for this “update”/crash, because they had to set up the avenues to pull down and to delete the information that could condemn them.
- The Cabal/Pilgrims/”mother-WEFers” are planning an Avian Flu Plandemic that’s 10 to 100 times “worse” than COVID, suggesting \$100 trillion in economic losses, considering that COVID caused an estimated \$3 to \$5 trillion in losses – not including the lost businesses that never came back.
- The CrowdStrike outage is actually an economic attack. Douglas says, “The Reset is now. The Cyber Polygon, it’s now and it’s going to get worse, by the way. This is just the beginning and the economic collapse is here – and they want to blame it on Trump.”
- The CrowdStrike attack is costing an incalculable billions per day.
- The Bank for International Settlements has agreed to be the Clearing House for BRICS, which means the American dollar can now fall, because they have a new medium and someone to do the clearing for the Big Oil deals.

- A communications clampdown is coming. They already arrest people in Europe, Canada and China for saying one forbidden word on social media. Journalists are already being arrested in Germany, Brazil, Russia, China, for simply practicing journalism.

- America’s greatest enemy, by far is the British Crown, via the Pilgrims Society and their minions in the [Senior Executive Service](#).

- Michael’s solution to this is his “Quantum-Proof” [MySQIF Privacy App](#), which he assures us, “Absolutely cannot be hacked and in fact, mathematically, it will take three lifetimes of the Universe [10+ billion years], currently to hack one of your files that you send in that way.” It is now available for PC running Windows. If you want to exchange files privately, this is the way to do it and they cannot be cracked.

- Douglas says we are living through the most prevalent evil in history. The purpose of this communication is to get the word out, so you can get good with God and your spirit can rise above these demonic times.

**Douglas Gabriel:** Welcome to the Mike and Doug show. I'm Doug. Hi, Mike.

**Michael McKibben:** Hey, Doug how are you, today?

**Douglas Gabriel:** Well, I'm good, because I always love to be able to say, "We told you so" – and Boy, did we tell you so! Not only did we tell you so, we've told you so many times, we're going to tell you again! And maybe, if you're still dreaming or in a trance consciousness, you might wake up.

CrowdStrike is an evil, evil player against America and Dmitri Alperovitch is the person we're going to focus on – but like we always do, we're not going to just tell you the bad news, we're going to tell you the solution and the way out – and that's what Michael McKibben's come here today to say.

**Michael McKibben:** Yeah, isn't that amazing, how this young company grew to be this Behemoth within a decade? I mean, that just doesn't happen unless you get help.

**Douglas Gabriel:** We are the only people who can tell you how that happened and I'd be glad to tell you now. Oh, you'd like to know? Well, then I'll tell you:

Michael Alperovitch, Dimitri's Daddy was the #1 nuclear scientist and cryptologist in Russia. He defected, first to Ukraine and then, to Canada and then, to America and later, he and his son, Dmitri became, in fact American citizens. Go and read Wikipedia, it'll say three times that Dmitri is an "American citizen".

Why? because he worked against Russia from Ukraine – and you probably noticed that the Trump tweet from the Old Days – and also, the conversation with Zelenskyy, the transcript from that asks about “a billionaire”, it asks about “CrowdStrike” and it asks about “the server”, OK? ...

There were three servers involved. I don't want to get into Bashears' server (?) and Imran Awan, which was a Pakistanian complete overtaking of the House and the Senate, completely – 100% everything was, in-the-clear being sent to Pakistan.

But the DNC and all that, it's complicated but we have explained this and we've attached an article along with this video, so that you can go back and see that what we told you when it was happening is basically a predictor for what happens now.

But it didn't take a genius to listen to Klaus the Slob and His World Economic Forum prediction of a [Cyber Polygon](#) happening in 2024. He also said that “The Reset” would happen at that time, right?

And so, it's happened, Folks! I predicted some time ago – multiple times – about Trump and the astrological aspects going on, now. Mars is conjunct Uranus in the Second House and basically, that means there's going to be a huge economic effect, probably a crash, like an explosion that would happen three days before or three days after July 15th and 16th.

Well, on the 19th, we got to see Cyber Polygon, which they had already done one simulation after the next with the World Economic Forum. This has been, they knew this was going to happen it's like the new Avian Flu.

It's not Avian Flu . There's no such thing but they were already having meetings, now to prepare for the "next pandemic", right,, just like they had the previous pandemic. So, they have this all planned-out.

Now, who are the people? It's just like the Vatican taught them, it's just like the Venetian Banker is taught: you have to have one person in charge and then, you have a very small group around them of about three people or so and then 10 around them, that then control the 10 different sections you've divided everything up in.

And we pointed out, it's the Pilgrims Society and we pointed out who those people are but Dimitri Alperovitch and his father, when they came to America – this is so beautiful – he was a a Defector from Russia and they allowed him into the the TVA, the Tennessee Valley Authority, where all of our Atomic Secrets are and they turned over to him what was basically the preliminary experiment with what is now called the Federal Bridge Authority Public Key infrastructure, which is basically all the cryptological codes that you can get into anything you want; military, corporate – doesn't matter – internationally – does not matter.

You can get into anything that is connected to America, especially through commerce and especially through the internet. So, Michael Alperovitch not only started working and arranged the deal – I believe he was personally arranged the deal for Megatons to Megawatts, which was, basically Russians coming over here to disassemble their own Russian nuclear warheads and turn them into atomic energy for America.

I mean, does this make any sense to you, Folks? But this is these are facts and we've proven all of this!

**Michael McKibben:** Well, it does when you know who's driving the bus!

**Douglas Gabriel:** Exactly.

**Michael McKibben:** Up until then, you don't know.

**Douglas Gabriel:** Barack Obama – fake Barack Obama – he's not even an American. He never was and he doesn't have citizenship. He never applied, just like Kamala, just like so many of the people in and around the White House are actually foreign agents! These people!

Obama would only choose CrowdStrike to do all cyber security, both corporate and Military when he was in office for eight years. That's a fact – and then, it was turned into – which you pointed out – Eric Schmidt's US Digital Service and they had a template for winning the election, which they gave to Hillary Clinton, which was created by – please remind me?

**Michael McKibben:** Well –

**Douglas Gabriel:** Which Russian?

**Michael McKibben:** Hillary paid for Dimitri Salenko [?], I believe.

**Douglas Gabriel:** There you go – in India – but wasn't he, like Ukrainian or Russian or something?

**Michael McKibben:** Well, he worked in the US but he went over to India to actually do that template for Facebook.

**Douglas Gabriel:** So, what was on the DNC server, that CrowdStrike came in and with their proprietary secret program that goes in and can tell if anybody has broken in and breached your system and exfiltrated anything – and remember, CrowdStrike's total assessment of the DNC server, which was the beginning – that was the spark that started Robert Mueller's Star Chamber Special Council Investigation, which was a reset.

**These are resets. When they get caught, they have to have some big event to pull in all the witnesses, get everybody into a Star Chamber, when you have a Special Council. Those people don't have a lawyer with them and if they testify, then Robert Mueller was able to give them immunity. He gave immunity to everyone involved.**

**Michael McKibben:** Wait a second, that sounds like the Queen’s Court.

**Douglas Gabriel:** Oh, it is the Queen’s Court! And remember, all lawyers in America and over 50% of the Founders of America had taken their vows to the Temple Bar in the City of London.

Oh well. Why do we allow any lawyers in politics? Why do we allow any corporations? Why do we allow any to get involved in politics through lobbying

**Michael McKibben:** And our all of our attorneys and judges are members of something called Inns of Court, which are spread out all over the United States and those Inns of Courts are ultimately, directed out of the City of London in the inner Temple of the the Courts in England.

**Douglas Gabriel:** And wasn’t it Huber who was appointed to look into all these criminal charges against Andrew McCabe and James Comey? And what did he find? He found that they were all Guilty – but so what? They did nothing. And he was the guy who went around telling judges how to make their determinations and their judgments, based upon what he told them to do.

It comes down to, literally, a handful of people who know what’s going on, right? And the rest of us are being duped, because we believe mass media and that’s the problem. If you hear it a hundred times, you begin to believe it, OK? Especially if it’s the exact same words, which you see in all mainstream media it’s all coming from a British-driven – or a company that’s in Britain – that was owned by a corrupt

senator in America that basically puts everything on the news and that's the reason they're all reading the same script and they saying it's from the AP or it's from –

**Michael McKibben:** Well, the term, “Mocking Bird Media” is the term that now we use to describe that group and that's exactly what they are. I'd like a bunch of – I'm going to change the metaphor – bunch of lemmings marching in lockstep, whenever they have something to say. And when you see that, you know what they're doing is lying.

**Douglas Gabriel:** Yeah, now you and I and Tyla are the only people who seem to know this and we know it, because we have the proof and we put the proofs out there for you to read years and years ago and nothing has changed. None of our predictions have changed.

We predicted that CrowdStrike would continue to be the most manipulative cyber security company in America that has taken over America and that's a fact, Folks. Just look.

And you'll see that now, his new company, Dmitri Alperovitch's new company, Silverado is basically doing, now the absolute inner controls that tells CrowdStrike and CloudFlare –

**Michael McKibben:** Or [Entrust](#) and there there's a whole string of them, all run by either Hillary Clinton or Robert Mueller or Michael Chertoff or Dmitri Alperovitch. It's a small group of people that run the PKE infrastructure, which is Public Key Encryption.

**Douglas Gabriel:** It's the crypto codes and we pointed this out before: why would we let Michael Alperovitch come into America, get into our Nuclear Program and then, write the crypto codes for everyone at that time in America? Corporations and the Federal Government, the military – all of it.

And then his son – I love this! – this is the part I like the best: Dmitri Alperovitch just couldn't keep himself straight. He took his dad's secrets and started to become the #1 Hacker and breacher of security systems in the world. Why? Because he got the codes from his daddy.

**Michael McKibben:** He has the Public Key infrastructure. When you have the keys, you can open anything.

**Douglas Gabriel:** And what did he do? Remember, when it was found out that the Chinese had penetrated every system, from the Office of [Personnel] Management, to the Pentagon, to DARPA – you name it – every corporation in America had been penetrated by the Chinese?

Guess who that was? Dmitri Alperovitch! Period!

**Michael McKibben:** Exactly. The Chinese are a great Whipping Boy for a lot of these people, when they want to divert attention away from the British, who were running this.

**Douglas Gabriel:** And then, what happened? Well, Comey and his gang hired – and before even before Comey – they hired Dimitri Alperovitch to work with John McAfee. Ring any bells? That was the

largest cyber security system for a long time, in every single computer, practically that never gives up and keeps trying to sell you services you don't need and it's one of the biggest scam routines going on on the internet.

So if you keep having your malware tell you that, "You need this and that" and then they send you a bill and you accidentally clicked on something, they're going to charge you 600 bucks for an update.

**Michael McKibben:** Yeah, they all those malware companies all end up loading McAfee. It's amazing how often you have to rip it out, because you got a link to a McAfee installation.

**Douglas Gabriel:** Now, let's remember what McAfee was. We'll digress into the weeds for a second. McAfee started a company – but did he start that? Did he write it? No! He tells us when he went nuts and he went down to South America and started taking ayahuasca and married a native woman and came up here and was totally paranoid, saying he's going to get killed every day, on and on and on – what did he say?

He said, "There is no such thing as a secure system anywhere the face of the Earth."

**Michael McKibben:** Well, that's true.

**Douglas Gabriel:** Until now, with [MySQIE](#) – and that's not a system, it's a communication device, which we're going to give you the solution to all of this in a few minutes.

But you have to hear this story, because, if you don't know this, Folks, you forgot your history and you're being duped into the same exact mistakes. But we predicted this would all happen, because Klaus Slob and the rest of the billionaires, who all fight against each other – they're no cooperative group – they all fight against each other. They all want control.

Now, Dmitri Alperovitch then got caught by the FBI and they charged him, because he went off on his own and didn't just do the Chinese hacking, he started doing other corporate hacking and phishing and doing ransomware and all this kind of crazy stuff, right? So they arrested him. They put him in jail and then the FBI came and said, "Hey, look, you know, you're pretty good at this you want to work for us?"

So they hired him. Who was his best buddy? John McAfee. They created Total Information Awareness, which was basically channeling every digital communication in America into one stream and this had already been done before but this was an amplifying of that. And so, Total Information Awareness is all driven by McAfee Security Systems and CrowdStrike and all these other ones; Entrust and the other ones we've mentioned, OK?

So, he starts working for TIA. Why? Because he's got the crypto codes his Daddy wrote.

Now, why would we allow all the crypto codes to be produced by a man who got them? Where did Michael Alperovitch get them? He wasn't a cyber security expert he was a nuclear expert. He stole them from Russia.

**Michael McKibben:** I think what we need to do is back up and realize what the crypto codes are for. And if we think there for security and privacy, we have been totally hoodwinked, because, in fact, what they've been, since the advent of communications – which, what goes back millennia; 6, 7, 8, 9, 10 millennia? – ever since human beings have been communicating with each other, one group wants to get a leg up on another group and so, they create something called “encryption”, which are called “substitution ciphers”, where if the letter is dog, D-O-G, you replace that was some replacement for D, the O, the G and then you you hand that out and nobody knows what you mean.

Say it's ABQ, so that means “dog”. So anyway, that's not new. What is new, now, with the advent of computers and the ability to do this more quickly is the the type of communication that occurs in the internet world, which is binary communication; zeros and ones – lends itself well to different forms of encryption.

But here's the problem: ever since we had bankers who wanted to keep their secrets, coming out of Babylon and even before that and to get a leg-up on the on the citizenry and use their lawyers to maintain their advantage, we've had spies and bankers and politician who have worked to control encryption.

And so, therefore, we have this very base sin built into all of our encryption methodologies that goes way back – millennia – and so what we're now seeing is the latest fruit of the idea that we're supposed to be protected with encryption. But the fact is, we're not.

And so, spies have been embedding backdoor keys into how this encryption works, so that those in the know can always stay a leg-up on everyone else, no matter what they're doing; stock trades; buying and selling, communicating secrets; trade secrets, private conversations, healthcare information – you name it – there are prying eyes and ears that want to know that about you – and have used encryption as a way to get at that, at will and that's what Alperovitch is a part of, as was McAfee, as was everyone involved in encryption.

**Douglas Gabriel:** Absolutely and they put a backdoor in, just in case they couldn't break the codes, so they could just go in and take.

**Michael McKibben:** They always have two or three ways – in all the encryption systems, there's always two or three ways to get in, not just one.

**Douglas Gabriel:** Yeah. Some of you probably have heard me say this before. I was a cryptologist. One of the – at the time – highest-ranked Spec 7 Cryptologist in the NSA and I understood, at that time –

**Michael McKibben:** So, can I just clarify for most people what that means? That means you had President's Eyes Only Clearance.

**Douglas Gabriel:** Which is higher than Q, by the way. Yes, that is correct but I didn't know the exact way to do – see, I was a software programmer by the time I got out of high school. I had an Associates'

Degree in Computer Programming in 1972 and that's why I got taken into the NSA and I got to see what they had, at that time and went right up the ranks.

But the point is, is that until I met Michael McKibben, I didn't know – even though I had seen Cisco Systems putting in every server a backdoor – a hard, mechanical backdoor – every server that ever left through Cisco.

At one point, Cisco used to brag “98% of all communications across the internet go through a Cisco server”. That's what they used to brag. That's not true now. It's Microsoft, Apple and Linux. And Microsoft got hit, because of a CrowdStrike update. Now, you've probably heard this.

Now, Dmitri Alperovitch is no fool, because he's on the Atlantic Council, which is the #1 Propaganda Machine against the Russians and he works out of Ukraine.

And the reason Trump said, “Could you tell me about the billionaire?” – and that was [Fridman](#), who he was talking about in Ukraine – who was backing Dmitri Alperovitch in CrowdStrike, because at that point, even before the DNC server, according to Trump he thinks it went to Ukraine, what he was saying is all the corruption Cozy Bear and Fuzzy Bear the two Russian GRU groups that supposedly breached the DNC server, those were all fake. That was complete nonsense.

And only CrowdStrike – Obama’s favorite and only cyber security company – was allowed to go in and look at the DNC. They did an analysis over the phone with their proprietary system called “Falcon” and found that, “Yes, the Russians had breached their system but they had not exfiltrated anything – but they could, if they wanted.”

They built in the systems to exfiltrate, as they would please in the future, right? So, if you read the two-paragraph nonsense that Dmitri Alperovitch, himself produced for the United States Government, as a report to the Robert Mueller Star Chamber Special Counsel – by the way, the Supreme Court said that is illegal; you can’t appoint someone who’s not part of the DOJ to be a Special Counsel.

That was nothing more than a reset/sweep under-the-rug of all the evidence that they can collect, just like Hunter Biden’s recent trial – all of these things.

Anytime you see – it’s like the Warren Commission or it’s like the Chinese investigation into 9/11. Please! It’s nonsense! it’s absolute insanity but the point is, let’s go back to Dmitri. So, Dmitri – before CrowdStrike was asked to look at the DNC server – had been turned to work for the FBI and he had complete access to Total Information Awareness.

In other words, he could tap into any system, anywhere, any place because his dad knew the Russian codes and basically, built them into the American codes and he knew the difference – and also Chinese codes.

So essentially, Dmitri had access to everything, at that point. So what did he do? He helped start the war in Ukraine. No, not the war with Russia that we're talking about now – the first war.

He gave out the codes to sites that had servers that acted as if they were the Ukrainian Military Artillery Unit and then, he gave other access – which the Russians thought they had spied and found this access – to the Russians and then he gave conflicting information about Global Positioning [Satellite] information about where to bomb.

And what happened? The Ukrainians ended up bombing their own people. Killed tens of thousands of people in Donbass in the two Donbass regions. This was a War Crime – unbelievable, unbelievable, in history – even the Russians got fooled.

But that's the reason the Russians didn't have any problem going into Donbass, because Dimitri Alperovitch, working through Yanukovich later, Poroshenko, later and now, Zelenskyy is using Ukraine, the well-known worst, corrupt nation on the face of the Earth, where everyone in DC gets a piece of the oil action and the action going on – now, you can see BlackRock is going to rebuild Ukraine, right?

So what did he do? He committed a War Crime and then, Obama, knowing this, invited him to be the only person to look at the DNC server when they said they were hacked.

**They weren't hacked. They had their #1 Guy, who had seen both sides of Hillary Clinton's template for winning the election, which was on the DNC server and on her server – and by the way, they didn't tell Hillary to stop using her server after they saw that everyone had access to her server, because Huma Abedin, who now is the girlfriend of George Soros's son, Alexander Soros – she was using the password "PASSWORD", so everyone in the world was getting everything the Secretary of State Hillary Clinton was doing.**

**Why? Because, she was trading guns through the Secretary of State, using not only OPEC money but Secretary of State money and Department of Defense money. So every country she went to – over a hundred, while she was Secretary of State – she gave weapons to, without anybody's permission and she got donations to the Clinton Foundation –**

**Michael McKibben: And USAID money, which used.**

**Douglas Gabriel: That's the one I was thinking of: USAID couldn't think of USAID.**

**So when Comey didn't investigate the Clinton Foundation, who literally keep all the money except 4.5%, supposedly is used for the purposes of that Foundation – not for-profit foundation, tax-free Foundation – is used.**

**She got donated so much money that I'm not even going to go into it but Andrew McCabe took all five cases after Comey was fired, bundled them up, lied, got caught lying five times in hearings and then dropped all cases after they sent an airplane to Little Rock, Arkansas to gather up all the evidence of Hillary Clinton's crimes as a patent attorney – which would also include Leader Technologies; the theft of their patents. What was the name of that lawyer firm she worked for? Anyway, one of the most corrupt ones in the world.**

And what happened is the FBI collected up an entire airplane full of evidence and we never got to see a spec of it!

**Michael McKibben:** Probably was taken to the same place Obama's evidence is in.

**Douglas Gabriel:** It all goes to the FBI. That's why they had to build a bigger headquarters, because they have all four of Hunter's laptops, they have Huma Abedin's, whom –

**Michael McKibben:** They don't need a big building to have four laptops!

**Douglas Gabriel:** No, no! This is nothing. They have to they have all the evidence! Rose Law Firm in Little Rock, OK? That's who she worked for.

Now, that evidence is what the FBI always collects, anytime they need evidence. Now, I'm going to tell you, in a minute I'm going to hit the nail in the head why CrowdStrike did this now. There's a very good reason they did this now, OK? But I'll get there in a second.

Dmitri Alperovitch, then was hired by the FBI – after the crimes in Ukraine, after the false reports at the DNC. Hillary never gave up the DNC server, because it had the template for winning the election, which was illegally paid for with United States Government tax funds –

**Michael McKibben:** And it was Obstructing Justice in our patent suit against Facebook.

Douglas Gabriel: Correct. Now, oh! Isn't that interesting? Seth Rich was killed because this he said he was going to turn in the evidence from both sides, because there were two sides: There was the side for the template for winning, which is all corrupt and fraudulent and then there's the economic side, which they went in and they hacked all the Republican Convention's information, stole the list every list they had, used it against Bernie Sanders, didn't give Bernie the money – and remember, at that time – what was her name? [Debbie Wasserman Schultz] had to retire. She had to step down, because the DNC is not a government agency, it is a private corporation and the Government said all these were crimes.

But so what? It's a corporation. If the head of the corporation steps down, there's nothing that can be done. Seth Rich was killed because of that, OK?

Now, that means that Dmitri Alperovitch is responsible for tens of thousands of deaths in Ukraine and Russia, he's responsible for the whole "Russia! Russia! Russia!" nonsense and for coming up with the concept that "Russian hackers" affected the election on the side of Trump and that Trump was getting money, paid through a Russian bank called Alpha Bank.

All of that is fake! Go back and read our articles on the 28 treasonous crimes of James Comey and you'll see all these things spelled out; Franklin Foer and Slate magazine, the whole thing it's all spelled out there for you. Trump Tower and the Russian lady who came –

**Michael McKibben:** Wait, can I stop you, there? Just on the side note, what you're describing is exactly how effective these people are at using propaganda as Government-by-Journalism.

**Douglas Gabriel:** – [Veselnitskaya](#) and the Russians who came to meet with Trump at Trump Tower. Hillary Clinton personally allowed her to come into this country. She was on a No Fly list and then, No Enter this Country list – and yet, she came in and attended a Congressional Hearing under false auspices and fraudulent auspices. And so we can see the connections all there. Now, what does this mean?

Now, first off, Dmitri Alperovitch then got [Shawn Henry](#) and two other flunkies, who were in the FBI Cyber Security Division that were created, essentially to stop Dmitri Alperovitch's "Chinese" and "Russian" breaches and hacks.

**No! That was him! He was Fuzzy Bear! He was Cozy Bear! And Falcon has been proven to go in and implant the footprints of really bad, cheap old Russian programs that he says are part of the GRU – that the GRU laughs and says, “Those things are 10 years old! I mean, why is he using this garbage to accuse us of these things?”**

And then, of course, we came up with “Putin’s Chef was running a disinformation campaign against Hillary Clinton” – and then, Trump was guilty of that. Well, Trump didn’t know nothing about Russia. He would have loved to have got into Russia to have a hotel or whatever there. He had no association with them – but Hillary did!

Hillary created [Skolkovo](#). Did I say it right? Skolkovo, which gave Raytheon built a a facility there, all the major Military-Industrial Complex groups built facilities to build the weapons that Russia has, that they’re using against us, right now.

**Michael McKibben: OK, you mentioned Raytheon. Before you we go off in another direction, we’ve just been reading Raytheon weapon patents for the last day or so – and did you know that Usha Vance’s father is a big-time Raytheon engineer and has over 21 Raytheon patents in the area of jet propulsion and basically, building faster, better, cheaper weapons of war? He’s from Raytheon.**

**Douglas Gabriel:** And her cousin, Vivek Ramaswamy, who claims, fraudulently – sorry, I usually call him a derogatory name, so I can't get his real name straight, because he has come out and said he invented everything. Everything you [McKibben] invented, he says he invented and he's a liar.

But how can he get away with that? Because, he works with Dmitri and Dmitri is now on every cyber security committee, every Government Federal US Federal Government Agency, every International agency, he's on the Atlantic Council; is there cyber security person. I mean, he is the guy, still to this day, he's one of the biggest criminals on the face of the Earth.

**Tyla Gabriel:** (Interjects) Are you talking about Vivek Ramaswamy, about being a crook?...

**Douglas Gabriel:** He's totally a crook.

**Tyla Gabriel:** OK, I just want to make sure you weren't confusing him with that other guy that says he invented email.

**Douglas Gabriel:** That's another liar.

**Tyla Gabriel:** OK, I'm sorry to interrupt. I want you two to go as long as you need to – two hours – I'm loving this!

**Douglas Gabriel:** Don't tell me that!

**Michael McKibben:** We need to get to CrowdStrike, currently but anyway you're laying the groundwork.

**Douglas Gabriel:** Without this, you cannot possibly understand what just happened, OK? And by the way, I predicted all this would happen. I predicted it on Substacks, recently, because I looked – my dear wife said “Look at the astrological charts for Trump,” and I said, “Oh, my gosh, he's got Mars-Uranus on his Midheaven squaring his Natal Mars on his Ascendant.”

He will be assassinated but they will miss, because the Mars isn't an exact degree – and by the way, I don't know whether it's real or not – I can't tell you that but I can tell you that the whole world, because it was on his Midheaven, transiting aspect on his Midheaven, the whole world would see it.

So, I predicted this: the whole world will see this assassination attempt. I predicted it, weeks and weeks or months before and I predicted the exact date, the 15th or 16th, because it goes into the 16th.

I also predicted that three days before that and three days after that is going to be Hell for the world – and look what happened three days afterwards – and what did I point out? That Mars-Uranus in the chart for just the whole world is in the Second House of money.

So, I said there will be an attack, like an explosion, that will create such economic havoc, that we will may never even ever recover from it.

This is the beginning salvo this is the beginning, is what you call a salvo in a war. So, it's the shot across the bow to let us know The Reset is coming and the reason for CrowdStrike doing this is they had to put the last things in place, so that that they when they The Reset happens, they can go in and the rich billionaires, who are all part of this – and trillionaires – will have it all set up, so that all things will be channeled in the direction they should be channeled.

And at that point, Eric Schmidt, who predicted that Dragonfly, in the future, when it reached America – and he lied; he said it wasn't here – it was here and the day that he said it was here, after he went to China and set them up for it.

So, if you think China's our enemy or Russia's our enemy, no, they're using the same exact stuff that we're using, OK and they just put a different name on it.

So then, Eric Schmidt basically said, "In the end, your dark profile will limit you to what you'll be even able to query on the internet and you will be charged for it," because remember, the internet is fake.

**Sir Timothy Burners Lee from CERN on his spare time, on his weekends invented the World Wide Web and just gave it to the world for nothing. Yeah, you believe that, right? I mean, everyone should believe that, because they were told that.**

**Michael McKibben: Well, there was a time, I said "Why not?" but now, I know that's not true.**

**Douglas Gabriel: That’s like believing CERN actually has a third collider, the Hadron Large Collider. No, it doesn’t exist. We’ve proven that. So, what is going on there? That’s the head of the CIA, that’s what what I call “Rogue”, what you would call the City of London, Pilgrims Society, intelligence group. That’s who this is. There’s no mistaking what’s going on, here because, once you have this much evidence stacked up – and no one’s pointing at Dmitri.**

Dmitri left CrowdStrike some time ago. He got his money and got out. Now, Shawn Henry who came from the FBI Cyber Security Division, in the last few months – and they’re talking about, “Oh, he drew out 4,000 shares just recently, right before the IT Crash.”

No, he drew out 85,000 shares over \$300 a share! I can’t do math that big but that’s what he got out of the company – and that’s just some of his shares and he did that before, so when CrowdStrike would be blamed for doing this, Silverado will now take over.

Silverado – this is the British thing, OK?

**Michael McKibben:** They always have backups when they use one spent vehicle. It’s like a stages of a rocket and they throw off that stage and that’s another shell company that they throw away.

**Douglas Gabriel:** Now, if we were told by the World Economic Forum for years that The Reset would come in 2024 and that they have already done simulations on this, over and over and over, again and then Cyber Polygon, they said, “Well, this is going to also happen in 2024, there’s no way around it.”

Now, the trouble is, they give no solutions for either. Zero solutions. All they’re going to tell you is, “Centralize, centralize, centralize,” which is simply giving to the Pilgrims the control that they tried to get with the League of Nations, the United Nations and the Pacific – what’s that other one called?

**Michael McKibben:** The Institute of Pacific Relations.

**Douglas Gabriel:** The Institute of Pacific Relations. People don’t know that there was a UN before the UN – not only League of Nations but the – say it again –

**Michael McKibben:** Institute for of Pacific Relations. That was the precursor...it was created by the YMCA, through the YMCA as the Institute for Pacific Relations and then that became the base from which the United Nations was created in 1947 in San Francisco.

**Douglas Gabriel:** Now, we call that in America the CIA but it’s actually British and it was completely British and well, FBI, anything that has to do with intelligence, it’s all British-infiltrated from the beginning.

And also, look at Obama's parents. Obama's parents were part of the International Institute in Hawaii, where he supposedly went to Punahou. No, he didn't. He wasn't born in Hawaii and he didn't go there when he was a child. That's complete nonsense. I worked at that school. No. Didn't happen.

Both his parents – his mother, Ann Duncan [Stanley Ann Dunham], whatever her name was, was a CIA agent and we know that, because we know her history and we know where the baby came from. That is not a Kenyan baby.

**Michael McKibben:** Who was the Indonesian guy?

**Douglas Gabriel:** Soetoro...and if you look at the two of them together, it's the spit and image. They look twins, right? So she had sex with the guy she was spying on in Indonesia. [I totally disagree that Lolo Soetoro is Barack's biological father].

**Michael McKibben:** She was living in Jakarta.

**Douglas Gabriel:** He ran Subud. Subud was a CIA-Pilgrims Society front and she was trying to infiltrate, to make sure that the Americans got better control, because, you see, Americans are always Behind the Eightball. We are the ones being manipulated. We are the military arm of the Pilgrims Society, OK?

**We are idiots. We never became sovereign, we did not win the American Revolution, the British still control us, to this day and the Senior Executive Service is the proof of that.**

Andrew McCabe, after lying five times; perjury, felony, perjury – nothing happened to him. No charges, no time and he was still given his retirement from the Senior Executive Service – and if you don't know what that is, that's as important as the Federal Bridge Authority Public Key Infrastructure. That's what controls everything in America. All cyber security is controlled by the PKI –

**Michael McKibben:** And Bruce and Nellie Ohr were paymasters, out of the Department of Justice for the SES.

**Douglas Gabriel:** Correct. Absolutely. Approved Fusion GPS. Michael Sussman and Mark Elias, they were all around that DNC nonsense; the murder of Seth Rich and the “Russia! Russia! Russia!” hoax, which was really a soft coup against Trump, completely controlled by Britain and Richard Dearlove and Arvinda Sambai and Allison Saunders.

You know, we have been telling people this for so long, it's like a bad old memory when I bring this up; that no one wanted to listen – but today, I noticed that after we did our report, about a year, some people in Mainstream Media caught on, a little tiny bit – but not anything like we're telling you to tell you who Dimitri Alperovitch is.

He's the worst Russian spy in history, OK? He took and he blamed it on "Chinese" and then he blamed it on the "Russians" and now, basically, what is it going to be blamed on? I love this! "There's nothing you can do when there's an IT problem."

**Michael McKibben:** Well, can we roll forward to this latest attack? You have to put CrowdStrike-Microsoft, because this wasn't just CrowdStrike without Microsoft's cooperation. This could not have happened and at another level, besides the history, here is the fact that anyone in Network Security hears this story, that "somebody put in a bogus update into the latest updates that were distributed all through the world" and every network engineer will tell you that that is pure poppycock, because that's not the way distributions of major software like that occur.

And to cut a long story short, in any kind of software business, when you're updating software and you're wanting to introduce a new release, you test it first. You don't just put it out in the into the public. And so, everyone creates something called "sandboxes", which are servers, where you can test your changes, to make sure that there are no unknown glitches or hidden glitches or inadvertent glitches or things you introduced in a new feature that breaks something from the past you have to test all of that, before you ever introduce it into the market.

**So this news story that has flooded the planet, that it was "a simple mistake" by some software engineer, it's a lie. So, the question is, who's lying? Because, even without knowing the details,**

**anybody in the software business knows that's a lie, because that's just not the way it happens, especially for a product, like this, that's been around for 10 years.**

Has that ever happened with them before? No, they probably have a testing procedure, that for some reason, this time was not followed and somebody at Microsoft and somebody at CrowdStrike made the decision to let it happen and so, the question is: what was the agenda?

Now, we get back to the people you're talking about, in trying to determine what would happen but another thing to know is that when people introduce these kinds of vulnerabilities in a in systems all over the world we're talking – I don't know, the last number I saw was 30,000 systems around the world – when you introduce something that bad, you better bet every hacker that had any kind of foreknowledge of this was sitting there, waiting to steal, kill destroy, replace any file, anywhere, on any system that they affected – and of course, they're going to go, "Oh, sorry! I'm sorry!"

Know that these are demons we're talking about, here. These are really demonic individuals who let this happen and therefore, violated the privacy and the property of billions of people all over the planet.

These are demons.

**Douglas Gabriel:** Very demonic people, possessed by demons. Those demons give them more control than any human should have through centralization and then what happens? Well, of course they go even worse, they go bad.

Look at Hillary Clinton. She can't get enough money. Her Foundation is taking in more money – as a matter of fact, they have continuing agreements with Frank Giustra and Carlos Slim to, basically get hundreds of millions of dollars for the rest of their life through their Foundation, OK?

So why are they hard-up for money? Because they keep grabbing. It's called gluttony; gluttony for greed and that's what we see with Zelenskyy. That's what we see in Ukraine.

Why did Dmitri get involved in Ukraine? Because he knew that Ukraine was getting ready 'cause they saw, with the Yanukovich, and the guy before him and Poroshenko and Zelenskyy, that they were saying, "Oh! We're with Europe and the Atlantic Council and NATO! Oh! We're with Russia, because we need their oil! Oh! We're..." back and forth and back and forth – and literally, we saw an Orange Revolution and the Maidon Revolution in Ukraine, led by George Soros, who is a CIA agent, who, of course is a Pilgrims agent. I don't know how much of a Pilgrim he is, but –

**Michael McKibben:** For sure, he's a total Pilgrim. He was the one that led that crash of the British Pound, back in the early '90s. The British were setting him up, way back then.

**Douglas Gabriel:** And the Fall of the Soviet Union. He was right there, with Leo Wanta. So anyway, the point is that this has been going on for a long time. So, two Color Revolutions in Ukraine, to make sure that we had the people in there that were the most corrupt that we're going to allow John Kerry's son, Christopher Heinz, Hunter Biden on three different committees that controlled all the oil and where

it flowed to in Ukraine, which means the oil coming off through four pipelines across Ukraine, which were actually being controlled by Russia but were coming out of other Soviet satellite countries. But anyway, Putin controls that.

So they were basically messing with Putin and so Putin put two pipelines in Belarus and then, he put in Nordstream 1 and 2. They blew up Nordstream 1 and 2. British Commandos blew up the Belarus most southern pipeline and also the power to two of the pipelines in Ukraine and then, the President of Ukraine, repeatedly – because they were on the side of NATO, – which is basically the corrupt DC politicians who were all getting a piece of the pie of Ukraine; they wouldn't let them drill oil in two of the largest oil fields in the world in Ukraine.

And then, they were taking their oil from Russia and running-up a \$4.5 billion debt in oil and then what was Ukraine doing? Turning the pipeline off, more and more and more and more. In other words, prompting Russia to go to war.

And then, of course we know that the Nordstream 1 and 2 were blown up by the British. They tried to blame it on other people. Let's be real clear about it: First off, the first Nordstream was a private deal between Putin and the daughter of Hitler – what's her name, who's the head – Angela Merkel, the daughter of Hitler, as far as I'm concerned.

She knew it was blown up, because she was cheating all the European Union Nations by bringing the oil in, jacking-up the price and then selling it to them through Nordstream 1, OK?

So the this kind of corruption used to be just oil. Now – Oh! No, no, no – it’s the flow of information, because the flow of information controls Bank information, it controls the Bank for International settlements, it controls the International Monetary Fund.

Remember, that Ukraine has defaulted on \$27 billion in International Monetary Fund loans from the World Bank, defaulted on 4.5 billion to Russia; has taken in, my calculations – they will say \$200 billion from America, just with the recent war – no, no, no, no, no – it’s way more than that. They’ve been given untold billions.

**Michael McKibben:** So, now we know this we know the strategy. The strategy is to let the Central Bank have this debt and eventually, take over that country.

**Douglas Gabriel:** And all they have to do is change the digits on the debt, because, when it comes down to it, the Bank for International Settlement controls all derivative betting and if they don’t clear a single bet, all banks in the world could collapse and that’s not an exaggeration, because you have to pay off your derivative bets’ debt before you pay off the stockholders, who are in the American Stock Exchange – or any Stock Exchange, anywhere in the world, OK?

**Derivatives come first. So who controls the Bank for International Settlements' clearing? A computer. Who controls the clearing at the DTCC, the Depositors' Trust?**

**Michael McKibben: Reuters-Rothschild.**

**Douglas Gabriel: Yes. That's who that's so we have found out now controls it. Used to be International Continental Exchange but now, it went to British control.**

**Michael, what's his name in Britain, who controlled Enron?**

**Michael McKibben: Oh, Michael Farmer. Candace Owens' father-in-law.**

**Douglas Gabriel: Yeah and now, it shifted up to somebody in Sweden, I think. It's like they move this stuff around so you can't find the target.**

**Michael McKibben: I made a mistake: it's *Baron* Michael Farmer.**

**Douglas Gabriel:** Oh, come on, you need to remember these titles! And remember that anybody in America who has a title should be uh considered a traitor – and that means, if you're an Esquire and a lawyer you are a traitor, OK? Because, the Constitution says you cannot have any titles that, especially come from a monarchy.

So anyway, the point is that these people in the SES, the people who are the Crown Agents, the people who control – and you already mentioned the people who control all the crypto codes for the Federal Bridge Authority Public Key Infrastructure: Hillary Clinton, Robert Mueller – what’s that the guy’s name?

**Michael McKibben:** Michael Chertoff and Dimitri Alperovitch, with the CrowdStrike –

**Douglas Gabriel:** And Bravo – what’s his name?

**Michael McKibben:** Orlando Bravo

**Douglas Gabriel:** Orlando Bravo and Entrust and then, it went to it went to what was it, CloudFlare, was it?

**Michael McKibben:** CloudFlare, yeah. That’s [Robert] Mueller.

**Douglas Gabriel:** So Folks, you don’t have an America. So, if you think you’re fighting for something or you’re voting for something you are have been fooled.

**There are no elections in America; haven’t been since a major Pilgrim, named Lord Mark Malloch Brown started OpTech, which controls almost all election voting machines in America and in 17 other countries.**

He determines who wins, period. It's as simple as that. And who's his group? He's on a committee that you'll never hear the names of. The people on the committee – because that's the way that the Venetians did it, the Babylonians did it, the Venetians did it, the City of London did it, Cecil Rhodes did it and all of his successors, all the way down through the Royal Institute for international Affairs, the Roundtable, Milner's Kindergarten and the Council on Foreign Relations.

They all do the same thing: They all answer to a small group of 3 at the Top and 1 at the Ultimate Top – and it isn't the Knights of Malta, that are controlled by the Venetians, anymore because there's Knights of Malta in Britain.

**So, the Pope is no longer in charge. That's the reason he's so desperate to try to create havoc and Marxist chaos all over the world. He never stops. He's one of the worst people in the world. He's responsible for the deaths of millions, telling them to invade other countries and that the other countries must bow down and kiss their feet and wash their feet and give them more benefits than US Citizens – and especially, soldiers, who have fought and been, harmed killed and basically maimed for life – they don't get as many benefits as the Invaders to our country.**

And when you look at who's bringing them into Mexico, then you're looking at the same people: these are the same Pilgrims.

So, why did they choose 2024? And why did they choose 2024 for, not only The Reset but also for the Cyber Polygon – and that’s what we can answer, because they all – I do not know a rich person that doesn’t use astrologers to help them predict the ability for them to keep the money that they have.

All of these things, I know, because I was an adviser to Nancy Reagan, who basically controlled the White House after Ronald Reagan got shot he had Alzheimer’s, which came out at her funeral. Her children said this and I knew it, because I was involved in it.

Every one of these leaders is going upon astrological information. Matter of fact , the markets are determined by these things.

**Michael McKibben:** Let me ask you something Douglas. Can I talk about [MySQL](#) for a minute, before we get off this subject of encryption? Is that OK with you?

**Douglas Gabriel:** Oh, please! You have the solution!

**Michael McKibben:** OK, so we’ve been talking a lot about encryption. We’ve now discovered and can prove that nothing that is encrypted today, that’s supposedly “trusted” or “safe” or “secure” is, in fact safe, trusted or secure. They’re all insecure!

**And that mechanism is being used to collect, like a garbage scow, all all information on every individual in the world and stick that data in a “Dark Profile”, which is essentially, a database**

**that can be mined in various ways by various people; some of them innocent some of them very malicious.**

**But it's all the same data and it's being used to manipulate public opinion – that is the main effort that they use that for – how they're going to manipulate public opinion for the public to believe lies and therefore, make decisions, based on those lies.**

And so, what we did is we met with a group of mathematicians who have developed an an approach to encryption called “Polymorphic Encryption” and the the major difference between what's out there now, which is driven by a standard called “AES256”, is that AES256 has been cracked since 2013 by one of our mathematicians and yet, despite that truth, they're still telling the public that their systems are “secure”, “private” and “not hackable”.

So, what we have done is ,we are introducing a product called MySQIF Privacy App that uses Polymorphic Encryption, which is a way of exchanging unique attributes of each of your devices that cannot be intercepted – and even if they are intercepted, there's not enough information in the interception to do anything.

These are one-time keys they grab; unique fingerprints off of your two devices and then, whatever files you exchange through the encryption that occurs by our app absolutely cannot be hacked and in fact,

Crowdstrike Returns and the Collapse Begins, with Transcript, with transcript.

mathematically, it will take three lifetimes of the Universe, currently to hack one of your files that you send in that way.

Now, three lifetimes of the Universe, I think is a long time out and I'm not sure any information that's exchanged now will be of much value in three lifetimes of the Universe, which is well over 10 billion years, so that's the difference.

And the other thing is, after the exchange occurs, the master key disappears, the encrypted file disappears and therefore, each side has the original file but while it was in motion – and that's really the key, here – while that file's in motion, no matter where it is in the internet, even if some hacker is sitting right and watching the bits go by, they can't do anything with that information and therefore, this is the first truly secure encryption system that's been available to the public, ever.

And that's available now at [mysqif.com](https://mysqif.com) and uh you can go there now it runs on only Windows, right now, Windows 10 or 11 and you can go on load it and then get another person you want to send a file to load it, also as a reader and then you can send these encrypted files and know for sure – and that's the interesting thing we've learned, by the early people that are using the system is they say it gives them a great peace of mind, to realize when they're exchanging with another person.

It's not like them sending it through Gmail or Hotmail or AOL or or Yahoo Mail, when you know – or should know – that all of your messages are being read and being datamined – and all of that's being

stored in your Dark Profile, as well as the Dark Profiles of anyone that's named in your communications. That's how bad things are, right now. It's a complete violation of the US Constitution.

But with MySQLIF, you can send a file and send small messages and know they cannot be cracked. It's great Peace of Mind tool, if nothing else.

Now, for the Network Engineers who are dealing with the Microsoft-CrowdStrike debacle, use MySQLIF, in that case to give yourself a way to communicate with your colleagues, while you're working to fix the problem and that's a unique time, because most hackers use those kinds of disruptions to further snoop on a network and then embed code that can be used for future exploits. But if those Network Engineers are using MySQLIF across the world, their plans will not be hacked.

**Douglas Gabriel:** The internet was a DARPA project it was called "Darpanet" and it was a Dark Web to control the criminality of these groups we're talking about, so they'd have secret communications.

And then, they said someone went nuts and said "Let's fake this and say Timothy Burners Lee invented the World Wide Web for all human beings, so that they can all get on it" –

**Michael McKibben:** *Sir* Timothy Burners Lee

**Douglas Gabriel:** There, that’s him. I can’t remember fake inventors. Fake inventors don’t log in my brain, OK? This guy’s done nothing! Remember, when he came out and he said he was going to create a “Total secure internet”? Remember that?

**Michael McKibben:** Yes, I do. Now, I got to tell you, this is going to disappoint a lot of people I know now, who are using Protonmail. Sir Timothy Burners Lee runs the foundation for Protonmail. So, there you go. Do you need to know more? Get off of Protonmail CIA/MI6 Op.

**Douglas Gabriel:** Now, the problem with DARPA – what is it? – the Defense Advanced Research Projects Agency or something – they put out requests for the most evil weapons – cyber weapons –that you can imagine.

**If you sat around with science fiction writers and said, “What could we do to control people?” Well, first, we need to beam them their thoughts – first off, we need to biologically make sure they can’t think, anymore and then, we beam so many EMFs through them, that they can’t think and then, we and then we want to manipulate them and then, we want to put thoughts into their brains. It’s happening!**

**Michael McKibben:** Let me interrupt you. [Professor James P Chandler](#), my patent attorney was one of the advisers to DARPA – of course, I didn’t know that ,when I was using him as my patent attorney –

but we were talking one day about Good and Evil and amorality and immorality and I was saying that a lot of the inventions coming out of the Defense Department are evil. I said that to him

His comment back was, “Well, you know, Mike, you know there’s another way to look at that, in that, if it can be invented by a human being, it should be, no matter whether it’s moral or immoral.”

The issues of morality and immorality, to him would be pushed off into future generations and their duty was: if it can be invented it should be invented

**Douglas Gabriel:** [The Office of Net Assessment](#) is where most of this originated and that is an office that determines, when they create a weapon just how many people they can effectively kill. That’s no exaggeration.

**Michael McKibben:** Chandler was working exactly with Marshall, the guy who ran that –

**Douglas Gabriel:** – who was called the “Yoda” of the CIA’s Cyber Program but it was much more than that. I mean, these people sit around thinking up weapons and then they give them to all parties, internationally; transnational groups. These are not kept in America.

So, they use American tax dollars to build weapons, just like in Skolkovo: they literally gave the weapons to Russia, they gave the weapons to China.

The cyber weapons being used in China, with their Social Credit System, Folks? It's already been implemented, here it's just that they haven't pushed the last button.

**Michael McKibben:** We gave them the older code.

**Douglas Gabriel:** Exactly, when they gave internet access to just common people, they thought it was just going to be funny, because then they could spy on them – but then they found out that everyone wanted to do their commerce on that – and then they said, “Well this is what we’ve always wanted! To centralize all power.”

**Michael McKibben:** That's when I got into the business.

**Douglas Gabriel:** And you created social networking, which then people thought, “Thank Heavens, I can now talk to a lot of people at one time. I can get information, I can do what the Mainstream Media isn't doing, which is their job, which is to show us the truth, so that the oligarchs, the Corporatocracy, the Pope, the secular and religious groups cannot have control over We, the People.”

**Michael McKibben:** It levels-out the communication landscape and...they let it out of the box and this idiot, named McKibben, who didn't know better at the time was just a young entrepreneur said, “Well, I can do this collaboration thing better than IBM and Microsoft are doing it,” and of course, I had just come off of rebuilding AT&T's email system, so the idea of a large-scale system didn't bother me.

And in fact, we put together a team of people that invented social networking – but with a difference – what we invented, we focused on fulfilling the Bill of Rights and protecting people’s privacy and their property.

And what IBM and DARPA and Chandler and [David Kappos](#) did, as they came in, they ripped all of the the privacy and property features out of it, so that they could push Facebook – and it wasn’t just Facebook – but everybody used Facebook, so I’ll put that out there, as an example.

It pushed out a tool that everyone could use but the difference was the person could not manage their privacy, because it was all intended to be public, because our government decided not to follow the Constitution and our Rights to Privacy and Property and therefore, started implementing this this Global Surveillance State that we have today.

It’s totally evil, in the way they’re implementing it – but even so, there’s enough of the original invention in there to do what you’re saying: others are able to use it for for good, as well. So, I take heart in that, while we look at trying to get paid for work.

**Douglas Gabriel:** So, who used the Dark Web more than anybody? CIA/FBI and what did they do? Entrapment for pedophilia, entrapment for drug money, entrapment for every kind of crime you can imagine. So, basically money-laundering. It was the source of evil in the Dark World for a long time.

And then, when social networking was created by you, because they couldn't figure out the problem how to make it go global and have the scalability. Once that was figured out then, they said, "Oh, now we have to do datamining, so that we can find out who everybody is, so we know who our enemies are, so we can target them and then, the those who aren't, we can find out how effective our propaganda and our Subliminal Silent Programming is through TVs, through radio – “

**Michael McKibben:** You know, that's interesting, I was just having a conversation with an engineer who was prominent, back in the days, when we were inventing social networking and she was a very prominent international network engineer and network designer and she said, in about 2001-2002, everything changed. Everything they had been working on up till then was scrapped and she had to go in and help these people design the next system.

Well, when now we've compared notes, we know what they were designing, they were taking our platform with its data storage model and they were moving it all into a unified approach.

Before, there was plurality in the data networking area. After that, they went for uniformity: a monolithic way of storing data that we have today – and of course, that enabled the spies to then, get into everybody's knickers.

**Douglas Gabriel:** And Eric Schmidt came back and created the [US Digital Service](#) for the White House and what happened? Now, it's all streamlined and in 2001, that's when Dimitri Alperovitch started CrowdStrike. Isn't that a coincidence?

That's when Gmail started, that's when Facebook started. It was two more like 2004 but all of these programs started then, because the DARPA people, the Chandler people, the [Highlands Forum](#) people were driving the bus, on this side of the Atlantic, the MI6/Pilgrims Society on that side of the Atlantic and they were having regular visits.

I now know, from public records that Chandler was meeting with [Sir Geoffrey Pattie](#), who was the Holder of the Queen's [Golden Share](#), at the time inmost of the major industries, including Serco and [QinetiQ](#), that came along in 2001, that Glen Youngkin was the founder of.

**It just so grates me, to see Youngkin up on the stage at the RNC. He is such a traitor to the United States!**

**Douglas Gabriel:** We used to have these fortresses for the NSA that all information coming into the country, even the AP or Reuters or anything had to go through these fortresses and they came to NSA and we actually determined what news would be allowed to go out to the Mainstream Media, so I was literally there. I was literally striking things that I was told or I believed would compromise National Security.

Well, at the time when Total Information Awareness was created, basically what was when the NSA became a Corporatocracy. It became what is now – what was then called Cisco – and then, after Cisco, it became all these other systems but for sure, by the the time that it went from the NSA to Cisco, it added – I’m going to say something fancy, now, because Michael taught me this: They added the Elliptic Curve – German Deterministic Elliptic Curve.

Elliptic. I always pronounce that wrong. See, I still can’t get it right. It’s called the Dual ECG RBG, Deterministic Random Bit Generator. Basically, the backdoor.

But they put these back doors into the servers they but now, they’re in every single computer, so Microsoft, Apple – all of them – put it into your computer. Everything you do I can be accessed.

**Michael McKibben:** It was comprehensive: All hardware, software and firmware and the drive for that was the Carnegie Endowment, John Podesta and Professor James Chandler, who became my patent attorney, eventually.

So, they drove the Backdoor Key, as the internet was developing and then, by 2003-2004, we had introduced what they wanted as an architecture for the entire planet and that’s when this engineer I was just talking to yesterday was saying she she just couldn’t understand what was going on, because everybody was shifting to another model – but they weren’t telling them what it was. Well, it was a way

to – I’ve talked, in other videos, before about how to store data without caring where it is – and that was the system that they went to.

It was a unified approach, so that they could string together all the computers in the world into one source.

**Douglas Gabriel:** And the Clintons were in on this, from the beginning and they could see where it was going. That’s the reason she got into getting the Public Key Infrastructures, the crypto codes.

I mean, every anyone in the digital world, early on, knew – and I would say this – I’d say, “This is all going to fail miserably,” because human beings are not advanced enough to not have the impulse, if they are the creators and the software creators, to build a backdoor in, so they can go and cheat and get and [commit] fraud, themselves; so that they could take advantage of the system they just created.

And, hello, McAfee is a perfect example of that.

**Michael McKibben:** Yeah, he is – and oh, by the way, when Hillary took over control of Insure [Entrust?], she specifically had control of over 50,000 FBI Public Keys. So, with the Public Keys, you also, there’s a little little fine print in the Federal Bridge Authority that says, “Oh, we might store your Private Keys, as well, for your convenience.”

**Douglas Gabriel:** Now, there's two people that the Pilgrims hate. One of them, at first was Donald Trump, because, why? He's unpredictable, he's a megalomaniacal, narcissistic hugeist ego in the world, only second to, actually Hillary Clinton.

And Hillary Clinton constantly goes against her Pilgrims handlers, because she wants to grab it all for herself. She wants to be the Queen of America and that's why the Clintons created the association with China that gave them Most Favored Nation trading status and then they got a piece of everything Walmart did. Well, Walmart, all this stuff is created in China.

**Michael McKibben:** Oh, I thought that was called the "Chinese Embassy in the United States"?

**Douglas Gabriel:** It is and that's also who Mitch McConnell works for. And so for a while, it was the Chinese and then, she shifted over to the Russians, because she started to see that this was really about technology weapons and information and so she really got that.

I told you I would tell you why this [CrowdStrike outage] happened now.

It happened now, because after Trump, they said, "Holy moly, we have to accelerate The Plan! We know that this Solar Maximum is coming. When the Solar Maximum is coming, there's going to be fantastic climate changes, good and bad and so, we're going to take a advantage of that, by inventing another 'Climate Crisis' and we're going to try to create a new currency called 'Carbon Footprint' and

this is all ran out of the United Nations and then we're going to create a Pharmaceutical World War III for the X Virus.”

And they called it “X virus” long before anything you ever heard, Folks about this and they’ve been trying to, basically harm people by giving them shots into their blood that have poisons in them.

And it doesn’t matter, you can analyze the poison all you want but you’ll find a PEG and GO in there and if you know what those two words mean...graphine oxide and polyethylene glycol is in all the shots, because it’s an “inactive ingredient” it’s like the other “inactive ingredients” in most pharmaceutical drugs are poisonous but they won’t list them –

**Michael McKibben:** You mean, like talc?

**Douglas Gabriel:** Talc, which the Fauci Family owned the whole talc industry.

Finally, Johnson & Johnson settled for what, was it \$20 billion or something? Over the talc poisoning of children forever. They’ve known this for 20-some years, that that we were poisoning children by putting talc on them. Talc is in your pills! If you have a pressed pill, it’s got talc in it, OK?

**Michael McKibben:** Fauci’s Family, we found, going back to the early 1600s had been mining talc in southern Switzerland and caused an avalanche that killed like 2,500 people then they shifted to a talc

mine in China and, of course, we didn't know yet, when we were doing that research, that this was all part of the Silk Road trade that the Babylonian Radhanites developed thousands of years before Christ.

And so that's the heritage, in which both Klaus Schwab and Fauci were grown into and Fauci's family is a part of the foundation of Switzerland so these guys go way back.

**Douglas Gabriel:** The Fauci Family Crest shows a serpent eating a child, OK?

**Michael McKibben:** Yes, it does.

**Douglas Gabriel:** And Klaus' family, they were Nazis. They were given the highest awards from Hitler for hiding their production of their weapons for Hitler and their facility never being bombed! Klaus Schwab is as corrupt as anybody could possibly be.

But the point is, is that when you created social networking, you were trying to say, "I want to give everybody freedom! Freedom to express themselves, freedom to collaborate, worldwide connections and basically it opened up commerce, so everybody got on!"

They got the commerce going and then the idiots who run DARPA, the idiots who run the CIA – unfortunately, the Pilgrims Society are ruthless and vicious and clever but they are not intelligent. They are not creative they are not creative people, so they basically don't have a good plan.

So, why did they say it's going to happen now? They saw happened with Trump, they knew Hillary, if she got in – they made sure she didn't get in, didn't they? Ha ha ha. She was their girl. She was going to be the British Queen of America, right? But they didn't let her in, did they? They let Trump in, because, remember those were selections. Those were not elections.

And then they let Biden in. Why? They had to get rid of Trump, because he went rogue on them. He took their Intelligence Community Information and became the role that he has become.

Now, why did they choose 2024? Because they know that Trump would receive the popular vote, if it was a true vote and they know that they're getting caught manipulating these votes and that's the reason there was a Plandemic, so that they could have mail-in votes and all kinds of illegalities in every state that have never happened before.

Some of those loopholes have been closed, now. Most of them have not been closed, so I don't think you're going to have a free election.

So why did this happen? Because they have to take all the criminality that we just described with Dimitri Alperovitch, Michael Alperovitch, the Public Key Infrastructure, the corruption in Ukraine, the DNC server, using, basically digital Warfare against Americans, after the National Defense Authorization Act by Obama transformed the Patriot Act into the what was it, the [USA Freedom Act](#).

**Michael McKibben:** Prison Planet.

**Douglas Gabriel:** Prison Planet says that they are allowed to propagandize Americans [via the [Smith-Mundt Modernization Act](#)], as War Actors. Every American is a War Actor, until otherwise proven.

**Michael McKibben:** So there, we see why lawyers are a part of this Banker Mafia and are just doing nothing but doing their bidding, as foot soldiers.

**Douglas Gabriel:** And so, we know this, because why? The assassination attempt on Trump – don't get me started on that – let's just say, "The Assassination Attempt on on Trump" had to all be swept under the rug, didn't it? So what did they do? They just fired the head of the Secret Service, who was a DEI hire – oh, by the way, Microsoft fired all their DEI hires that were responsible for this mistake and they fired them before it happened, isn't that interesting?

And now, the Secret Service is going to fire all their DEI hires and the people they brought from desk jobs from the DHS over to be Secret Service, which is sheer insanity – and then, what did Biden say?

He said that he was informed, supposedly, within one minute of it happening though I don't think anyone was informed of anything in a minute and then, the first thing he said is, "This is a National Emergency. This is my job. I am demanding that we put into place what the Congress and Senate and I

Because, as you pointed out, right now, every system that hasn't been restored – and they say it could take weeks, if not months – and we have no idea what the cost of this is going to be, until about two months from now and it'll probably be in the hundreds of billions of dollars, OK?

I predicted it'd be economic and I kept saying: “No. Trump assassination.” That's in his personal chart – even the guy that they say shot him had Mars conjunct Uranus in his chart, OK?

So we have four Mars-Uranus aspects; two on Trump, one on that day, that was economic, and one for the shooter, OK?

**They set this person up but the point is, they swept it all under the rug. They literally said: “No communications about this assassination are allowed!” Now, Joe said that – and that proved that he just says what he's told, as you just pointed out and that he's insane, OK?**

And now, what do we see? He's gone, OK? Well, that's, we suspect that, of course “the COVID” took him out, of course but we know that everyone in DC was exempt from getting COVID shots. Everyone at the Centers for Disease Control and Prevention, exempt. Everyone at the National Institutes for Health, exempt. Isn't that a coincidence?

So what is really going on? That's all theater, that's all fake and all of the corruption from Ukraine, which Trump has already said: He wants to go after CrowdStrike, he wants to go after Fridman, he

wants to go after Zelenskyy, because he was trying to show that Zelenskyy is as corrupt as Poroshenko, before him.

And the whole war was all fake British Commandos started that war and Dmitri Alperovitch started the war in Donbass [in 2014], with the bombing misinformation to the artilleries on both sides, that then caused, literally, at this point, they won't tell you this: 200,000 people in Donbass have been killed by their own Ukrainian Forces.

This is the worst corruption we've ever seen in any modern nation and so, all that – now, why did the Supreme Court come out and say, “Jack Smith was illegally appointed”? Because, so was Robert Mueller, so they can now, sweep that underneath.

That, then exonerates Comey, who was one of the Star Witnesses. So, therefore, he was fired but he became a Star Witness for Robert Mueller that, then gave him immunity. That's the reason nothing ever happened. Andrew McCabe testified –

**Michael McKibben:** These lawyers know how to finagle the laws to protect themselves and their friends. That's what we see going on, here. That's why I just have no respect for the legal system. None.

**Douglas Gabriel:** But what you attempted to do, from the beginning, Michael, you've now done – and I just want to salute this – and I want to say that we told you this was going to happen. We told you about Eric Schmidt and Dragonfly and the Social Credit Score – matter of fact, look, as Tyla keeps pointing out: Do a Google Search.

What happens? You're told what you're supposed to believe and then you're given a set of questions that you might be actually asking and then they give you the canned answers they want you to have. You have no more freedom in social media.

America is the last tiny bit of it but the same exact controls that squelch Freedom of Speech in Europe, in China, in Russia – in all these other places – is already in place here, in America.

So, just get ready, Folks. What we told you is not going to happen – it is happening

**Michael McKibben:** It's starting. We're starting to see a pattern that you can tell, immediately, whether something's true or a lie and we've mentioned this before but in the Mockingbird Press, in this group of people that are practicing Government-by-Journalism in Britain and America, one of the first ways you can tell if something's a lie is if all of the Mocking Bird media – that's a long list and we won't go over it here – says the same thing, with exquisite detail, even personal attributes to the stories and they do it all, ike immediately after something's occurred.

Then you know it's a lie. They're going to make it sound good. They're going to make it sound believable – but the fact is, if they're all doing it together, it's not believable, just count on it.

**Douglas Gabriel:** We've already had the trial run and Trump was at the command. Warp Speed. He allowed viruses to include viral vectors and then he allowed a National Emergency to be declared and then, a Health Emergency and then, the World Health Organization a Planemic Emergency, OK?

What was that? No one has estimated, yet that I know of how many trillions of dollars were lost during that time. Well, they set Trump up and though he wanted – he wants peace – well, they don't want peace, because they make money off of war.

And then, he pointed at the corruption in Ukraine. Well, they can't have that, because George Soros is on one of the largest oil companies, there. Hunter Biden was getting so many – untold amounts of money – not only from Russia, from China but also from Ukraine, as well as Pelosi's nephew, as well as Cofer Black, Mitt Romney's guy – all the corrupt people are going to get all that evidence swept away, right now.

So, Silverado and Dmitri Alperovitch – I'm going to predict this and it will probably come out in a year or two: that they are the ones who gave the orders to do all of this this, because they had to set up the avenues to pull down and to delete the information that could condemn them. That's what this is all about.

Because they're scared of Trump, because he's a wild card, just like Hillary. They can't control him.

And so, are they planning another pandemic? Yes they are. Avian Flu. We've already been told it's 10 to 100 times worse so, what are we talking? \$100 trillion? Because, some estimate \$3 to \$5 trillion was lost, overtly – and that doesn't count the lost businesses that never came back to life.

**So, we are talking about an economic attack. It's happened, Folks. And we now know the Bank for International Settlements has agreed to be the Clearing House for BRICS. I had to warn people years ago, the American dollar cannot fall until they get someone to do the clearing for the Big Oil deals, OK?**

**Bank for International Settlement doesn't have any money. How can they clear these things? They can't make up any difference. They can't make up any losses. They're a bunch of idiots and they are literally the criminals who took the money from Germany and Japan after the war and started the BIS.**

**I mean, they are – it should be ust "BS" – because, they are the worst economic demons on the face of the Earth.**

And now, I am looking at – and I have to say, it's been a long time coming – my wife has been telling me this is going to happen. I'm saying not until couple things happen, Folks. They've happened.

And the only way you're going to be able to even communicate; important documents, important information or just to protect yourself, because you said one foul thing against these evil demonic people that, then you are arrested for, like they're already doing all throughout Europe, all throughout Russia and China. They arrest people for one single word that they say on their social media, one word.

So that's what's happening the Reset is now. The Cyber Polygon, it's now and it's going to get worse, by the way. This is just the beginning and the economic collapse is here and they want to blame it on Trump.

Because, he is so preoccupied with himself and now, we know that the money that is behind TRUTHSocial actually comes directly from the British Monarchy. We now know that. Though he might not have been on their side before, he certainly is now and so, get ready.

These aren't predictions these are realities, already happening in our time, at this moment and the only thing I know that can save you in these digital realms, which, by the way when I was in the NSA and I got out, I swore I would never get involved in these things. I'd never write another program I'd never write software I'd never invent anything.

I invented a lot of stuff for the NSA. I promised I'd never, ever do that again and I only use this system now to get the word out, so that your spirit can rise above these demonic times.

You, alone are the solution. Your homeopathic consciousness is the solution – and we know that because, look at Michael McKibben, sitting right there, in front of you: Out of him his mind and his collaboration with some of the greatest mathematicians of our time, some of the greatest IT people of our time gave us what we needed – but it was turned to the Dark Side.

And so, MySQIF, at this point is about the only answer that I know if you wish to continue any type of collaborative world communication – or even your life. Sending in your medical records to another person or anything like that.

So, get ready, Folks: The banks, OK, they had to get the banks. This was the last thing; why the banks – as we know, most large banks in America are all bankrupt, OK?

The proof of that is the overnight repos are now into I don't know \$20 trillion or something like this it's like the derivative Market it's into multiple quadrillions. So these things have gone completely out of control, that's why the stock market hasn't gone up and down up and down, like it should. It just keeps going up, because, the people are selling out.

Just like Shawn Henry did, just like Dmitri Alperovitch did, when they sold their tens of thousands of shares in CrowdStrike, because CrowdStrike is now going to be history and the new system is going to be more demonic than ever; more limiting than ever and it's going to be what Eric Schmidt created, called Dragonfly, which is the Social Credit System.

**Michael McKibben:** So, you say we've crossed the Rubicon.

**Douglas Gabriel:** Absolutely.

**Michael McKibben:** You're actually officially announcing it.

**Douglas Gabriel:** Yes, I am.

**Michael McKibben:** OK, well I'm gonna make notes of this day.

**Douglas Gabriel:** Yes and if you want to know what further to do, just read Gab. Read Tyler's Gab page, Gabriels\_Horn Gabriels underscore Horn, because she's telling you what to do there and has, for years, because the three of us and a few other people and your team and the Conclave and her team and all these people know this stuff but they didn't believe it.

They couldn't believe it. They can't believe that evil is this prevalent at this time but it is. It's the most prevalent evil in history.

Why? Because we have the machines doing the evil for us. Machines have no morality. They'll do any evil you want them to do.

But again, humans are not developed. Think of Hunter Biden. Four times, he took all the evidence for all those crimes on his computer and just left it somewhere, because he's a crackhead and he didn't remember, because he was going off to the next horror. I mean, this is unbelievable!

But look at Joe Biden's family, look at Clinton.

Mike, you get the final word.

**Michael McKibben:** Yeah, there are a lot of problems in this world and I've always wanted to look at solutions, as an engineer and this MySQL Privacy App just literally dropped in our lab. These mathematicians contacted me and so, it became, with some help of some people that will go unnamed, we were able to develop this and develop the way of exchanging keys that you can do anywhere on the Planet just using a PC running Windows.

And it's that easy. The average person can do it. The average corporate manager can do it. The average CEO can do it, without geek help, once you get set up.

So, I encourage everyone to get it, as a tool in their toolbox. It's not the solution to everything but if you want to exchange files privately, this is the way to do it and they cannot be cracked.

**Douglas Gabriel:** Thank you Michael for your inventions and for your morality.

That is the most comprehensive (post 2000) history of the NWO/WEF etc I have encountered, and I have been researching this since 1964. I am surprised you guys are alive. I have maintained a super-low profile, nevertheless, I have attracted thirteen death threats/actual attempts in my time, so you fellas are clearly under a safer star than that under which I shelter.

As I see it, and aware that one never knows what one does not yet know, your one undiscovered (or undisclosed) element of the programme is the person who heads the table. I happened to be in the right place at the right time and recorded his ascension. I can also tell you the month he took command... March 2017; fifty-one years after being appointed. I sure as hell ain't saying his name, after what you warned us of LOL.

thanks to insider trading we know the evil cabaal is telegraphing their response to their failing plans to exterminate us by showing us their last moves by dumping stock and cashing out . this resetting of humanity is not going well for the demented deep state and their loser minions who failed to see us reaching the threshold of positive consciousness needed to kick off the mission from our future selves who came back to now time to save us in the planned liberation of all of the multiverses inhabitants . we are winning by having the presence of mind and the will to change the channel on realityTV .

July 26, 2024 at 7:42 pm

Hi. Fantastic reading, with one disappointment, so I'll ask:  
When will the MySquif be available for us Mac users?  
We are just as important aren't we.

[REPLY](#)

○ **Alexandra Bruce**

July 26, 2024 at 11:57 pm

Macs are less susceptible, as you know, so not as urgent. You'll have to ask Mike about that.

On Wednesday, I lost an entire day's work, as every file I had open (articles that I was writing) disappeared from my computer. Every time I'd start a new document, it would disappear.

Silly me, I have MS Office programs on my computer. My advice is to avoid Microsoft everything.

My website was also down for hours on Wednesday, due my hosting service ISP being down.
